Languages In Contact The Partial Restructuring Of Vernaculars:

Languages in Contact John Holm, 2003-12-18 There is widespread agreement that certain non Creole language varieties are structurally quite different from the European languages out of which they grew however until recently linguists have found difficulty in accounting for either their genesis or their synchronic structure This 2003 study argues that the transmission of source languages from native to non native speakers led to partial restructuring whereby some of the source languages morphosyntax was retained but a significant number of substrate and interlanguage features were also introduced Comparing languages such as African American English Afrikaans and Brazilian Vernacular Portuguese John Holm identifies the linguistic processes that lead to partial restructuring bringing into focus a key span on the continuum of contact induced language change which has not previously been analysed Informed by the first systematic comparison of the social and linguistic facts in the development of these languages this book will be welcomed by students of contact linguistics sociolinguistics and anthropology

Language Interrupted John McWhorter, 2007-06-18

Foreigners often say that English language is easy A language like Spanish is challenging in its variety of verb endings the verb speak is conjugated hablo hablas hablamos and gender for nouns whereas English is more straight forward I speak you speak we speak But linguists generally swat down claims that certain languages are easier than others since it is assumed all languages are complex to the same degree For example they will point to English's use of the word do Do you know French This usage is counter intuitive and difficult for non native speakers Linguist John McWhorter agrees that all languages are complex but questions whether or not they are all equally complex The topic of complexity has become a hot issue in recent years particularly in creole studies historical linguistics and language contact As McWhorter describes when languages came into contact over the years when French speakers ruled the English for a few centuries or the vikings invaded England a large number of speakers are forced to learn a new language quickly and this came up with a simplified version a pidgin When this ultimately turns into a real language a creole the result is still simpler and less complex than a non interrupted

language that has been around for a long time McWhorter makes the case that this kind of simplification happens in degrees and criticizes linguists who are reluctant to say that for example English is simply simpler than Spanish for socio historical reasons He analyzes how various languages that seem simple but are not creoles actually are simpler than they would be if they had not been broken down by large numbers of adult learners In addition to English he looks at Mandarin Chinese Persian Malay and some Arabic varieties His work will interest not just experts in creole studies and historical linguistics but the wider community interested in language complexity

The Survey of Pidgin and Creole Languages Susanne Maria Michaelis, Philippe Maurer, Martin Haspelmath, Magnus Huber, 2013 The most authoritative guide ever published to the world's pidgin and creole languages The 3 volume Survey describes their histories and linguistic characteristics The Atlas of Pidgins and Creoles published at the same time shows how 130 linguistic features are distributed among the world's languages

Language Change Anna Mauranen, Svetlana Vetchinnikova, 2020-12-03 English as a lingua franca ELF has become ubiquitous in today's globalised mobile and fast changing world It is clear that it will have an unprecedented impact not only on how we communicate but also on our understanding of language use and change What exactly ELF brings to our life and to language theory is a question which requires an interdisciplinary take This book gathers together leading scholars from world Englishes typology language history cognitive linguistics translation studies multilingualism sociolinguistics and ELF research itself to seek state of the art answers Chapters present original insights on language change based on theoretical approaches and empirical studies and provide clear examples of social interactional and cognitive changes that ELF instigates The picture which unfolds on the pages of this book is complex dynamic and makes a convincing case for the importance of English as a lingua franca on language change at a global scale

Creoles, Revisited Nicholas G. Faraclos, Sally J. Delgado, 2021-05-16 This innovative book contributes to a paradigm shift in the study of creole languages forging new empirical frameworks for understanding language and culture in sociohistorical contact The authors bring together archival sources to challenge dominant linguistic theory and practice and engage issues of power positioning marginalized indigenous peoples as the center of and vital agents in these languages formation and development Students in language contact pidgins and creoles Caribbean studies and postcolonial studies courses and scholars across many disciplines will benefit from this book and be convinced of the importance of understanding creoles and creolization

