Seeking to transfer knowledge across ideological boundaries within a theoretically valid scientific framework Beyond the Therapeutic Relationship draws upon and relates existing research from psychotherapy and the allied fields of human behavior Author Frederic J Leger has successfully cut across multifarious therapies to create an integrated high order theory that unites psychotherapy s disparate forces In the process he addresses the theoretical underpinnings of the field of psychotherapy the paradigm of the therapeutic relationship and its centrality to therapeutic change the difficulties of creating a scientific discipline from the study of the psyche and the factionalization of psychology into different competing

schools By exploring universal variables and how they fit into a causal nexus Beyond the Therapeutic Relationship identifies transtheoretical processes of change that cut across diverse therapies It also offers heuristic research direction and guidance in eclectic and integrative practice as it broadens the perspective on the psychotherapeutic encounter Combining physiological social and psychological research into a transtheoretical psychodynamic theory this important text discusses why the need for paradigmatic direction is urgent bringing nonverbal variables to the therapist's working awareness or focus how a small range of conceptual possibilities limits knowledge of human behavior the lack of efficacy in psychotherapy the psychobiological significance of intensive experiential exploration formation of the self through language and discourse integrative eclecticism within transtheoretical and common factors integration Psychologists psychiatrists mental health therapists and academics and students in psychology psychiatry and educational psychology now have a text that cuts across the multitude of therapeutic approaches to provide a theory that is empirically supported and grounded in the author's 25 years of clinical practice As you will see Beyond the Therapeutic Relationship discusses the current position of the field of psychotherapy where it needs to go specific strategies for getting there as well as alternative interventions beyond empathy and the therapeutic relationship

Enchantments of the Clinic Carl P. Ellerman, 2010-06-02
 Reflecting on his experience in the clinical trenches a pragmatic existential therapist offers a provocative study of power erotic influence and illusion in the clinical relationship Written in a conversational style that makes a challenging subject accessible to specialists in the clinical professions teachers and students of the psychological disciplines and scholars in the humanities and social sciences Enchantments of the Clinic introduces readers to interesting ways in which language ideas and speech as well as illusions of the clinical station enable therapists to cast an unintentional spell that captivates and charms unsuspecting patients Exposing this suggestive underworld of clinical experience where the high stakes game of persuasive dialogical therapy is often won or lost critical attention is focused on the erotization of the clinic the erotization of the clinician and the erotization of clinical confession Using dramatic examples from clinical practice Carl P Ellerman challenges prevailing dogmas of the therapeutic to demonstrate his thesis that enchantments of the clinic facilitate psychological healing if managed well but if mismanaged these volatile erotic enchantments may undermine the struggle against emotional illness in the clinical trenches This ambitious study of the clinical relationship also addresses the disturbing fact that we are dwelling in a postmodern era in which clinical nihilism is flourishing Ellerman conceives the dialogical therapist as a potentially dangerous ethically vulnerable therapeutic artiste whose strategic encounters in the postmodern clinic may be likened to aesthetic experiences in which an education to reality and a love of truth are obsolete or irrelevant notwithstanding a clinical masquerade that reinforces in spellbound patients a blind trust in the phantastic therapist s honesty truthfulness and intellectual integrity Embracing the Socratic mystique Ellerman offers a vigorous philosophic critique of clinical nihilism

Accounts of Innocence Joseph E. Davis, 2005 Since a new sensitivity and orientation to victims of injustice arose in the 1960s categories of victimization have proliferated Large numbers of people are now characterized and characterize themselves as sufferers of psychological injury caused by the actions of others In contrast with the familiar critiques of victim culture Accounts of Innocence offers a new and empirically rich perspective on the question of why we now place such psychological significance on victimization in people s lives Focusing on the case of adult survivors of childhood sexual abuse Joseph E Davis shows how the idea of innocence shaped the emergence of trauma psychology and continues to inform accounts of the past and hopes for the future in therapy with survivor clients His findings shed new light on the ongoing debate over recovered memories of abuse They challenge the notion that victim accounts are an evasion of personal responsibility And they suggest important ways in which trauma psychology has had unintended and negative consequences for how victims see themselves and for how others relate to them An important intervention in the study of victimization in our culture Accounts of Innocence will interest scholars of clinical psychology social work and sociology as well as therapists and victim activists
