**Everyday Cryptography** Keith Martin, 2017-06-22 Cryptography is a vital technology that underpins the security of information in computer networks This book presents a comprehensive introduction to the role that cryptography plays in providing information security for everyday technologies such as the Internet mobile phones Wi Fi networks payment cards Tor and Bitcoin This book is intended to be introductory self contained and widely accessible It is suitable as a first read on cryptography Almost no prior knowledge of mathematics is required since the book deliberately avoids the details of the mathematics techniques underpinning cryptographic mechanisms Instead our focus will be on what a normal user or practitioner of information

security needs to know about cryptography in order to understand the design and use of everyday cryptographic applications By focusing on the fundamental principles of modern cryptography rather than the technical details of current cryptographic technology the main part this book is relatively timeless and illustrates the application of these principles by considering a number of contemporary applications of cryptography Following the revelations of former NSA contractor Edward Snowden the book considers the wider societal impact of use of cryptography and strategies for addressing this A reader of this book will not only be able to understand the everyday use of cryptography but also be able to interpret future developments in this fascinating and crucially important area of technology      Cryptography and Coding Michael Walker,2003-07-31      **Coding**

**Coding, Cryptography and Combinatorics** Keqin Feng, Harald Niederreiter, Chaoping Xing, 2012-12-06 It has long been recognized that there are fascinating connections between coding theory cryptology and combinatorics Therefore it seemed desirable to us to organize a conference that brings together experts from these three areas for a fruitful exchange of ideas We decided on a venue in the Huang Shan Yellow Mountain region one of the most scenic areas of China so as to provide the additional inducement of an attractive location The conference was planned for June 2003 with the official title Workshop on Coding Cryptography and Combinatorics CCC 2003 Those who are familiar with events in East Asia in the first half of 2003 can guess what happened in the end namely the conference had to be cancelled in the interest of the health of the participants The SARS epidemic posed too serious a threat At the time of the cancellation the organization of the conference was at an advanced stage all invited speakers had been selected and all abstracts of contributed talks had been screened by the program committee Thus it was decided to call on all invited speakers and presenters of accepted contributed talks to submit their manuscripts for publication in the present volume Altogether 39 submissions were received and subjected to another round of refereeing After careful scrutiny 28 papers were accepted for publication
