Evolution Animal Rights And The Environment

John M. Kistler

Evolution Animal Rights And The Environment:

Evolution, Animal 'rights' & the Environment James B. Reichmann, 2000 The author of this study undertakes an investigation of the metaethical grounds of rights theory with special focus on the controversial issue of whether creatures other than humans can and should be considered true subjects of rights He contends that before assigning rights to this or that individual or group whether human or not we need to be very clear about what it is we are assigning to whom and why The book argues that the efforts to build a case supporting animal and environmental rights fail in their quest and that any such effort resting on a Darwinian evolutionary base is likewise condemned to fail The author investigates life phenomena followed by a detailed comparative study of knowing communicating and doing as these are observed in the human and nonhuman animal This is followed by an overview of diverse views advanced by contemporary environmental ethicists and animal rights advocates including Peter Singer Tom Regan J Baird Callicott Laura Westra and Don E Marietta Jr Conclusions drawn from this study include the claims that classic Darwinian theory provides no admissible premise from which to derive a theory of inherent inalienable rights no satisfactory explanation of the origin of rights and obligation can derive save from within the context of natural law theory the human person alone unqualifiedly possesses rights and the view that vegetarianism is an ethical mandate is neither compatible with the Christian world view nor philosophically sound Animal Rights John M. Kistler, 2000-06-30 Introductions to each chapter explain the issues as well as the arguments that surround them and a general introduction to the volume thoroughly explains how to use the book Each entry contains the following information author title edition series title location of publisher name of publisher number of pages year of publication and International Standard Book Number Annotations include the most important information available to help the researcher including web sites that contain not only the full text of the book when available but also excerpts and articles or interviews by the author short quotations from the books and short descriptions and summaries of the books All the information provided allows students to locate exactly what they need while encouraging them to explore other issues and differing viewpoints *The Animal Rights/Environmental Ethics Debate* Eugene C. Hargrove, 1992-01-01 Reprints 11 articles and chapters of books that document the environmental ethics view of the animal rights movement exploring whether animal welfare considerations can provide a basis for an environmental ethic Offered as a view of wildlife to complement and challenge at times the animal rights literature which focuses on domestic animals and subjects of experiments Paper edition unseen 14 95 Annotation copyrighted by Book News Inc Portland OR *Animal Advocacy and Environmentalism* Amy J. Fitzgerald, 2018-12-14 Many people consider themselves to be both environmentalists and supporters of animal welfare and rights Yet despite the many issues which bring environmentalists and animal advocates together for decades there have been flashpoints which seem to pit these two social movements against each other dividing them in ways unhelpful to both In this innovative book Amy J Fitzgerald analyses historic philosophical and socio cultural reasons for this divide Tackling three core

contentious issues sport hunting zoos and fur over which there has been profound disagreement between segments of these movements she demonstrates that even here they are not as far apart as is generally assumed and that there is space where they could more productively work together Charting a path forwards she points to evolving practices and broad structural forces which are likely to draw the movements closer together in the future The threats posed by industrial animal agriculture to the environment and to non human and human animals demand once and for all that we bridge the divide between animal advocacy and environmentalism **Animal Minds, Animal Souls, Animal Rights** James V.

Parker,2010-07-08 **Animal Minds Animal Souls Animal Rights** explores the thinking of philosophers and theologians about controversies concerning animal consciousness and animal rights The book presents Bernard Lonergan s theory about consciousness and the operations of the mind a theory about two types of knowing and desiring one shared by humans and animals and the other which depends on the activity of asking questions possessed by humans alone The author tests this theory against present day research with apes and examines religious claims historical and current about animals **Animal Minds Animal Souls Animal Rights** concludes by laying a philosophical and theological foundation for a contemporary ethic in which humans are obligated to exercise intelligent stewardship and ensure the compassionate treatment of animals

Animal Subjects Jodey Castricano,2008-05-20 Although Cultural Studies has directed sustained attacks against sexism and racism the question of the animal has lagged behind developments in broader society with regard to animal suffering in factory farming product testing and laboratory experimentation as well in zoos rodeos circuses and public aquariums The contributors to **Animal Subjects** are scholars and writers from diverse perspectives whose work calls into question the boundaries that divide the animal kingdom from humanity focusing on the medical biological cultural philosophical and ethical concerns between non human animals and ourselves The first of its kind to feature the work of Canadian scholars and writers in this emergent field this collection aims to include the non human animal question as part of the ethical purview of Cultural Studies and to explore the question in interdisciplinary terms [Encyclopedia of Animal Rights and Animal Welfare](#)

Anthropocentrism is a peer refereed journal of trans anthropocentric ethics and related inquiries The main aim of the journal is to create a professional interdisciplinary forum in Europe to discuss moral and scientific issues that concern the increasing need of going beyond narrow anthropocentric paradigms in all fields of knowledge The journal accepts submissions on all topics which promote European research adopting a non anthropocentric ethical perspective on both interspecific and intraspecific relationships between all life species humans included and between these and the abiotic environment

Animals and Ethics - Third Edition Angus Taylor, 2009-05-27 Can animals be regarded as part of the moral community To what extent if at all do they have moral rights Are we wrong to eat them hunt them or use them for scientific research Can animal liberation be squared with the environmental movement Taylor traces the background of these debates from Aristotle to Darwin and sets out the views of numerous contemporary philosophers including Peter Singer Tom Regan Mary Anne Warren J Baird Callicott and Martha Nussbaum with ethical theories ranging from utilitarianism to eco feminism The new edition also includes provocative quotations from some of the major writers in the field As the final chapter insists animal ethics is more than just an academic question it is intimately connected both to our understanding of what it means to be human and to pressing current issues such as food shortages environmental degradation and climate change

Perceptions of Human-Animal Relationships and their Impacts on Animal Ethics, Law and Research Cédric Sueur, Marie Pelé, Tetsuro Matsuzawa, Jean-Yves Georges, 2021-02-09 **Understanding the Global Environment** Samir Dasgupta, 2009 Globalization is often discussed in terms of its ecological ramifications Yet while ecological imbalance is today one of the greatest threats to mankind globalization is also a reality that is here to stay The volume therefore seeks to address how globalizing and environmental interests can be reconciled The essays in this volume state that globalization can work both in favour of and against the environment The major issues discussed in this topical volume are how globalization can be used to promote environmental reforms the role of individuals private organizations and governments in keeping environmental degradation in check and in promoting environmental reform globalization and ecological inequality women the environment and globalization changing nature of environmental movements overpopulation and the ecology the relation between the ecology and the economy and the effects of global climate changes **Human Dignity and Bioethics**, 2008

Contains a collection of essays exploring human dignity and bioethics a concept crucial to today's discourse in law and ethics in general and in bioethics in particular **Politics as If Evolution Mattered** Lorna Salzman, 2011-08-25

In this scientifically authoritative essay collection Salzman a seasoned and provocative environmentalist demonstrates how evolutionary theory penetrates nearly all aspects of human society She faults social justice movements for their short sighted focus on human needs to the exclusion of nonhuman nature and stresses the potential of evolutionary thought for replacing religious and secular ideologies with an ecological paradigm for broad social change Salzman's special concern is the resurgence of irrationality anti intellectualism and anti science attitudes She explodes the myth of genetic determinism

promoted in popular media discrediting the belief that natural selection involves violence In place of the arbitrary economism of socialists and the free marketeers faith in untrammelled economic growth she envisions a human society modeled on interdependent self regulating natural systems
