Embodying Gender and Age in Speculative Fiction Derek J. Thiess, 2015-10-14 Following scholarship on gender in science fiction this book explores the limits of considering age as a social construction positing that an acknowledgement of aged bodies necessarily changes the way we read both age and science fiction The volume employs contemporary clinical psychology the biopsychosocial model to demonstrate that age is an important and neglected topic relevant to the study of speculative fiction While gender offers a vocabulary the biopsychosocial approach provides a method to consider age and gender as an embodied synthesis of physicality psychology and social environment This respected model of clinical psychology allows a unique and innovative lens through which to read age and the body in literature Thiess offers readings of established sf classics including Octavia Butler's Parable series Orson Scott Card's Ender's Game and cyberpunk authors such as Bruce Sterling Pat Cadigan and Neal Stephenson also exploring more mainstream speculative works including Stephanie Meyer's Twilight series and Joss Whedon's Firefly Serenity Visiting topics such as care work sexuality sport and the military in these works the book demonstrates that acknowledging a more fully embodied age is not only necessary for the individual subject but will also enrich our understanding of other social categories including gender and race Taking a constructive rather than adversarial stance this book does not merely question how much one can ethically and responsibly bend age but suggests there is a great deal to learn when one explores those limits

offers an intriguing commentary on the very notion of what constitutes the foreign Fadlalla shows how Muslim Hadendowa women manage health and reproductive suffering in their quest to become responsible mothers and valued members of their communities Her historically grounded ethnography delves into women s reproductive histories personal narratives and ritual logics to reveal the ways in which women challenge cultural understandings of gender honor and reproduction

Gender, Bodies and Work D. H. J. Morgan, Berit Brandth, Elin Kvande, 2005 All work is gendered and all work is embodied Yet in common with so many features of social life these connections have remained largely unnoticed in most areas of social enquiry All three topics gender bodies and work have their own history and theoretical concerns and have recently showed signs of convergence This volume recognizes this convergence and explores the inter connections more specifically The authors provide a set of questions which draw together themes already present in existing studies and which provide the basis for further analysis and theoretical elaboration The chapters explore processes of embodiment and disembodiment within working settings and discuss the implications of these for the construction of gendered identities Enhancing our knowledge of all three terms Gender Bodies and Work develops a perspective that has considerable potential both for assessing the past and exploring the future
