The Revealing Image Joy Schaverien, 2021-11-18 Schaverien painstakingly describes and defines processes which have so far only been intuitively known to art therapists p6 by introducing and elaborating the psychoanalytical concepts of transference and countertransference in relation to the use of visual art objects The authors stated intention in this book is to attempt to bridge the perceived gap between the practice of art therapy and analytical forms of psychotherapy p 229 The epistemological base of this venture includes the fields of philosophy anthropology and aesthetics as well as psychoanalysis Schaverien suggests that analytical art psychotherapy is a way of working analytically with patients who are unsuitable or unready for psychotherapy giving examples of psychotic and borderline patients children and patients in psychiatric settings This is primarily a book about an analytical approach within art therapy which may be of interest in itself The material also raises issues of interest to analysts and psychotherapists whether or not they work with art in the clinical setting The book clarifies areas of similarity between the disciplines and also makes areas of difference apparent For example most analysts would agree that visual art like dream material and other non verbal representations of the inner world can at times articulate and communicate meanings which for one reason or another cannot be verbally articulated at the time and that this can be pertinent to the aim of analysis However I think few analysts would include facilities in their consulting rooms for the kind of art processes described in the book When the analyst is working with materials in this form the book will be extremely helpful in sorting out the complexity of the transference situation and the role of interpretation The book is so strongly grounded in experiences emerging in the presence of actual art processes and objects that I think it will be of most interest to those who are interested in the specific clinical issues involved in relating to the making and use of actual art objects within the setting Schaverien not only describes the processes involved in detail but also presents technical approaches to the making and handling of art objects within the setting which will inform the capacity of those who are not trained as art therapists to relate to this kind of material in the consulting room *The Embodied Image* Juhani

Pallasmaa, 2011-05-16 *The Embodied Image* The Embodied Image Imagination and Imagery in Architecture Juhani Pallasmaa All artistic and architectural effects are evoked mediated and experienced through poeticised images These images are embodied and lived experiences that take place in the flesh of the world becoming part of us at the same time that we unconsciously project aspects of ourselves on to a conceived space object or event Artistic images have a life and reality of their own and they develop through unexpected associations rather than rational and causal logic Images are usually thought of as retinal pictures but profound poetic images are multi sensory and they address us in an embodied and emotive manner Architecture is usually analysed and taught as a discipline that articulates space and geometry but the mental impact of architecture arises significantly from its image quality that integrates the various aspects and dimensions of experience into a singular internalised and remembered entity The material reality is fused with our mental and imaginative realm The book

is organised into five main parts that look at in turn the image in contemporary culture language thought and the image the many faces of the image the poetic image and finally the architectural image The Embodied Image is illustrated with over sixty images in pairs which are diverse in subject They range from scientific images to historic artistic and architectural masterpieces Artworks span Michelangelo and Vermeer to Gordon Matta Clark and architecture takes in Modern Masters such as Mies van der Rohe Le Corbusier and Alvar Aalto as well as significant contemporary works by Steven Holl and Daniel Libeskind

Geometry as Objective Science in Elementary School Classrooms Wolff-Michael Roth, 2011-05-09 This study examines the origins of geometry in and out of the intuitively given everyday lifeworlds of children in a second grade mathematics class These lifeworlds though pre geometric are not without model objects that denote and come to anchor geometric idealities that they will understand at later points in their lives Roth's analyses explain how geometry an objective science arises anew from the pre scientific but nevertheless methodic actions of children in a structured world always already shot through with significations He presents a way of understanding knowing and learning in mathematics that differs from other current approaches using case studies to demonstrate contradictions and incongruences of other theories Immanuel Kant Jean Piaget and more recent forms of radical social constructivism embodiment theories and enactivism and to show how material phenomenology fused with phenomenological sociology provides answers to the problems that these other paradigms do not answer

Using Art Media in Psychotherapy Michelle L. Dean, 2016-01-22 Using Art Media in Psychotherapy makes a thoughtful and contextual argument for using graphic art materials in psychotherapy providing historical context for art materials and their uses and incorporating them with contemporary practices and theories Written with an analytic focus many of the psychological references nod to Jung and post Jungian thought with keen attention to image and to symbolic function This book jettisons the idea of reductionist cookbook approaches and instead provides an integrated and contextual understanding of the origins of each art form as well as an insightful use for each in its application in mental health healing practices Using Art Media in Psychotherapy gives clinicians and students alike the tools they need to offer psychologically minded and clinically astute choices that honor their clients

Queer and Feminist Theories of Narrative Tory Young, 2021-05-13 This book argues for the importance of narrative theories which consider gender and sexuality through the analysis of a diverse range of texts and media Classical Narratology an allegedly neutral descriptive system for features of narrative has been replaced by a diverse set of theories which are attentive to the contexts in which narratives are composed and received Issues of gender and sexuality have nevertheless been sidelined by new strands which consider for example cognitive transmedial national or historical inflections instead Through consideration of texts including the MTV series *Faking It* and the papers of a nineteenth century activist *Queer and Feminist Theories of Narrative* heeds the original call of feminist narratologists for the consideration of a broader and larger corpus of material Through analysis of issues including the popular representation of lesbian desire the queer narrative voice invisibility and power in the digital age embodiment and cognitive narratology reading and racial codes this book argues that a named strand of narrative theory which employs feminist and queer theories as intersectional vectors is contemporary and urgent The chapters in this book were originally published as a special issue of the journal *Textual*

Mentalizing in Arts Therapies Marianne Verfaillie, 2018-05-15 This book describes the use of therapeutic art music and dance interventions against a background of mentalization thus forging a link between arts therapies and mentalization based treatment This book has its roots in the theory of Mentalization Based Treatment by Antony Bateman and Peter Fonagy and combines the broad experience of many art therapists with art music and dance movement therapy in psychiatric settings in the treatment of adults and adolescents both individually and in groups as well as children with disorganised attachment As a treatment concept mentalization is quite straightforward because mentalizing is a typically human ability As Bateman and Fonagy 2012 say Without mentalizing there can be no robust sense of self no constructive social interaction no mutuality in relationships and no sense of personal security On the other hand it is not so simple to fully grasp the significance of mentalization Mentalization based therapy is a specific type of psychotherapy designed to help people reflect on their own thoughts and feelings and differentiate them from the perspectives of others
