*Setting Priorities for Drinking Water Contaminants* National Research Council, Division on Earth and Life Studies, Commission on Geosciences, Environment and Resources, Committee on Drinking Water Contaminants, 1999-01-02 The provision of safe drinking water has been an important factor in the improvement of the health status of U S communities since the turn of the last century Nonetheless outbreaks of waterborne disease and incidences of chemical contamination of drinking water continue to occur Setting Priorities for Drinking Water Contaminants recommends a new process for the U S Environmental Protection Agency to use in deciding which potential drinking water contaminants should be regulated in public water supplies to provide the greatest protection against waterborne illnesses The book covers chemical and microbiological contaminants and includes a historical review of past approaches to setting priorities for drinking water contaminants and other environmental pollutants It emphasizes the need for expert judgment in this process and for a conservative approach that considers public health protection as the first priority

**Food, Energy, and Water** Satinder Ahuja, 2015-01-25 How will chemists of the future balance competing concerns of environmental stewardship and innovative cost effective product development For chemists to accept the idea

that environmental quality and economic prosperity can be intertwined the concept of the food energy water nexus must first be integrated into underlying thought processes Food Energy and Water The Chemistry Connection provides today s scientists with the background information necessary to fully understand the inextricable link between food energy and water and how this conceptual framework should form the basis for all contemporary research and development in chemistry in particular and the sciences in general Presents a clear quantitative explanation of the link between food energy and water Provides information not currently available in chemistry curricula or synthesized in existing resources Examines the challenges of the food energy water nexus from a chemistry perspective within a multi disciplinary domain Includes the latest research on critical topics such as fracking water use conflicts and sustainability in food production cycles

**Environmental Science and Engineering for the 21st Century** National Science Board (U.S.). Task Force on the Environment,2000      *Personal Care Products in the Aquatic Environment* M. Silvia Díaz-Cruz,Damià Barceló,2015-08-10 This volume offers an overview of the occurrence and distribution of personal care products in continental and marine waters presents analytical methods and degradation technologies and discusses their impact on human health Experts from different disciplines highlight major issues for each family of compounds related to their occurrence in the water column as well as in solid and biota samples methodological strategies for their analysis non conventional degradation technologies eco toxicity data and their human and environmental risk assessment The book also includes a general introduction to personal care products covering their properties use behaviour and regulatory framework and a final chapter identifying knowledge gaps and future research trends It will appeal to experts from various fields of research including analytical and environmental chemistry toxicology and environmental engineering      *Biodeterioration of Wooden Cultural Heritage* Anastasia Pournou,2020-10-27 Since prehistoric times and throughout the course of human evolution wood has been an integral part of all civilizations Wooden Cultural Heritage can be found worldwide providing valuable information on the social and economic context of human history Nonetheless as a natural cellulosic material wood shows low resistance to biodeterioration and thus wooden Cultural Heritage often fails to escape decomposition in both aquatic and terrestrial ecosystems This book provides a comprehensive overview on the biodeterioration of wooden Cultural Heritage and describes the decay mechanisms of key organisms and microorganisms encountered in aquatic and terrestrial ecosystems Cultural Heritage professionals researchers and academics may explore within this book the associations between deteriogens habitats and decay which will assist them to understand wood biodeterioration and design effective prevention mitigation and remediation strategies The book presents case studies around the world to demonstrate the impact of biogenic deterioration on wooden Cultural Heritage and illustrates mechanisms and patterns in order to be a useful handbook of decay diagnosis Lastly by adopting a holistic approach to wood decay basic concepts of wood technology ecology and deteriogens biology are introduced permitting readers of different scientific backgrounds to easily comprehend wood biodeterioration      Phosphorus

Biogeochemistry of Sub-Tropical Ecosystems K. Ramesh Reddy, George A. O'Connor, C. L. Schelske, 1999-04-29 Phosphorus is one of the major nutrients limiting the productivity of terrestrial wetland and aquatic ecosystems Over the last decade several research projects were conducted on Florida's ecosystems from state and federal agencies and private industry to address water quality issues and to develop management practices to control nutrient loads Phosphorus Biogeochemistry in Sub Tropical Ecosystems is the first thorough study of the role of phosphorus in ecological health and water quality ever published Because of its vast and extensively studied ecosystems Florida has often served as a national laboratory on current and future trends in ecosystem management The reader will find studies at all levels of biological organization from the cellular to entire ecological communities The book is a definitive study of the role and behavior of phosphorus deposition in the upland wetland aquatic environment The papers presented in this book are organized in specific groups ecological analysis and global issues biogeochemical transformations biogeochemical responses transport processes phosphorus management and synthesis Although Florida's ecosystems are used as a case study the results presented have global applications

*Handbook of Engineering Hydrology (Three-Volume Set)* Saeid Eslamian, 2018-10-03 While most books examine only the classical aspects of hydrology this three volume set covers multiple aspects of hydrology and includes contributions from experts from more than 30 countries It examines new approaches addresses growing concerns about hydrological and ecological connectivity and considers the worldwide impact of climate change

*Innovations in Ground Water and Soil Cleanup* Committee on Innovative Remediation Technologies, Commission on Geosciences, Environment and Resources, Division on Earth and Life Studies, National Research Council, 1997-11-04 Most books on ground water and soil cleanup address only the technologies themselves not why new technologies are or are not developed Innovations in Ground Water and Soil Cleanup takes a holistic approach to the entire field addressing both the sluggish commercial development of ground water and soil cleanup technologies and the attributes of specific technologies It warns that despite cleanup expenditures of nearly 10 billion a year the technologies remain rudimentary This engaging book focuses on the failure of regulatory policy to link cleanup with the financial interests of the company responsible for the contamination The committee explores why the market for remediation technology is uniquely lacking in economic drivers and why demand for innovation has been so much weaker than predicted The volume explores how to evaluate the performance of cleanup technologies from the points of view of the public regulators cleanup entrepreneurs and other stakeholders The committee discusses approaches to standardizing performance testing so that choosing a technology for a given site can be more timely and less contentious Following up on Alternatives for Ground Water Cleanup NRC 1994 this sequel presents the state of the art in the cleanup of various types of ground water and soil contaminants Strategies for making valid cost comparisons also are reviewed
