in the light of our knowledge of the evolution of the human body a knowledge which must be founded on a comprehensive survey Of comparative anatomy and physiology Hence in this new edition the author has sought to give not only a descriptive history of the develop ment of the various Systems of the body but to make the facts intelligible by bringing a knowledge of Comparative anatomy and evolution to bear on them Human Embryology and Comparative Anatomy have become vast fields of knowledge Here they are dealt with only in so far as they bear directly on the nature of the human body and reflect what the author has found to be useful in the course of his daily work and teaching Every effort has been made to make the book representative of the latest British Research In the preparation of the present edition the author has become indebted to a very wide circle of friends too numerous to be mentioned individually He cannot however allow the occasion to pass without a warm acknow ledgment of his indebtedness to Dr Alexander Low Lecturer on Em bryology in the University of Aberdeen for the help he has given About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
