Language in Visual Art David W. Galenson, 2008 Words have appeared in visual art since classical times but until the modern era their use was generally restricted to a few specific functions In the early twentieth century the Cubists Braque and Picasso began using words in their paintings and collages in entirely new ways and their innovation was quickly adopted by other artists Words phrases and sentences were subsequently used by visual artists for a variety of purposes to refer to popular culture to pose verbal puzzles to engage with philosophy and semiotics and for political and social commentary Throughout the century the use of language in visual art was dominated by conceptual artists and the increasing role of language over time was symptomatic of the fact that visual art was progressively intended less as an aesthetic product to be looked at and increasingly as an intellectual activity to be read The prominence of language is yet another way in which the visual art of the twentieth century differs from all earlier periods as a result of the increasingly extreme practices of conceptual artists after the development of a competitive market for advanced art in the late nineteenth century freed them from the constraints that had previously been imposed by governments and other powerful patrons
