Imagination Garth Lean, Russell Staiff, Emma Waterton, 2016-02-24 The imagination has long been associated with travel and tourism from the seventeenth century when the showman and his peepshow box would take the village crowd to places cities and lands through the power of stories to today when we rely on a different range of boxes to whisk us away on our imaginative travels the television the cinema and the computer Even simply the notion of travel it would seem gives us license to daydream The imagination thus becomes a key concept that blurs the boundaries between our everyday lives and the idea of travel Yet despite what appears to be a close and comfortable link there is an absence of scholarly material looking at travel and the imagination Bringing together geographers sociologists cultural researchers philosophers anthropologists visual researchers archaeologists heritage researchers literary scholars and creative writers this edited collection explores the socio cultural phenomenon of imagination and travel The volume reflects upon imagination in the context of many forms of physical and non physical travel inviting scholars to explore this fascinating yet complex area of inquiry in all of its wonderful colour slipperiness mystery and intrigue The book intends to provide a catalyst for thinking discussion research and writing with the vision of generating a cannon of scholarship on travel and the imagination that is currently absent from the literature [The Routledge Handbook on Spaces of Urban Politics](#) Kevin Ward, Andrew E. New Perspectives in Critical Data Studies Andreas Hepp, Juliane Jarke, Leif Kramp, 2022-05-20 This Open Access book examines the ambivalences of data power Firstly the

ambivalences between global infrastructures and local invisibilities challenge the grand narrative of the ephemeral nature of a global data infrastructure. They make visible local working and living conditions and the resources and arrangements required to operate and run them. Secondly, the book examines ambivalences between the state and data justice. It considers data justice in relation to state surveillance and data capitalism and reflects on the ambivalences between an entrepreneurial state and a welfare state. Thirdly, the authors discuss ambivalences of everyday practices and collective action in which civil society groups, communities and movements try to position the interests of people against the big players in the tech industry. The book includes eighteen chapters that provide new and varied perspectives on the role of data and data infrastructures in our increasingly datafied societies. *Rethinking Ethical-Political Education* Torill Strand, 2020-07-29. This book offers a variety of outlooks and perspectives on the constitutive values and formative norms of a society reflected by discourses on ethical political education. It also discusses conceptual and critical philosophical works combined with empirical studies. The book is divided into three parts: the first part describes contemporary youth's tangible experience of and reflections on ethical political issues, while the second part explores the potential powers and pitfalls of educational philosophies, old and new. The third part highlights cutting edge issues within the humanities and social sciences and examines the prospects of a fruitful rethinking of ethical political education in response to today's pressing issues. By addressing current dilemmas with diligence and insight, the authors offer solid arguments for new theoretical and practical directions to promote philosophical clarification and advance research. Intended for students, teachers and researchers, the book provides fresh perspectives on the many facets of ethical political education and as such is a valuable contribution to educational research and debate.

Pyrrhonian Skepticism Walter Sinnott-Armstrong, 2004-07-22. Throughout the history of philosophy, skepticism has posed one of the central challenges of epistemology. Opponents of skepticism, including externalists, contextualists, foundationalists and coherentists, have focussed largely on one particular variety of skepticism, often called Cartesian or Academic skepticism, which makes the radical claim that nobody can know anything. However, this version of skepticism is something of a straw man, since virtually no philosopher endorses this radical skeptical claim. The only skeptical view that has been truly held by Sextus, Montaigne, Hume, Wittgenstein and most recently Robert Fogelin, has been Pyrrhonian skepticism. Pyrrhonian skeptics do not assert Cartesian skepticism, but neither do they deny it. The Pyrrhonian skeptic's doubts run so deep that they suspend belief even about Cartesian skepticism and its denial. Nonetheless, some Pyrrhonians argue that they can still hold common beliefs of everyday life and can even claim to know some truths in an everyday way. This edited volume presents previously unpublished articles on this subject by a strikingly impressive group of philosophers who engage with both historical and contemporary versions of Pyrrhonian skepticism. Among them are Gisela Striker, Janet Broughton, Don Garrett, Ken Winkler, Hans Sluga, Ernest Sosa, Michael Williams, Barry Stroud, Robert Fogelin and Roy Sorensen. This volume is thematically unified and will interest a broad spectrum of scholars in epistemology and the history of philosophy. *Where was the Working*

