scholars have debated the question of whether American Indian confederacies primarily the Iroquois helped influence the formation of U S basic law The idea has sparked lively debate in the public arena as well with Canadian diplomat Durling Voyce Jones contending it shows a paradigm shift in our thinking Patrick Buchanan calling it idiocy and George Will saying it s fiction For the first time this bibliography brings together some 450 citations on the debate The work describes the debate in the words of one of its major participants Bruce E Johansen author of three other books on the subject The bibliography also takes the reader back to suggestions of the idea long before the contemporary debate Lakota author Charles Eastman brought up the subject in 1919 Mohawk teacher Ray Fadden developed it in the 1940s and John F Kennedy touched on it in 1960 Bringing the debate to its full flower in the present day the bibliography illustrates both fervent support and equally emphatic denial in the academy and the public press The book is both a scholarly tool and a lively exploration of issues bearing on the study of history and multiculturalism A History of the U.S. Political System Richard A. The Role of Institutions In Achieving Financial Stability and Sustainable Economic Development In South Sudan Addis Ababa Othow Akongdit, 2019-10-04 South Sudan is currently facing a serious economic crisis occasioned by i the oil shutdown which began at the beginning of 2012 ii the civil conflict which erupted in December 2013 iii declining international crude oil prices which went down by almost 62% from USD 104 per barrel in 2013 to USD 40 in 2016 iv drastic decline in the daily oil production as a result of partial closure of Upper Nile oil fields and v total shutdown of Unity State oil fields as a result of the war All these factors have a significant negative impact on the South Sudan s economy On the other hand South Sudan has abundant and mostly untapped natural resources It has great agricultural potential given that the country is very fertile and blessed with land water and mineral resource which are substantial in relation to the relatively small population of 10 million plus Effective management and development of these resources will therefore offer the prospect of sustained strong economic growth Hence the key research questions for this study are Why some countries experience sustained levels of steady economic growth much faster while others stagnate What can to improve the role of economic and political institutions in economic performance There is extensive evidence that institutions matter a great deal in determining the level of economic development of a country They strongly affect the economic performance of countries and act in society at all levels by determining the frameworks in which economic exchange occurs Many Economists have shown that differences in institutions as deep determinants of economic growth account for much of the differences in income and productivity per head observed between countries Acemoglu et al 2005 Institutions shape the policy and governance setting in a given country which in turn characterize the rule of law risk of expropriation political stability and ease of doing business This study ends by suggesting the most importing mechanisms to strengthen the political and economic institutions that will create public trust in the government and its institutions and lead to sustainable development and prosperity With that in mind the institutions should support the public and private sector

capability social infrastructure good governance rules of laws in order to achieve sustainable economic growth and financial stability In this context the main objectives of this study is to analyze the economic and political structure in South Sudan to ensure its role in achieving sustainable Economic Development and to analyze the effectiveness of macroeconomic policies in responding to economic shocks It is also opted to examine the structural soundness of the South Sudan economy and the efficiency of its key institutions in addressing the challenges In particular the role of a strong and healthy financial sector in weathering shocks and sustaining growth In light of the above this study focuses on the greater role institutions have played in the economic development of several East Asian countries as well as Africa Though it is argued that the institutions can be weaker and ineffective simply because of administrative institutional ethnic social and political challenges including poor enforcement of the rule of law corruption mismanagement lack of strong civil society and political interference However the strength of an institution determines whether a country will be poor or wealthy whether or not its people are free or oppressed and if its people will suffer from poverty or benefit from prosperity Therefore the main recommendations of this study can be summarized as follows developing effective accountable and transparent institutions at all levels building a variety of healthy institutions that can accelerate and spearhead growth building strong political and governmental institutions that enhance the governance reforming the institutions with an aim to move from situations of stagnation to rapid growth or a better development paths The study embraces a multi pronged methodology pursuing a combination of relevant methods and approaches of data collection including both primary and secondary information sources This study is organized as follows Chapter 1 discusses the institutions financial stability and sustainable Economic Development theoretical framework in which we explore in the empirical analysis Chapter 2 presents the historical background of institutions in South Sudan Chapter 3 focuses on institutions and financial stability where we discuss the institutional policies and approach for financial stability as well as issues of globalization transparency accountability and its impact on financial stability In chapter 4 I discuss institutions and sustainable economic growth It focuses on fundamentals and strategies of sustainable economic development and the role of good governance and institutions in long term economic growth In chapter 5 we discuss the prospects of strong institutions financial stability and sustainable Economic Development in South Sudan It discusses how efficiency and soundness of South Sudan s key institutions can be extremely valuable in process of building a sustainable economic growth and what can South Sudan learn from others countries The last chapter is the conclusions and recommendations of research The major findings of this study are as follows Conflicts affect economic outcomes mainly through the destruction of human and physical capital shifts in public spending and private investment as well as the disruption of economic activities and social life Building effective efficient and accountable institutions in fragile state like South Sudan can be problematic and challenging Most importantly good political and economic governance based on transparency and accountability should be the key for building a politically and economically viable state capable of

