Language The Unknown An Initiation Into Linguistics:

Language--the Unknown Julia Kristeva, 1989 Voice Literary Supplement *Langage, Cet Inconnu* Julia Kristeva, 1989

Langage, Cet Inconnu Julia Kristeva, 1992 Beginning with Egyptian hieroglyphics and Mayan and Phoenician writings the Hebrew Bible and Classical Greek culture and continuing to the Prague School of Structuralism Julia Kristeva provides an introduction to the history of graphic cultures philosophy anthropology and semiotics In a series of carefully documented analyses informed by Levi Strauss Barthes Derrida Freud and Lacan Kristeva describes the history of thought as a phenomenon that links philosophical speculation to linguistic practice **French Feminists on Religion** Morny

Joy, Kathleen O'Grady, Judith L. Poxon, 2002 French Feminists on Religion A Reader offers the first representative selection of important writings by French feminist thinkers on the topic of religion including the most influential and provocative texts on the subject from Luce Irigaray Julia Kristeva Hélène Cixous Monique Wittig and Catherine Clément Each thinker is introduced by a bibliographical preface while individual essays are preceded by an editorial commentary explaining the context and significance of each piece for the study of religion The collected texts cover a broad range of religious practices and discourses focusing primarily on Jewish and Christian concerns but including elements of ancient Goddess traditions Witchcraft Hinduism and Buddhism Critically examined themes include Jewish and Christian notions of sin defilement purity and redemption the relationship between subjectivity and divinity as conceived in the feminine the feminist re imaging of the Virgin Mary and of Catholic theologies of love the repression of the maternal in Judeo Christian culture Brought together for the first time in French Feminist on Religion A Reader these essays demonstrate the central importance of French feminism for the study of religion and at the same time make evident the significance of religious themes figures and concepts to the world of French feminists *The Castration of Oedipus* Joseph C. Smith, Carla J. Ferstman, 1996-03 The intellectual

movements of psychoanalysis postmodernism and feminism have redefined the ways in which we think about human experience And yet an integration of these movements has been elusive if not impossible In this landmark book J C Smith and Carla J Ferstman combine these disparate traditions to create a provocative unified and tightly woven perspective that transcends the misogyny implicit in much of Freudian psychoanalytic theory The dialectics of domination and submission are central to Smith and Ferstman's argument Men and women they insist must avoid the temptation to fetishize equality and recognize the roles of domination and submission in the human psyche or in Nietzsche's terms the Will to Power They argue that the unification of psychoanalysis postmodernism and feminism leads us to a shocking conclusion that women and men cannot move beyond the suffering which so haunts the human condition unless heterosexual men surrender the power that is causing their misery and affirm life by joyfully accepting domination by women And women conversely must reaffirm their power by rejecting Oedipal genderization and embracing a liberating matriarchal consciousness and a matriphallic sexuality A work of tremendous insight and extraordinary intellectual energy *The Castration of Oedipus* will provoke strong reactions

