viewpoints A Companion to World History is an essential resource for the study of the world's past **The Oxford Handbook of Early Modern European History, 1350-1750** Hamish M. Scott, 2015 This Handbook re-examines the concept of early modern history in a European and global context The term early modern has been familiar especially in Anglophone scholarship for four decades and is securely established in teaching research and scholarly publishing More recently however the unity implied in the notion has fragmented while the usefulness and even the validity of the term and the historical periodisation which it incorporates have been questioned The Oxford Handbook of Early Modern European History 1350-1750 provides an account of the development of the subject during the past half century but primarily offers an integrated and comprehensive survey of present knowledge together with some suggestions as to how the field is developing It aims both to interrogate the notion of early modernity itself and to survey early modern Europe as an established field of study The overriding aim will be to establish that early modern is not simply a chronological label but possesses a substantive integrity Volume I examines Peoples and Place assessing structural factors such as climate printing and the revolution in information social and economic developments and religion including chapters on Orthodoxy Judaism and Islam *Europe, 1450-1815: The emergence of the modern era, 1450-1650* Ernest John Knapton, 1961 Theory and Methodology of World Development S. Chew, P. Lauderdale, 2010-04-26 This book brings together key incisive writings published and unpublished of the late Andre Gunder Frank on world development and world history The selections provide the reader with a historical tracing of Gunder Frank's conceptual thinking on development through to his views on world history world development and globalization The World's History: Western Europe Hans Ferdinand Helmolt, 1907 The Emergence of Southern Multinationals Louis Brennan, 2010-12-21 In today's globalised world there is a need to investigate new trends in the global economy which impact on Europe The emergence of these southern multinationals in Europe is one such phenomenon This book explores the existing trends and trajectories of these companies the evidence of their impact and their strategies and processes **History** Robert Blackey, 2011-02-01 This book includes 14 essays written by the author that provide practical advice for teachers and students to assist both in achieving the best results for teaching learning and writing about history Part 1 offers suggestions for enlivening classroom presentations Part 2 addresses the problems of teaching students to write and part 2 focuses on history tests and exams including ways to construct and respond to essay questions Rise of the International Richard Devetak, Tim Dunne, 2024-07-04 International Relations and History were once academic fields sharing a common concern with the affairs of empires states and nations Over the course of the twentieth century however they drifted apart International Relations largely retained the focus on the affairs and relations of these principal international actors but took a methodological turn leading to higher levels of theoretical abstraction History on the other hand retained the methods that define the discipline but shifted the focus veering away from matters of state to the vast array of actors events activities and issues that colour everyday life In recent years the drift has been arrested by scholars in each discipline

who have turned towards the other discipline in their research International Relations has undergone a historiographical turn while History has taken an international turn Rise of the International brings together scholars of International Relations and History to capture the emergence and development of the thought the relations and the systems that have come to be called international in western discourse The evidence offered by contributors to the volume suggests there has been no single stable unchanging concept or object of theoretical reflection or historical investigation that can be called the international but a variety of historically contingent conceptualizations across different contexts **The European**

**Heritage** Gerard Delanty, 2017-07-06 Gerard Delanty offers a critical interpretation of the European heritage today in light of recent developments in the human and social sciences and in view of a mood of crisis in Europe that compels us to re think the European past One of the main insights informing this book is that a transnational and global perspective on European history can reorient the European heritage in a direction that offers a more viable way for contemporary Europe to articulate an intercultural identity in keeping with the emerging shape of Europe and with its own often acknowledged past He argues that the European heritage is based less on a universalistic conception of culture than on a plurality of interconnecting narratives Such a perspective opens up new directions for scholarship and public debate on heritage that are guided by critical cosmopolitan considerations that highlight contention resistances competition and dissonance He argues that the specificity of the European dimension of culture is in the entanglement of many cultures rather than in an original culture The cultures of Europe are not separated but have been shaped in close interaction with each other and with the non European world Nations are not therefore unique exceptional or fundamentally different from each other The outcome of such intermingling is a multiplicity of ideas of Europe that serve as shared cultural reference points **The Emergence of**

**the European World** Jerome Blum, Rondo E. Cameron, Thomas Garden Barnes, 1970 Includes bibliographical references

**A Global History of Modern Historiography** Georg G Iggers, Q. Edward Wang, Supriya Mukherjee, 2016-09-01 The first book on historiography to adopt a global and comparative perspective on the topic A Global History of Modern Historiography looks not just at developments in the West but also at the other great historiographical traditions in Asia the Middle East and elsewhere around the world over the course of the past two and a half centuries This second edition contains fully updated sections on Latin American and African historiography discussion of the development of global history environmental history and feminist and gender history in recent years and new coverage of Russian historical practices Beginning in the mid eighteenth century the authors analyse historical currents in a changing political social and cultural context examining both the adaptation and modification of the Western influence on historiography and how societies outside Europe and America found their own ways in the face of modernization and globalization Supported by online resources including a selection of excerpts from key historiographical texts this book offers an up to date account of the status of historical writing in the global era and is essential reading for all students of modern historiography
