Freud And Original Sin:

Freud and Original Sin Sharon MacIsaac, 1974 Freud and Original Sin Sharon MacIsaac, 1974 Sigmund Freud's Christian Unconscious Paul C. Vitz, 1993 Vitz psychoanalyzes Freud's motivation to reject religion **Psychology** and Religion Andrew Reid Fuller, 2008 This book surveys the major theoretical positions in the psychology of religion William James Sigmund Freud Carl Jung Gordon Allport Abraham Maslow Erich Fromm Alan Watts and Viktor Frankl are each accorded an entire chapter A chapter is devoted to such further developments in the field as the investigation of the God image by object relations theorists and the empirical scaling of religiousness In this new edition three additional chapters consider in turn the feminist psychology of religion neuroscience and religion and the evolutionary psychology of religion This book thus seen as both wide ranging and current offers illuminating and in depth coverage of major theorists and approaches While its breadth makes it an excellent place to begin an exploration of the psychology of religion its depth and detail provide the opportunity for a serious and rewarding immersion in the field The World of Perversion James Penney, 2012-02-01 In The World of Perversion James Penney argues that antihomophobic criticism has nothing to lose and indeed everything to gain by reclaiming the psychoanalytic concept of perversion as psychic structure Analyzing the antagonism between psychoanalytic approaches to perversion and those inspired by the work of Michel Foucault Penney explores how different assumptions about sexuality have determined the development of contemporary queer theory and how the universalizing approach to homosexuality in psychoanalysis actually leads to more useful political strategies for nonheterosexual subjects Having established this theoretical context Penney focuses on works by Georges Bataille Blaise Pascal Denis Diderot and Jacques Lacan tracing the implications of various sexual and moral understandings of the term perversion and illustrating how a psychoanalytic approach to the question of perversion enables politicized readings that are foreclosed by a Foucauldian methodology Hermeneutics and the Psychoanalysis of Religion Stephen J. Costello, 2010 This book is a philosophical study of the Freudian psychoanalysis of religion from a hermeneutical perspective Drawing on the work of Paul Ricoeur the twentieth century French phenomenologist the author offers a sustained and rigorous reflection on Freud's critique of Christian religion and raises the pertinent question of whether psychoanalysis should be conceived of as a form of hermeneutics To this end the author details the often acrimonious debates and discussions that took place between Ricoeur and Jacques Lacan as well as drawing on the work of Slavoj Zizek on this intriguing subject with Lacan and Zizek resisting any attempt to interpret psychoanalysis along the lines of hermeneutics Having brought Ricoeur's reflections to bear on both Freud and Lacan the author next engages with the Thomist metaphysical tradition He deals especially with Aquinas famous five arguments for the existence of God the relevance of which becomes apparent in the last chapter when the author sheds a Lacanian light on Thomas mystical experience The author argues that the real God the God of Thomas experience pertains to the Lacanian order of the Real The book concludes with a pr cis on the beauty of belief The Heart

of Man's Destiny Herman Westerink, 2012-08-06 Can Luther's writings inform us on the fundamental questions of Freudian psychoanalysis Does an intellectual filiation between early Reformation thought and psychoanalysis exist Does Lacanian psychoanalysis offer an instrument for analysing theological writings In The Heart of Man's Destiny Herman Westerink offers a new reading of Lacan's seventh seminar The Ethics of Psychoanalysis Working from an innovative perspective this book explores the close relationship between Freudian psychoanalysis and the ideas of the early Reformation Lacan claimed that to be unaware of the connection between Freud and early Reformation constituted a fundamental misunderstanding of the kind of problems psychoanalysis addresses Westerink carefully explores these problems and shows that Lacanian psychoanalysis with its emphasis on desire and law transgression and symbolization draws on fundamental ideas first formulated in the writings of Luther and Calvin By relating psychoanalysis to early Reformation thought Westerink not only shows Lacan's writings in a completely new light but also makes possible an innovative reading of early modern theology itself The Heart of Man's Destiny breaks new ground by providing both a controversial as well as a fresh perspective on both Luther and Calvin and on Freudo Lacanian psychoanalysis This valuable contribution to the complex character of psychoanalysis will be of interest to analysts and psychotherapists as well academics and postgraduates with an interest in theology philosophy and ethics Terror and Civilization S. Drury, 2004-01-16 Drury regards the political problems of the modern world to be thoroughly Biblical In the politics of the Twenty first century we find two equally arrogant and self righteous civilizations confronting one another Each is convinced that it is on the side of God truth and justice while its enemy is allied with Satan wickedness and barbarism The language of diplomacy and compromise has been replaced by the language of jihad or the struggle against the cosmic forces of evil Life is radicalized and all choices are polarized Politics properly understood is eclipsed Drury urges us to transcend the Biblical view of the world Instead she argues in favour of a genuinely liberal secular and pluralistic understanding of politics Psychology and Religion Andrew R. Fuller, 2007-11-27 This book articulates a broad range of theoretical viewpoints both classical and contemporary in the field of the psychology of religion Chapters One through Eight are overviews of such classical theorists as William James Sigmund Freud Carl Jung Gordon Allport Abraham Maslow Alan Watts Erich Fromm and Viktor Frankl Chapters Nine through Twelve consider subsequent developments in the field e g the views of object relations theorists on the God image empirical research on the scaling of religiousness and modern consciousness research Chapters Ten through Twelve are new to this edition and comprise an eclectic overview of the feminist psychology of religion recent developments in the intersection of neuroscience and religion and the evolutionary psychology of religion Both wide ranging and current therefore this book offers illuminating and in depth coverage of major theorists and approaches While its breadth makes it an excellent place to begin an exploration of the psychology of religion its depth and detail provide the opportunity for a serious and rewarding immersion **Society and the Unconscious** Dieter Sandner,2022-10-05 This book will interest anyone seeking a in the field

