Structured Luck Onoso Imoagene,2023-04-03 The Diversity Immigrant Visa Program is a lottery that awards winners

from underrepresented countries the chance to apply for legal permanent residence in the United States Most lottery winners think of themselves as lucky viewing the win as an opportunity to pursue better lives for themselves and their families In *Structured Luck* sociologist Onoso Imoagene uses immigrants stories to show that while the visa program benefits many recipients the program s design can also lead to exploitation in their countries of origin and reduced potential once they are in the United States Combining ethnographic observation in Africa and interviews with immigrants their family members and friends from Ghana and Nigeria Imoagene demonstrates that the visa program is a process of structured luck from how people hear about the lottery who registers for it and who participates in it to the application requirements for the visa In Ghana and Nigeria people often learn about the lottery through friends colleagues or relatives who persuade them to enter for the perceived benefits of receiving a visa opportunities for upward mobility permanent legal status and the ability to bring along family members Though anyone can enter the lottery not everyone who wins obtains a visa The visa application process requires proof of a high school diploma or artisan skills a medical exam a criminal background check an interview with U S consular officers and payment of fees Such requirements have led to the growth of visa entrepreneurs who often charge exorbitant fees to steer immigrants through the process Visa recipients who were on track to obtain university degrees at home often leave in the middle of their studies for the United States but struggle to continue their education due to high U S tuition costs And though their legal status allows them to escape the demoralizing situations that face the undocumented these immigrants lack the social support that the government sometimes provides for refugees and other migrants Ultimately Imoagene notes the real winner of the visa lottery is not the immigrants themselves but the United States which benefits from their relatively higher levels of education Consequently she argues the U S must do more to minimize the visa program s negative consequences *Structured Luck* illuminates the trauma resilience and determination of immigrants who come to the United States through the Diversity Visa Program and calls for the United States to develop policies that will better integrate them into society

Taylor,2014-02-03 The academic discipline of linguistics is at a critical stage of development Whatever consensus there may have been fifteen or even ten years ago is fast disappearing A process of redefinition is underway and it is the aim of this volume to contribute to that process explain why a redefinition is needed and how it should proceed In the case of linguistics the subject is also the subject matter Many linguists have ignored the problem of definition simply regarding linguistics as the science of language itself What though is language itself Is it a language ie English Swahili Or language in a more general sense The primary goal of a redefinition of linguistics should be to demonstrate that language is not an objective matter Linguistics is and should be the study of whatever is linguistically pertinent A linguistics redefined would look at how we interpret and construct our day to day communication acts what views of language are shared by and opposed by societies and the source and roles that these views play in our living and learning experience These papers argue the case for such a redefinition more explicitly than has ever been done before in modern linguistic theory Such a redefined perspective precisely because it is a perspective subject to outside influence and in constant dialogue with the perspective of the other human sciences must be endlessly redefined **Amendment to Interstate Commerce Act (trip Leasing)** United States.