articulating a common vision for national unity and providing stability and dividends of peace to its aspiring citizens Strictly from economic point of view a political resolution of the current crisis is urgently needed in order for South Sudan to restore the confidence of investors put socio economic development as one of its priorities and regain its place as the world's newest investment destination Social political and economic stability in South Sudan will depend on core institutions performing their functions sufficiently well to manage public resources effectively and distribute them equitably China's Political System Sebastian Heilmann,2016-12-08 The Chinese government is one of the most important actors in international affairs today To thoroughly understand how the People's Republic of China has grown in power requires a careful analysis of its political system To what extent can China's economic achievements be attributed to the country's political system and its policies What are the effects of economic modernization and global economic integration on the Chinese polity Is the Chinese political system capable of adapting to changing economic technological social and international conditions Exploring these central questions this definitive book provides readers with a comprehensive assessment of the preconditions prospects and risks associated with China's political development The Oxford Handbook of Political Institutions R. A. W. Rhodes,Sarah A. Binder,Bert A. Luhmann on Law and Politics Michael King,Chris Thornhill,2006-02-27 Perhaps more than any other social theorist in recent history Niklas Luhmann's work has aroused extreme and often antagonistic responses It has generated controversies about its political implications its resolute anti humanism and its ambitious critique of more established definitions of society social theory and sociology Now however a steadily growing number of scholars working in many different disciplines have begun to use aspects of Luhmann's sociology as an important methodological stimulus and as a theoretical framework for reorientating their studies This collection of essays includes critical and reconstructive contributions by a number of distinguished social theorists political theorists legal scholars and empirical sociologists Together they provide evidence of Luhmann's extensive and diverse relevance to the issues facing contemporary society and at the same time they enhance our understanding of the challenges posed by his theoretical paradigm to more traditional conceptions of social theory The Future of Human History Jagmohan Dyal Singh,2014-08-12 The book is an author's understanding of the human evolution and its consequences for the world and the humans themselves and also the causes of human differences that are visible and those that are inconspicuous to the human eye those differences that according to the author are responsible for the social differences in all human societies the author tries to take a journey through the possible human past to outline the differences that arose in various human social groups and their methods of governance as he tries to understand through his mind and reasons why those differences arose the author explains the reasons of the Dark Ages and its consequences on the

development of the entire human civilization as a whole the author tries to understand the differences in various methods of governance and through historical experiences he tries to convey the superiority of one method that is well above the others for a better social development He goes through the reasons of nomadic domination on the sedentary people throughout history until the emergence of superiority of the scientific method and its implication in unifying the world into a one great democracy and why it could not be possible the author s understanding of the past is applied to his reasoning of the present world and what the future holds for the people of this planet as determined by the vision of their political leadership and the application various world political systems *Official Gazette* Philippines,2012 **Register of the University of**
