Evil Inheritance Possession Of Young:

Evil Inheritance Andrew Savoy, 2005-08-01 At 16 Danny Tillman's life was just starting to get back on track when his best friend Allie committed suicide. After her death, he begins having vivid dreams. He's certain that the dreams are no doubt born of his guilt over Allie until the morning he awakens to discover that his dream of a man murdered on a snow-covered road is all too real.

The Child in Primitive Society Nathan Miller, 2024-07-31 First published in 1928, *The Child in Primitive Society* examines the place of the child in the history of the less developed societies, reaching back as close to social origins as is possible. The purpose here is not to enquire into the inner processes of learning, habit formation, and acculturation in the child himself, but our aim is rather to examine the social milieu as it impinges upon the child, in other words, the customs and institutions which emerge as the educational systems of society later in the course of development. The purpose is to delineate the gradual trimming or fashioning of a child's social existence by these social forces. The book discusses various important themes such as primitive notions of the child, the burden of children, the desire for children, infancy and childhood, primitive education, and inheritance and succession. This book is an important historical reference for scholars and researchers of sociology and education.

Extraction: Ecologies and the Literature of the Long Exhaustion Elizabeth Carolyn Miller, 2021-10-12 How literature of the British imperial world contended with the social and environmental consequences of industrial mining. The 1830s to the 1930s saw the rise of large-scale industrial mining in the British imperial world. Elizabeth Carolyn Miller examines how literature of this era reckoned with a new vision of civilization where humans are dependent on finite nonrenewable stores of earthly resources and traces how the threatening horizon of resource exhaustion worked its way into narrative form. Britain was the first nation to transition to industry based on fossil fuels, which put its novelists and other writers in the remarkable position of mediating the emergence of extraction-based life. Miller looks at works like *Hard Times*, *The Mill on the Floss*, and *Sons and Lovers*, showing how the provincial realist novel's longstanding reliance on marriage and inheritance plots transforms against the backdrop of exhaustion to withhold the promise of reproductive futurity. She explores how adventure stories like *Treasure Island* and *Heart of Darkness* reorient fictional space toward the resource frontier. And she shows how utopian and fantasy works like *Sultana's Dream*, *The Time Machine*, and *The Hobbit* offer imaginative ways of envisioning energy beyond extractivism. This illuminating book reveals how an era marked by violent mineral resource rushes gave rise to literary forms and genres that extend extractivism as a mode of environmental understanding.