Cultural Linguistics and the Social World Judit Baranyiné Kóczy, Diana Prodanović Stankić, Olga Panić Kavgić, 2024-10-24 This book approaches cultural conceptualizations of our modern world from cultural linguistic and cognitive perspectives It explores broader topics such as contemporary society media and entertainment migration and identity political discourse educational contexts and creative linguistic innovation all of which are seen as interwoven and mutually complementary segments of our present day social world This publication brings a fresh multi cultural approach reflected in applying the principles of cultural linguistics to the analysis of different aspects of language use across four continents Europe Asia Africa

and Australia The issue of shared cultural conceptualizations being their common denominator the chapters of this book shed light on how various cultural groups use language to communicate their ideas and beliefs both within and outside their own culture bearing in mind the often contradictory nature of the present day social world that at the same time unites and disintegrates social groups Benefiting scholars from fields within the broad spectrum of the humanities and social sciences who are interested in culture discourse linguistics sociology migration and politics the book uncovers challenging new trends inviting its readers to further explore the vast interconnected fields of language culture and cognition in the turbulent 21st Century Chapter 5 is available open access under a Creative Commons Attribution 4.0 International License via link [springer.com](https://www.springer.com)

[Trask's Historical Linguistics](#) Robert McColl Millar, R L Trask, 2023-05-18 Trask's Historical Linguistics provides an accessible introduction to historical linguistics the study of language change over time This engaging book is illustrated with language examples from all six continents and covers the fundamental concepts of language change methods for historical linguistics linguistic reconstruction sociolinguistic aspects of language change language contact the birth and death of languages language and prehistory and the issue of very remote relations The fourth edition of this renowned textbook is fully revised and updated and covers the most recent developments in historical linguistics including A thorough reworking of sections on morphological and syntactic change incorporating progress in areas such as grammaticalization and the discussion of the Indo-European homeland Discussion and analysis of folk historical linguistics and its connection with some of the more eccentric views of professional linguists An expanded discussion of language contact historical sociolinguistics and language planning including a discussion of contemporary competing views on the genesis and nature of creoles and their importance in our understanding of radical linguistic change Updated support material including suggestions for essay questions and a larger number of supporting examples of the phenomena described in the book Trask's Historical Linguistics is essential reading for advanced undergraduate and postgraduate students of historical linguistics as well as any student looking for a grounded introduction to the English language

[Globalization and Language in the Spanish Speaking World](#) C. Mar-Molinero, M. Stewart, 2006-09-05 This volume considers the spread of Spanish today and particularly its role in the processes of globalization Spanish is frequently dominant in contact with other languages But how contested is its hegemony and how far does it threaten other languages How are these other minoritized languages faring in a world of few strong global languages

Globally Speaking Judith Rosenhouse, Rotem Kowner, 2008-05-22 This volume accounts for the motives for contemporary lexical borrowing from English using a comparative approach and a broad cross cultural perspective It investigates the processes involved in the penetration of English vocabulary into new environments and the extent of their integration into twelve languages representing several language families including Icelandic Dutch French Russian Hungarian Hebrew Arabic Amharic Persian Japanese Taiwan Chinese and several languages spoken in southern India Some of these languages are studied here in the context of borrowing for the first time ever All in all this volume suggests that the

English lexical invasion as it is often referred to is a natural and inevitable process. It is driven by psycholinguistic, sociolinguistic and socio-historical factors of which the primary determinants of variability are associated with ethnic and linguistic diversity.

The Typology of Asian Englishes Lisa Lim, Nikolas Gisborne, 2011-10-05. When considering the structure of New Englishes which have evolved in multilingual, mostly post-colonial contexts of Asia, thus Asian Englishes, the significant factors to be considered are 1) the varieties of the English lexifier that entered the local context, 2) the nature of transmission of English to the local population and 3) the local i.e. substrate languages of the community in which the New English emerges. This third factor is the focus of the five papers in this volume; they investigate the structure of Asian varieties of English by

exploring the relationship between the typological profile of substrate languages in the specific linguistic ecology and the grammatical features of the emerging contact variety of English The contributions to this volume were originally published in English World Wide 30 2 2009
