Fresh Map Of Life:

A Fresh Map of Life Peter Laslett, 1991 Today as never before most people in the developed world at least can expect to live to old age How has society reacted to this shift of mortality Much of the accepted account of ageing is simply the persistence into our own time of past perceptions Laslett argues that the Third Age beyond the breadwinning and child rearing years is that of greatest personal fulfilment the apogee of life Combining social history sociology and philosophy this book provokes new thinking on one of the crucial changes in the modern world

Elderhood Louise Aronson, 2019-06-11 Finalist for the Pulitzer Prize in General Nonfiction A New York Times Bestseller Longlisted for the Andrew Carnegie Medal for Excellence in Nonfiction Winner of the WSU AOS Bonner Book Award Winner of the 2022 At Home With Growing Older Impact Award As revelatory as Atul Gawande's *Being Mortal* physician and award winning author Louise Aronson's *Elderhood* is an essential empathetic look at a vital but often disparaged stage of life For more than 5 000 years old has been defined as beginning between the ages of 60 and 70 That means most people alive today will spend more years in elderhood than in childhood and many will be elders for 40 years or more Yet at the very moment that humans are living longer than ever before we've made old age into a disease a condition to be dreaded denigrated neglected and denied Reminiscent of Oliver Sacks noted Harvard trained geriatrician Louise Aronson uses stories from her quarter century of caring for patients and draws from history science literature popular culture and her own life to weave a vision of old age that's neither nightmare nor utopian fantasy a vision full of joy wonder frustration outrage and hope about aging medicine and humanity itself *Elderhood* is for anyone who is in the author's own words an aging i.e. still breathing human being
