Introduction To Comparative Philosophy:

An Introduction to Comparative Philosophy Walter Benesch, 1997-01-31 This original and accessible text is more than an introduction to comparative philosophy in the East and West It is also a guide to philosophizing as a thinking process In addition to outlining the presuppositions of different traditions it discusses their methods and techniques for reasoning in what the author calls four dimensions of philosophical space object subject the situational and the aspective perspective dimension

Introduction to Comparative Philosophy P. T. Raju, 2007-01-01 This classic comparative study of the world's three great philosophies Western including Jewish Indian and Chinese surveys the three philosophical traditions from their beginnings to the present time However in examining the traditions Professor Raju has been less occupied with separate doctrines and individual thinkers than with essential characteristics and general trends He has analyzed and compared these features within the traditions and explored the parallels and divergences among them For the general interested reader the interchange among the philosophies will be especially valuable For the students of religion and of philosophy the work is a standard guide and reference work

Within the Four Seas-- Ulrich Libbrecht, 2007 Our world has evolved in such a way that we can no longer reduce it to just a market it has also become an agora where philosophers exchange world views in order to understand one another Europe has lost its position at the centre of the world and should stop pretending it holds the one true religion philosophy economy and science Instead we should turn our attention to fulfilling the dream of Erasmus reflected in his statement I wish to be a citizen of the world First and foremost we should learn to play fair when comparing different cultures and not rely on exclusively western criteria This book explains how a comparative model based on the paradigm free axes of energy and information accommodates the current world views of Taoism Buddhism and Rationalism representing Chinese Indian and Western heritages respectively and shows how science and religion interrelate within such a global framework

Migrating Texts and Traditions

William Sweet,2012-12-15 Examining the phenomenon of the migration of philosophical texts and traditions between cultures

Toward a New Art of Border Crossing Ananta Kumar Giri,Arnab Roy Chowdhury,David Blake Willis,2024-11-05

Boundaries borders and margins are related concepts and realities and each of these can be conceptualized and organized in closed or open ways with degrees of closure or openness The logics of stasis and closure as well as cults of exclusivist and exclusionary sovereignty are reflected and embodied in the closed xenophobic conceptualization and organization of boundaries borders and margins But an open conceptualization of the borderlands where mixing and hybridity take place at a rapid even dizzying pace gives rise to Creolization at the threshold of sovereignties which can also be imagined At present our border zones are spaces of anxiety ridden security arrangements violence and death The existing politics of boundary maintenance is wedded to a cult of sovereignty at various levels which produces bare lives bodies and lands We need the new art of border crossing to be defined by the notion of camaraderie and shared sovereignties and non sovereignties Border zones can also be zones of meetings communication transcendence and festive celebration of the limits of our identities Thus we need a new art and politics of boundary transmutation transformation and transcendence in the broadest possible sense that entails the production of spatial scalar somatic cognitive affective and spiritual transitions
