The Social Psychology of Stigma Todd F. Heatherton, 2003-07-16 The volume demonstrates that stigma is a normal albeit undesirable consequence of people's limited cognitive resources and of the social information and experiences to which they are exposed. Incorporated are the perspectives of both the perceiver and the target, the relevance of personal and collective identities and the interplay of affective cognitive and behavioral processes. Particular attention is given to how stigmatized persons make meaning of their predicaments such as by forming alternative positive group identities.

Disability and Rurality Karen Soldatic, Kelley Johnson, 2017-04-21 This is the first book to explore how far disability challenges dominant understandings of rurality, identity, gender, and belonging within the rural literature. The book focuses particularly on the ways disabled people give and are given meaning and value in relation to ethical rural considerations of place, physical strength, productivity, and social reciprocity. A range of different perspectives to the issues of living rurally with a disability inform this work. It includes the lived experience of people with disabilities through the use of life history methodologies, rich qualitative accounts, and theoretical perspectives. It goes beyond conventional notions of rurality, grounding its analysis in a range of disability spaces and places and including the work of disability sociologists, geographers, cultural theorists, and policy analysts. This interdisciplinary focus reveals the contradictory and competing relations of rurality for disabled people and the resultant impacts and effects upon disabled people and their communities, materially, discursively, and symbolically. Of interest to all scholars of disability, rural studies, social work, and welfare, this book provides a critical intervention into the growing scholarship of rurality that has bypassed the pivotal role of disability in understanding the lived experience of rural landscapes.

Cureton, Thomas E. Hill Jr., 2018-07-18 Everyone is disabled in some respect at least in the sense that others can do things

that we cannot But significant limitations on pursuing major life activities due to severely limited eyesight hearing mobility cognitive functioning and so on pose special problems that fortunately have been recognized to some extent in our public policies Public policy is important as are the deliberative frameworks that we use to justify them and the essays in the second and third sections of this volume have significant implications for public policy and offer new proposals for justifying frameworks Underlying public policies and their assessment however are the attitudes good and bad that we bring to them and our attitudes as well deeply affect our interpersonal relationships The essays here especially in the first section reveal how complex and problematic our attitudes towards persons with disabilities are when we are in relationships with them as care givers friends family members or briefly encountered strangers Our attitudes towards ourselves as persons with or without disabilities are implicated in these discussions as well Among the special highlights of this volume are its focus on moral attitudes and relationships involving disabilities and its contributors recognition of the multi faceted nature of disability problems The importance of respect for persons as a necessary complement to beneficence is an underlying theme and a deeper understanding of respect is made possible by considering closely its implications for relationships with persons with disabilities Awareness of the common and uncommon human vulnerabilities also makes clear the need for modifying traditional deliberative frameworks for assessing policies and several essays make constructive proposals for the changes that are needed