in all readers regardless of ideology *Cultural Memory of Language* Susan Samata, 2014-11-20 I can't even speak my own language were the words overheard in a college staffroom that triggered the writing of this book Calling something my own implies a personal proprietary relationship with it But how can it be your own if you cannot speak it The *Cultural Memory of Language* looks at unintended monolingualism a lack of language fluency in a migratory cultural situation where two or more languages exist at home It explores family history and childhood language acquisition and attrition What is the present everyday experience of language use and life between two cultures Examining interview data Samata uncovers a sense of inauthenticity felt by people who do not fully share a parent's first language Alongside this features a sense of concurrent anger and a need to assign blame Participation in the language even to the extent of phatic or formulaic phraseology occasions feelings of authentic linguistic and cultural inclusion The book thus uncovers appreciable and measurable benefits in positive self image and a sense of well being Looking at how people view language is essential how they view the language they call their own is even more important and this book does just that in a qualified applied linguistic environment *Jews, Catholics, and the Burden of History* Eli Lederhendler, 2006-03-02 Volume XXI of the distinguished annual *Studies in Contemporary Jewry* marks sixty years since the end of the Second World War and forty years since the Second Vatican Council's efforts to revamp Church relations with the Jewish people and the Jewish faith *Jews Catholics and the Burden of History* offers a collection of new scholarship on the nature of the Jewish Catholic encounter between 1945 and 2005 with an emphasis on how this relationship has emerged from the shadow of the Holocaust *Linguistic Descriptions of the Greek New Testament* Stanley E. Porter, 2023-08-10 Stanley E Porter provides descriptions of various important topics in Greek linguistics from a Systemic Functional Linguistics SFL perspective an approach that has been foundational to Porter's long and influential career in the field of New Testament Greek Deep insights into Porter's understanding of SFL are displayed throughout based either upon how he positions SFL in relation to other linguistic models or how he utilizes it to describe topics within Greek and New Testament studies Porter reflects on his core approach to the Greek New Testament by exploring subjects such as metaphor rhetoric cognition orality and textuality as well as studies on linguistic schools of thought and traditional grammar **Deviational Syntactic Structures** Hans Göttsche, 2013-03-28 Taking as a point of departure ideas and principles from the 18th and 19th century Danish tradition and from 20th century traditions of the Copenhagen School of linguistics this book attempts to set up a formal theory of syntax that addresses some of the weak points of other formal grammars notably Chomskyan grammar After introductions to the ideas of Brøndal Hjelmslev and Diderichsen Göttsche lays the philosophical and theoretical foundations of his formalism based on a theory of universal pragmatics and on the invention of a special kind of formal logic called occurrence logic and elaborates this formal system in detail In order to justify the adequacy of the theory the theoretical apparatus is applied to the general structures of Danish and Swedish and illustrated by linguistic material from these languages Furthermore the ambition is to propose solutions to

traditional problems concerning more inferior grammatical categories like prepositions infinitive markers and particles The concluding chapter of the book presents some ideas about how the formal system can be transformed into a model of the cognitive mechanism that handles syntax This book will be of interest to linguists philosophers and scholars in theoretical linguistics and in Modern Languages *All Theater Is Revolutionary Theater* Benjamin Bennett, 2018-07-05 All Theater Is Revolutionary Theater is the first book to consider why in the Western tradition and only in the Western tradition theatrical drama is regarded as its own literary or poetic type when the criteria needed to differentiate drama from other forms of writing do not resemble the criteria by which types of prose or verse are ordinarily distinguished Through close readings of such playwrights as Beckett Brecht Brecht Eliot Shaw Wedekind and Robert Wilson Benjamin Bennett looks at the relationship between literature and drama identifying typical problems in the development of dramatic literature and exploring how the uncomfortable association with theatrical performance affects the operation of drama in literary history Bennett's historical investigations into theoretical works ranging from Aristotle to Artaud Brecht and Diderot suggest that the attempt to include drama in the system of Western literature causes certain specific incongruities that in his view have the salutary effect of preserving the otherwise endangered possibility of a truly liberal progressive or revolutionary literature

But Their Faces Were All Looking Up Eric M. Vanden Eykel, 2016-12-01 This study of the Protevangelium of James explores the interrelationship of authors readers texts and meaning Its central aim is to better understand how the process of repetition gave rise to the narratives of the early Christian movement and how that process continued to fuel the creativity and imagination of future generations Divided into three parts Vanden Eykel addresses first specific episodes in the life of the Virgin consisting of Mary's childhood in the Jerusalem temple PJ 7 9 her spinning thread

for the temple veil PJ 10 12 and Jesus birth in a cave outside Bethlehem PJ 17 20 The three episodes present a uniform picture of how the reader's discernment of intertexts can generate new layers of meaning and that these layers may reveal new aspects of the author's meaning some of which the author may not have anticipated

