because the value that underlies them both is respect and respect takes no compromise Thus in the search for truth as in the search for justice a body of evidence that imposes a statistical compromise will not do Only evidence that in principle allows reaching the truth and doing justice is good evidence Once such evidence has been traced the burden is on us to make good use of the evidence and reach truth and justice We might or might not succeed but once we have done our best on evidence that allows success our judgements are justified and as such they can resolve conflicts over the truth and over justice