Class? Linda Fuller, 1999 In six months bridging 1989 and 1990 the German Democratic Republic underwent a transformation that took the world almost completely by surprise Yet unlike the revolution in Poland a decade earlier only a small percentage of workers played a politically active role in the fall of socialism in Germany In this unprecedented study Linda Fuller sets out to explain why the working class was largely missing from the 1989-90 revolution Drawing on pre and post revolutionary visits to East German work sites and dozens of interviews Fuller documents workers day to day experience of the labor process workplace union politics and class She shows how all three factors led most workers to withdraw from politics even while prompting a handful to become actively involved in the struggle **Alfred Schutz's Sociological**

Aspect of Literature Lester Embree, 2013-03-14 The maintext in the present volume has been constructed out of passages found scattered about in thirty five years of Alfred Schutz's writings and it has been constructed by following a page of notes for a lecture that he gave in 1955 under the title Sociological Aspect of Literature The result can be considered the substance of Schutz's contribution to the theory of literature More detail about how this construction has been performed is offered in the Editor's Introduction The complementary essays are by scholars from Germany Japan and the United States from several generations and from the disciplines of anthropology philosophy and sociology These researchers were invited to reflect in their own perspectives on the main text and in relation to matters referred to within and beyond it Draft versions of most of these complementary essays were presented for critical discussion in a research symposium held at the Graduate Faculty of Political and Social Science of the New School for Social Research on April 28-29 1995 under the sponsorship of The Center for Advanced Research in Phenomenology Inc Florida Atlantic University The Department of Philosophy of The Graduate Faculty of the New School Richard I Bernstein Chair and Evelyn and George Schutz the philosopher's children Revised versions of these presentations and also several essays subsequently recruited are offered to begin yet another stage in the history of scholarship on Schutz and the phenomenological research inspired by him Northwestern University Press is thanked for permission to quote extensively from Alfred Schutz *The Phenomenology of the Social World* trans Voices from the North

Jan Ohman, 2018-05-08 While contemporary human geography has widely acknowledged that knowledge has both contingent and contextual character international literature has tended to blot out differences and reproduce hegemonic Anglo Saxon discourses Any interest in destabilizing such power knowledge systems calls upon interventions from other voices Nordic voices in particular have not been well represented in current human geography This book redresses the balance by offering a unique assessment of the geographical research being undertaken in the Nordic countries and by demonstrating the way in which these voices contribute to international debate It brings together a range of Nordic authors each of whom has made a significant contribution to such debates and considers the relationship between production and social institutions in local development It also examines the ambiguous role of the welfare state in the Nordic countries issues of social practice and identity and their relationship to spatiality new approaches to landscape and environment and the significance of difference

and relations of power Theoretical discussion illustrated by empirical examples reveals the interweaving in Nordic human geography of international affiliations and Nordic situatedness Participation in Health and Welfare Services Arne H. Multistable Figures Christoph F. E. Holzhey, 2014-02-14 Multistable figures offer an intriguing model for arbitrating conflicting positions Moving back and forth between different aspects one recognizes that contradictory descriptions of a situation can be equally valid and that disputes over the correct account can be settled without dissolving differences or establishing a higher synthesis Yet the experience of a gestalt switch also offers a model for radical conversions and revolutions that is for irreversible leaps to incommensurable alternatives foiling ideals of rational choice while providing the possibility and necessity of decision Accentuating the temporal dimensions of multistable figures this multidisciplinary volume illuminates the critical potential and limits of multistability as a complex figure of thought **The Oxford Handbook of Continental Philosophy** Brian Leiter, Michael Rosen, 2009-10-22 The Oxford Handbooks series is a major new initiative in academic publishing Each volume offers an authoritative and up to date survey of original research in a particular subject area Specially commissioned essays from leading figures in the discipline give critical examinations of the progress and direction of debates Oxford Handbooks provide scholars and graduate students with compelling new perspectives upon a wide range of subjects in the humanities and social sciences The Oxford Handbook of Continental Philosophy is the definitive guide to the major themes of the continental European tradition in philosophy in the nineteenth and twentieth centuries Brian Leiter and Michael Rosen have assembled a stellar group of contributors who provide a thematic treatment of continental philosophy treating its subject matter philosophically and not simply as a series of museum pieces from the history of ideas The scope of the volume is broad with discussions covering a wide range of philosophical movements including German Idealism existentialism phenomenology Marxism postmodernism and critical theory as well as thinkers like Hegel Marx Nietzsche Freud Heidegger and Foucault This Handbook will be an essential reference point for graduate students and professional academics working on continental philosophy as well as those with an interest in
