Everyday Problem Solving:

Handbook of Adult Development and Learning Carol Hoare, 2006-03-30 Adult development and learning have always existed as two separate fields of study with development falling under psychology and learning under education. Recent advances in theory, research, and practice, however, have made it clear that an important reciprocal relationship exists between them. Advances in development frequently lead to learning, and conversely, learning quite often fuels development. The synchronicity between development and learning is responsible for positive changes in many capacities, including insight, intelligence, reflective and meta-cognition, personality expression, interpersonal competence, and self-efficacy. This synchronicity is also leading to the growth of a new discipline at the borders of adult development and learning. The Handbook of Adult Development and Learning is the first to bring together the leading scholars from both adult development and learning to explore what will form the foundation for this new discipline, the latest research at the intersection of these fields. It examines six major aspects of their intersection: foundations, key areas of integration, the self-system, higher reaches of development and learning, essential contexts, and specific applications. An introductory chapter explains why it is so important to recognize and fuel the growth of this new discipline. Subsequent chapters review the latest theoretical and empirical literature and provide a rich itinerary for future research. This handbook is a must-read for all who promote optimal aging. It will be an invaluable reference for scholars in development and education, as well as a rich resource for policy makers and practitioners such as corporate executives and human resource personnel.

The Oxford Handbook of Emotion, Social Cognition, and Problem Solving in Adulthood Paul Verhaeghen, Christopher Hertzog, 2016-03-09 Over the last decade, the field of socio-emotional development and aging has rapidly expanded with many new theories and empirical findings emerging. This trend is consistent with the broader movement in psychology to consider social, motivational, and emotional influences on cognition and behavior. The Oxford Handbook of Emotion, Social Cognition, and Problem Solving in Adulthood provides the first overview of a new field of adult development that has emerged out of conceptualizations and research at the intersections between socio-emotional development, social cognition, emotion coping, and everyday problem solving. This field roundly rejects a universal deficit model of aging, highlighting instead the dynamic nature of socio-emotional development and the differentiation of individual trajectories of development as a function of variation in contextual and experiential influences. It emphasizes the need for a cross-level examination from biology and neuroscience to cognitive and social psychology of the determinants of emotional and socio-emotional behavior. This volume also serves as a tribute to the late Freda Blanchard Fields, whose thinking and empirical research contributed extensively to a life-span developmental view of emotion, problem solving, and social cognition. Its chapters cover multiple aspects of adulthood and aging, presenting developmental perspectives on emotion, antecedents and consequences of emotion in context, everyday problem solving, social cognition, goals and goal-related behaviors, and wisdom. The landmark volume in this new field. The

Gender, Digitalization, and Resilience in International Development Julia Bello-Bravo, John William Medendorp, Anne Namatsi Lutomia, Barry Robert Pittendrigh, 2023-09-07. This book explores the intersection of gender, digitalization, and resilience in international development. Building resilience is increasingly seen as crucial when planning and implementing development programmes, enabling communities to mitigate, adapt to, and recover from shocks and stresses in a manner that reduces chronic vulnerability and facilitates inclusive growth. Gender plays a crucial role in the resilience of development systems, as the exclusion of women from participation can make communities more vulnerable to economic shocks, perpetuating and even worsening current levels of poverty, instability, and insecurity. Drawing on meta-data from across the world, as well as specific case studies from Ghana, Kenya, Burkina Faso, and Mozambique, this book reflects on these intersections and the potential of digitalization as a democratizing tool for improving the access of women and other marginalized groups to information vital for their participation in the process of development. By outlining the importance of digitalization for addressing gender imbalances, this book draws the evidentiary lines between the role of digitalization for women and resilience as a whole. This book will be of interest to development practitioners and policy makers, as well as researchers with specialisms in gender, inclusion, resilience, digitalization, and international development.
