Committee on the District of Columbia, 1965 **Special Report - Highway Research Board** National Research Council (U.S.). Highway Research Board, 1961 *Applications of GPS for Surveying and Other Positioning Needs in Departments of Transportation* Robert J. Czerniak, James Patrick Reilly, National Cooperative Highway Research Program, 1998 This synthesis will be of interest to both administrative and technical personnel in departments of transportation DOTs especially in the areas of

surveying mapping transportation planning environmental impact assessment design construction control maintenance operations vehicle location and other functions that require accurate location data This report will be useful for intermodal transportation analyses and for measurement and positioning data for inventories and geographic information systems GIS It can also be useful to suppliers and developers of Global Positioning System GPS equipment This report of the Transportation Research Board presents a description of GPS the major components basic geodesy principles how GPS functions and how it can be applicable to the data and analysis requirements of transportation agencies The anticipated cost effectiveness of GPS in terms of personnel equipment and time as related to the improved accuracies to be derived from GPS applications are described Current and more advanced applications of GPS by DOTs to different transportation modes are presented The report also includes a glossary of terms and a listing of GPS information sources

Mitigation of Nighttime

Construction Noise, Vibrations, and Other Nuisances Cliff J. Schexnayder, 1999 This synthesis report describes current practice in mitigating nighttime construction nuisances such as noise vibration light and dust Roadway construction work is increasingly done at night to mediate traffic congestion however this trend also increases the potential for disturbing adjacent property owners This report will be of interest to department of transportation DOT construction design and project engineers and to those responsible for community relations This report of the Transportation Research Board stresses the importance of informing project neighbors and establishing cooperative relations with the community as a first measure of successful mitigation Examples show how project design can address construction nuisances by locating and sequencing construction operations to minimize their impact Current practices used in source control path control and receptor control are described and documented in examples from the Boston Central Artery Tunnel project and projects in Arizona and Salt Lake City Utah Appended materials provide sample specifications for mitigation of noise and dust control
