Levine,2020-01-02 Groups and organizations vary dramatically in their ability to learn Some acquire substantial knowledge as a function of experience while others do not In groups learning can occur at the level of the individual member and or the group as a whole In organizations learning can occur at both of these levels as well as that of the wider collective Besides varying in the amount and kind of information they acquire groups and organizations also vary regarding their success in retaining knowledge and transferring it to other units In general groups and organizations that are proficient in acquiring retaining and transfering knowledge are more productive and more enduring than their less able counterparts The goal of this handbook is to bring together cutting edge theoretical and empirical work on group and organizational learning by leading scholars from several disciplines Because many of the same processes influence learning in groups and organizations including both kinds of learning in the same volume has the potential to facilitate the integration of knowledge and the cross

fertilization of ideas These benefits are reciprocal in that research at the group level can shed light on how organizations learn whereas research at the organizational level can illuminate how groups learn By clarifying similarities and differences in the processes that underlie learning in groups and organizations the handbook advances understanding of the causes and consequences of learning in collectives of varying size and complexity   Speaking in a Second Language Rosa Alonso Alonso,2018-04-15 For millions of individuals all over the world speaking in a second language is a daily activity It is therefore important that research in applied linguistics should contribute empirically to the study of second language spoken interaction The aim of this volume is to make such a contribution by providing research based insights into current approaches to the teaching and learning of this skill Two key dimensions define the papers included here their novelty and scope First the book provides a novel approach to the study of speaking in a second language by combining recent findings in usage based linguistics with current issues in teaching Second the chapters cover a range of theoretical perspectives including sociolinguistic and interactional competence gestures dynamic systems theory and code switching The volume offers a contemporary analysis of research in second language speaking that will be of interest to researchers graduate students teachers and other professionals working in the fields of communication and applied linguistics
