Kathryn M. Campbell,2018-06-12 Innocent people are regularly convicted of crimes they did not commit A number of systemic factors have been found to contribute to wrongful convictions including eyewitness misidentification false confessions informant testimony official misconduct and faulty forensic evidence In Miscarriages of Justice in Canada Kathryn M Campbell offers an extensive overview of wrongful convictions bringing together current sociological criminological and legal research as well as current case law examples For the first time information on all known and suspected cases of wrongful conviction in Canada is included and interspersed with discussions of how wrongful convictions happen how existing remedies to rectify them are inadequate and how those who have been victimized by these errors are rarely compensated Campbell reveals that the causes of wrongful convictions are in fact avoidable and that those in the criminal justice system must exercise greater vigilance and openness to the possibility of error if the problem of wrongful conviction is to be resolved Groundwork in the Theory of Argumentation J. Anthony Blair,2011-10-20 J Anthony Blair is a prominent international figure in argumentation studies He is among the originators of informal logic an author of textbooks on the informal logic approach to argument analysis and evaluation and on critical thinking and a founder and editor of the journal Informal Logic Blair is widely recognized among the leaders in the field for contributing formative ideas to the argumentation literature of the last few decades This selection of key works provides insights into the history of the field of argumentation theory and various related disciplines It illuminates the central debates and presents core ideas in four main areas Critical Thinking Informal Logic Argument Theory and Logic Dialectic and Rhetoric **Value-for-money Audit Evidence**

D. M. Barnes,Canadian Institute of Chartered Accountants,1991 *The 325: Canada's Criminal Code (w/ Other Acts) - a Case Compilation* , A case compilation of the 325 most cited CC Extradition Act and Charter cases that I compiled to facilitate a one file download Assumes a person doesn t want to take the time to immerse themselves in case stream and nuances of the topic in CANLII org where I obtained the cases and did the digesting of same myself to put it all together for you *National Legal Presumptions and European Tax Law* Claudia Sanò,2016-04-24 Determining the burden of proof in tax law cases is usually what contributes most to the case s outcome Legal presumptions those inferences that are laid down in the law rather than being the result of the court s reasoning play a critical role in such determinations This very useful book uncovers the details of such presumptions which are shared among European tax law systems thus revealing a remarkably clear path through the course of a tax law case in any Member State in the context of EU law Referring to both legal theory

and relevant case law the author assesses whether and to what extent national legal presumptions may be deemed to be consistent with EU law and when this is not the case under which conditions they may be reconciled The analysis unfolds along such avenues as the following the meaning of the concept of legal presumption as developed by legal theory and authoritative academic literature special considerations regarding presumptions in customs law VAT and direct taxation harmonized and unharmonized how tax authorities use presumptions to simplify the assessment of tax and tackle tax avoidance or evasion particularly in cross border situations justifications asserted by the Member States in relation to restrictions on fundamental freedoms and standards of compatibility for national legal presumptions with EU law resulting from CJEU case law With reference to national experience using Italy and Belgium as specific examples the analysis culminates in an elaboration of criteria for legal presumptions capable of meeting the test of compatibility with EU law As an in depth investigation of possible inconsistencies and conditions for the coexistence of EU and Member State tax law this book will be welcomed by both taxation authority officials and taxpayer counsel The understanding it imparts on the actual impact of EU law on the recourse to legal presumptions by national tax legislatures and the protection of European taxpayers is unsurpassed Evidence Hamish Stewart,2002 Legal Professional Privilege Jonathan Auburn,2000-06-20 In the Commonwealth the principle of legal professional privilege has been treated as almost sacrosanct and in consequence derogations from it have been rare The traditional view is that despite resulting unfairness the rule must be absolute in order to achieve its stated goals This view is challenged here through an examination of the structure of and exceptions to the privilege Auburn argues that the claims made of the rule in the past have been overstated and that the privilege is more robust than widely assumed Being dependent on patterns of client behaviour it can accommodate change while still fulfilling its essential function Having examined the theory structure and main derogations from the privilege the author asserts that we should be more sceptical of the claims made of the privilege and in appropriate circumstances should give more weight to the values underlying the disclosure of evidence This thoughtful analysis presents a new approach to the issue of legal professional privilege It offers a thorough exploration of the principles underlying the privilege and takes a Commonwealth wide approach covering the law in England Australia Canada New Zealand and South Africa as well as drawing on relevant principles from European and United States law *Impulsivity* Christopher D. Webster,Margaret A. Jackson,1997-06-20 *Impulsivity* features prominently in contemporary descriptions of many psychiatric disorders and is also a key element in the clinical risk assessment of violence Thoroughly examining the nature assessment and treatment of impulsive conduct this up to date volume brings together contributions from prominent researchers and clinicians in both mental health and correctional settings Chapters illuminate our current understanding of impulsive behavior from conceptual legal and biological perspectives and address the challenges of describing and measuring it With special emphasis on how the likelihood of future violent or destructive behavior can best be gauged in specific cases the volume includes several newly

developed risk assessment tools Impulsivity also provides an invaluable overview of the current state of the research and delineates a broad clinically pertinent agenda for future study Impulsivity is an invaluable resource for clinicians working in private practice correctional facilities health care settings and community based programs It also serves as a primary or supplementary text for advanced undergraduate and graduate level courses

Law and Science Helen Reece, 1998 This is the first volume of an exciting new series Current Legal Issues which will be published each spring as a sister volume to Current Legal Problems The basis for each interdisciplinary volume will be a two day colloquium held each year by the Faculty of Laws at University College London This first volume explores the interrelationship of law and science Future volumes will examine themes such as law and literature law and medicine law and religion etc This book the first volume of Current Legal Issues explores the relationship of law and science with a particular focus on the role of science as evidence Scientific evidence impinges on a wide range of legal issues including for example risk assessment in mental health and child abuse criminal investigations chemical and medical products mass tort cases and the attribution of paternity Science promises to reduce or even eliminate uncertainty how should lawyers respond to such ambitious claims As the civil justice process undergoes a major overhaul this diverse and stimulating collection of essays provides a timely and thought provoking reassessment of the relationship between law and science in general and the uses and value of scientific evidence in particular From the Editors Introduction This volume addresses the intersection between law and science two monolithic institutions which generally compete for but sometimes coincide in presenting an authoritative analysis of the world The contributors to this volume take different views as to who is the victor in this contest Science deals in objective reality therefore it is for scientists to reveal as much as they can about reality and for the law to determine what should be made of the discoveries Perhaps this division of labour is too simplistic but if it is taken as a model it is apparent that law and science are bound together and that mutual understanding is essential If this volume contributes to that understanding then it will have performed an invaluable service