comprehensive understanding of the psychological relationship between individual psychological dynamics social structure and the unconscious collective paradigms It focuses on an analysis of patriarchal culture which is as it were the psychological enclosure in which all individual and collective processes take place Starting from the genesis and current structure of this culture the strong social changes of the last 50 years are examined the change in relations between men and women social relations in terms of solidarity and desolidarisation the situation of social security the social and political power relations and the economic dynamics At the same time collective fantasies are elaborated that emerge from the socio structural changes The basis of the study is psychoanalytical cultural theory in the form of a cultural critical deconstruction of its fundamental assumptions In 16 interesting chapters essential questions of psychological cultural theory are answered and practical applications of this theory to current sociostructural processes are shown John Huston's Filmmaking Lesley Brill,1997-10-13 John Huston's Filmmaking offers an analysis of the life and work of one of the greatest American independent filmmakers Always visually exciting Huston's films sensitively portray humankind in all its incarnations chronicling the attempts by protagonists to conceive and articulate their identities Fundamental questions of selfhood happiness and love are intimately connected to the idea of home which for the filmmaker also signified a congenial place among other people in the world In this study Lesley Brill shows Huston's films to be far more than formulaic adventures of masculine failure arguing instead that they demonstrate the close connection between humanity the natural world and Freud's Converts Vicki Clifford, 2020-06-16 This work is an exploration of the relationship which psychotherapy divinity has with religion Sigmund Freud and Carl Rogers were chosen for this exposition because they were each seduced by the high status given to science Freud and Rogers both founders of psychotherapies left a legacy which is not that of scientists whom they claimed they were Freud and Rogers each had a problematic relationship with religion This has had a lasting effect on the work and attitudes of their respective followers In order to explore effectively this relationship the work begins with a critical examination of the historical context in which both Freud and Rogers worked and how in their determination to be scientists both missed the importance of the religious The work continues with an exploration of the effects of this legacy on the work of contemporary psychotherapists The context in which their followers work relies on a relationship with the founder which goes beyond that of science and in addition each practitioner is influenced by socio economic circumstances which are peculiar to them The resistance from psychotherapists to embrace religion has been complex although as it will be illustrated today there are some who are acknowledging the importance of the spiritual That psychotherapy functions as a religious movement has been excluded by practitioners in their determination to reflect the wishes of their founder which was that their work should be regarded as science Psychotherapists have traditionally been considered the custodians of the real and that their clients are the ones suffering from delusions With respect to their attitudes to religion not least the spiritual the positions seem to be reversed Reinhold Niebuhr and Psychology Terry D.

