Interpreting Epidemiologic Evidence David A. Savitz, Gregory A. Wellenius, 2016-06-30 Epidemiology the so called science of public health has undergone a boom in the last decade as public interest and engagement in population health has skyrocketed While this boom has done much to spark advances in the technology of epidemiology it has also made it harder for those who want to use epidemiology to guide policy and clinical practice to fully appreciate the meaning of the research findings Interpreting Epidemiologic Evidence offers those who have had an introductory course in epidemiology the knowledge they need to make clear connections from research findings to practical applications Written in clear and lively prose it empowers students at all levels to evaluate a study s design implementation and ultimate findings giving the guidance needed to apply the information appropriately Liberal use of practical examples serves both to illustrate core concepts and to motivate readers to think critically about the causal connections that population health studies aim to explore Completely revised and updated this new edition of Interpreting Epidemiologic Evidence is an invaluable core text for both epidemiologists in training and practitioners across other disciplines with even an introductory knowledge of epidemiology

Animal Toxins Findlay E. Russell, Paul R. Saunders, 2016-04-19 Animal Toxins is a collection of papers that tackles the advancement in studies that aim to enhance the contemporary understanding of animal toxins The materials in the text are organized according to the organism they cover The first section tackles the concerns with venomous arthropods such as the structure of the venom gland of the black widow spider *Latrodectus mactans* and the biochemical immunochemical aspects of the venom from the scorpion *Centruroides sculpturatus* Next articles about poisonous marine animals are presented which include differentiation of the poisons of fish shellfish and plankton and block of sensory nerve conduction in the cat by mussel poison and tetrodotoxin In Section III the selection reviews papers about snakes and amphibians such as epidemiological methods in studying venomous snakebites and chemistry of cytotoxic substances in amphibian toxins The book will be of great interest to toxicologists zoologists and biochemists