Language Alone Geoffrey Galt Harpham, 2013-08-27 How did the concept of language come to dominate modern intellectual history In *Language Alone* Geoffrey Galt Harpham provides at once the most comprehensive survey and most telling critique of the pervasive role of language in modern thought He shows how thinkers in such diverse fields as philosophy psychoanalysis anthropology and literary theory have made progress by referring their most difficult theoretical problems to what they presumed were the facts of language Through a provocative reassessment of major thinkers on the idea of language Saussure Wittgenstein Derrida Rorty and Chomsky among them and detailed accounts of the discourses of ethics and ideology in particular Harpham demonstrates a remarkable consensus among intellectuals of the past century and beyond that philosophical and other problems can best be understood as linguistic problems And furthermore that a science of language can therefore illuminate them Conspicuously absent from this consensus he shows is any consideration of contemporary linguistics or any awareness of the growing agreement among linguists that the nature of language as such cannot be known Ultimately Harpham argues the thought of language has dominated modern intellectual history because of its singular capacity to serve as a proxy for a host of concerns questions and anxieties our place in the order of things our rights and obligations our nature or essence that resist a strictly rational formulation *Language Alone* will interest literary critics philosophers and anyone with an interest in the uses of language in contemporary thought

Birthing the Nation Lisa Forman Cody, 2005-02-03 How could the professional triumph of man midwifery and contemporary tales of pregnant men rabbit breeding mothers and meddling midwives in eighteenth century Britain help construct the emergence of modern corporate and individual identities By uncovering long lost tales and artefacts about sexuality birth and popular culture Lisa Forman Cody argues that Enlightenment Britons understood themselves and their relationship to others through their experiences and beliefs about the reproductive body Birthing the Nation traces two intertwined narratives that shaped eighteenth century British life the development of the modern British nation and the emergence of the male expert as the pre eminent authority over matters of

sexual behaviour reproduction and childbirth By taking seriously contemporary caricatures jokes and rumours that used gender birth and family to make claims about religious ethnic and national identity Cody illuminates an entirely new view of the eighteenth century public sphere as focused on the bodily and the bizarre In a monarchy arbitrated by its official religion regulation of reproduction and childbirth was vital to the very stability of British political authority and the coherence of British culture challenged as it was by Catholicism the French Revolution and social change In the late seventeenth century the English feared the power of female midwives to control the destiny of the royal family yet men midwives and male experts had hardly proved their superiority to manage the successful birth of children By the mid eighteenth century however male midwives became experts over the domestic world of pregnancy and childbirth largely replacing female midwives among the middling and elite families Cody suggests that these new professionals provided a new model for masculine comportment and emergent intimate relationships within the middle class and elite home Most surprisingly Cody has discovered many interconnections between obstetrics and politics and shows how male experts transformed what had once been the private feminine domain of birth and midwifery into topics of public importance and universal interest leading even Adam Smith and Edmund Burke to attend lectures on obstetrical anatomy This is the first book to place the eighteenth century shift from female midwives to male midwives as the dominant experts over childbirth in a larger cultural and political context Cody illuminates how eighteenth century Britons understood and symbolized political national and religious affiliation through the experiences of the body sex and birth In turn she takes seriously how the political arguments and rhetoric of the age were not always made on disembodied rational terms but instead referenced deep cultural beliefs about gender reproduction and the family

The Philosophy of Susanne Langer Adrienne Dengerink Chaplin, 2019-10-17 This book is a comprehensive study of one of the most insightful and fertile but also most neglected philosophers of the twentieth century Susanne Langer Failure to recognise Langer's seminal philosophical sources has led to frequent misinterpretations and misunderstandings of her unique philosophical thought Beginning with an overview of Langer's life and education this study

provides a much needed explanation of how Langer's thinking was shaped by four seminal sources her mentors Henry Sheffer and Alfred North Whitehead and the European philosophers Ernst Cassirer and Ludwig Wittgenstein Langer's ability to unite seemingly disparate fields such logic art and embodied cognition around the notion of symbolic form places aesthetics not at the margins of philosophy but at its very centre By locating Langer's work in the broader context of major developments in twentieth century European and American philosophy Dengerink Chaplin shows how she was often ahead of her time Shedding new light on Langer as an American philosopher whose innovative thought crosses the customary boundaries between analytic and continental philosophy this book confirms why she continues to have relevance today