Cooper, 2009 Reinhold Niebuhr's analysis of the human condition inevitably led him into a dialogue with psychology This book brings Niebuhr into dialogue with Freud Horney Rogers Kohut Jung and other key psychological thinkers It argues that Niebuhr was both an astute critic of some forms of psychology and a great contributor to the human sciences **Civilization** Robert A. Paul, 1996-01-01 And he details the way Freud's myth corresponds to the unconscious fantasy structure of the obsessional personality a style of personality dynamics Paul sees as essential to maintaining the bureaucratic institutions that comprise Western civilization s most distinctive features The Sign of the Cross Daniel Rancour-Laferriere, 2017-09-08 This book presents a unique effort to create a new understanding of the Christian sign of the cross At its core it traces the conscious and unconscious influence of this visual symbol through time What began as the crucifixion of a Jewish troublemaker in Roman occupied Judea in the first century eventually gave rise to a broad spectrum of readings of the instrument used to accomplish such a punishment a cross The author argues that Jesus was a provocative grandiose masochist whose suffering and death initially signified redemption for believers This idea gradually morphed into a Christian sense of freedom to persecute and wage war against non believers however as can be seen in the Crusades wars of the cross Many believers even construed the murder of their savior as a crime perpetrated by the Jews and this paranoid notion culminated in the mass murder of European Jews under the sign of the Nazi hooked cross Hakenkreuz Rancour Laferriere's book is expertly written and argued it will be readable to a large audience because it touches on many areas of controversy interest and scholarship The work is critical but not unfair it employs psychoanalysis art history the study of the symbol of the cross in works of art religion and religious texts and world history generally. The interweaving of these various themes is what gives this work its ability to draw in readers and will ultimately be what keeps the reader interested through the conclusion Lacan's Ethics and Nietzsche's Critique of Platonism Tim Themi, 2014-05-01 Brings Lacan and Nietzsche together as part of a common effort to rethink the tradition of Western ethics Bringing together Jacques Lacan and Friedrich Nietzsche Tim Themi focuses on their conceptions of ethics and on their accounts of the history of ethical thinking in the Western tradition Nietzsche blames Plato for setting in motion a degenerative process that turned ethics away from nature the body and its senses and thus eventually against our capacities for reason science and a creative flourishing life Dismissing Plato's Supreme Good as a mirage Lacan is very much in sympathy with Nietzsche's reading Following this premise Themi shows how Lacan's ethics might build on Nietzsche's work thus contributing to our understanding of Nietzsche and also how Nietzsche s critique can strengthen our understanding of Lacan From the Words of my Mouth (Psychology Revivals) Laurence Spurling, 2014-06-17 As a psychotherapist in whose name do I speak How can I come to speak in my own name What does tradition mean in psychotherapy Originally published in 1993 the contributors to this book all practising psychotherapists and teachers explore these questions and investigate how theories and practices are passed on from one generation to the next Their responses range over questions of training and indoctrination the idea of tradition

in the thought of Freud Jung and Winnicott and the implications of these questions for the practice of psychotherapy It will be of special interest to psychotherapists and counsellors as well as students and teachers of therapy With its emphasis on how psychotherapy might gain by seeing its connections to other traditions such as literature philosophy and the creative arts the book will also appeal to a wider readership Towards a Christian Literary Theory L. Ferretter, 2002-12-17 Most modern literary theory is explicitly anti-theological This book states the case for a contemporary literary theory whose principles derive from Christian theology Ferretter argues that it remains rationally and ethically legitimate to use theological language in literary theory despite the objections to such a theory posed by deconstruction Marxism and psychoanalysis He concludes with an assessment of how such a theory can be formulated and used in contemporary cultural States Without Nations Jacqueline Stevens, 2009 As citizens we hold certain truths to be self evident that the rights to own land marry inherit property and especially to assume birthright citizenship should be guaranteed by the state The laws promoting these rights appear not only to preserve our liberty but to guarantee society remains just Yet considering how much violence and inequality results from these legal mandates Jacqueline Stevens asks whether we might be making the wrong assumptions Would a world without such laws be more just Arguing that the core laws of the nation state are more about a fear of death than a desire for freedom Jacqueline Stevens imagines a world in which birthright citizenship family inheritance state sanctioned marriage and private land ownership are eliminated Would chaos be the result Drawing on political theory and history and incorporating contemporary social and economic data she brilliantly critiques our sentimental attachments to birthright citizenship inheritance and marriage and highlights their harmful outcomes including war global apartheid destitution family misery and environmental damage It might be hard to imagine countries without the rules of membership and ownership that have come to define them but as Stevens shows conjuring new ways of reconciling our laws with the condition of mortality reveals the flaws of our present institutions and inspires hope for moving beyond them

The Party of Eros Richard King,2017-11-01 In this provocative study the author treats Goodman Marcuse and Brown as the three most important radical social theorists in America since the end of World War II His reasoned conclusions will attract anyone interested in the nonpolitical background of today s radical social thought Originally published 1972 A UNC Press Enduring Edition UNC Press Enduring Editions use the latest in digital technology to make available again books from our distinguished backlist that were previously out of print These editions are published unaltered from the original and are presented in affordable paperback formats bringing readers both historical and cultural value
