

A grayscale photograph of a misty landscape. In the foreground, several small wooden boats are moored on a calm body of water, their forms reflected in the still surface. In the background, a range of mountains is visible, partially shrouded in mist or fog. The overall atmosphere is quiet and somewhat somber.

What is at stake is the freedom to investigate, debate,
and express ideas that run counter to the interests of
corporations and their political allies. Attacks on this
basic freedom hide behind the guise of transparency
but, in reality, are a step toward tyranny.

The Ethics of Technology Martin Peterson, 2017 In this analytically oriented work Peterson articulates and defends five moral principles for addressing ethical issues related to new and existing technologies the cost benefit principle the precautionary principle the sustainability principle the autonomy principle and the fairness principle Looking and Listening Petunia Rose, 2023-08-09 For many years I've known that I was meant to write this book I didn't know the exact reason but I knew that I was meant to tell the story of the asbestos in the cooling towers the importance of righteous leaders and my experiences with the signs and wonders of God Then on June 19 2021 the purpose of this book evolved when God in His Triune Being confirmed to me that yes indeed I was meant to write this book God gave me many prophetic words to include in this book God's Word given to me on 6/21/2021 It is time to enact and react to the changing of the times These are the days of the LORD your God You are to follow my ways and not the ways of the enemy It should be clear for all to see what is going on in the natural world around you When leaders provide wrongdoing and no one is showing outrage that is outrageous Grievous actions have taken place all around this great country and it is time for what has transpired in the past and what is being allowed to currently happen to be revealed and dismantled and those held to justice Gewirth Michael Boylan, 1999 As one of the most important ethicists to emerge since the Second World War Alan Gewirth continues to influence philosophical debates concerning morality In this ground breaking book Gewirth's neo Kantianism and the communitarian problems discussed form a dialogue on the foundation of moral theory Themes of agent centered constraints the formal structure of theories and the relationship between freedom and duty are examined along with such new perspectives as feminism the Stoics and Sartre Gewirth offers a picture of the philosopher's theory and its applications providing a richer more complete critical assessment than any which has occurred to date Redesigning Distribution Anne Alstott, Bruce Ackerman, Philippe Van Parijs, 2020-05-05 Volume V in the acclaimed Real Utopias Project series edited by Erik Olin Wright Are there ways that contemporary capitalism can be rendered a dramatically more egalitarian economic system without destroying its productivity and capacity for growth This book explores two proposals unconditional basic income and stakeholder grants that attempt just that In a system of basic income as elaborated by Philippe van Parijs all citizens are given a monthly stipend sufficient to provide them with a no frills but adequate standard of living This monthly income is universal rather than means tested and it is unconditional receiving the basic income does not depend upon performing any labor services or satisfying other conditions It affirms the idea that as a matter of basic rights no one should live in poverty in an affluent society In a system of stakeholder grants as discussed by Bruce Ackerman and Anne Alstott all citizens upon reaching the age of early adulthood receive a substantial one time lump sum grant sufficiently large so that all young adults would be significant wealth holders Ackerman and Alstott propose that this grant be in the vicinity of 80 000 and be financed by an annual wealth tax of roughly 2 percent A system of stakeholder grants they argue expresses a
