More than 150 visual timelines take you on unforgettable journeys through the lives of the great, the terrible, and the overlooked people of world history. Following on from the smash hit *Timelines of Everything*, this fascinating new children's book focuses squarely on the biographies of a myriad of movers and shakers across millennia. Did you know that West African ruler Mansa Musa was the richest person ever to have lived? Or that Hollywood screen legend Hedy Lamarr invented the technology that would one day develop into WiFi? Or how about the fact that Einstein's last words were lost because his nurse didn't speak German? Filled with easy-to-understand timelines, vibrant illustrations, and a diverse range of influential people, *Timelines of Everyone* is the must-have guide to the world's must-know names.

Elements of Positional Evaluation Dan Heisman, 2010-08-26 Which side stands better? How much better? Why? Most chess players rely on loosely knit unstructured methods to evaluate chess pieces and positions. They learn positional principles which often lead to inaccurate evaluations and faulty decisions about how to proceed. This groundbreaking book by best-selling chess author Dan Heisman addresses the evaluation and understanding of how static features affect the value of the pieces in a given position. Emphasis is placed on the static evaluation of each piece's value and its role in the overall position rather than the assessment of a specific position, but Heisman's approach can also be applied to help evaluate entire positions by helping to answer the questions: who stands better, by how much, and why.

We also discuss electronic equipment that is used to destroy various documents as well as both human and automated processes used to reconstruct small shreds of paper. We discuss real cases regarding document reconstruction such as the American Embassy in Iran and the recently discovered East German secret police Stasi shredded records. We also discuss the Hanssen spying case using a PDA and low tech techniques such as the dead drop. Lastly, Jeff Marsh, a brilliant man who became disabled due to an unfortunate accident, demonstrates with the help of Dr. Doherty various devices such as clocks and mustard jars with concealed purposes that may be used by undercover surveillance professionals or private investigators in a variety of settings once proper approval is given. Jeff also discusses recreation and conversation as a means of exercising our intellect and informally learning from other people.
