Advanced Techniques In Gasless Laparoscopic Surgery: Abdominal Wall Lifting With Subcutaneous Wiring Daijo Hashimoto, 1995-11-16 This book designed primarily as a practical reference attempts to provide a clear and pragmatic approach to the understanding of the innovative procedure in abdominal wall lifting with subcutaneous wiring This sophisticated laparoscopic operation eliminates the conventional complications of the pneumoperitoneum method The techniques described here do not require the use of air tight trocars thus allowing surgeons to operate smoothly as well as safely with better operative view and easier hemostasis ligation suturing etc This method has the additional advantage of greatly reducing the equipment and expensive disposable instruments used This book is well illustrated with over 100 high quality and beautiful photographs

The Role of Laparoscopy in Emergency Abdominal Surgery Vincenzo Mandala, 2011-12-07 This is the first time a book about laparoscopy in emergency abdominal surgery has been published Numerous articles have been published in specific surgical journals but until now there has not been a book that collates all the aspects of this little known field The aim of this volume is to achieve a complete and easy presentation of all the implications associated with laparoscopy in emergency abdominal surgery The book should be a manual that can be easily consulted by digestive general and specialized surgeons especially in an emergency The authors contributions are founded on evidence based medicine which give the book scientific credibility but this is coupled with their experience of daily practice which adds an important complementary dimension to evidence based medicine This is balanced by an emphasis on clarity and accessibility because the ultimate aim of the book is

educational We hope this book will be frequently consulted in depth not only by specialist practitioners but also by undergraduate students new graduates and surgeons in training
