Management and Leadership for Nurse Managers Russell C. Swansburg, 1996 This edition of the highly acclaimed *Management and Leadership for Nurse Managers* offers theoretical and practical perspectives on the major management functions as they are practiced in today's organizations. The author introduces current and future nurse managers to the challenges of planning, organizing, leading, and controlling. The most recent research on management theory is incorporated throughout the book in the context of its practical application. New coverage includes total quality management, pay for performance, the rising temporary workforce, and downsizing. Nursing and Health Care for the Homeless Juanita K. Hunter, 1993-07-01 The lack of shelter creates many health hazards for the homeless, and the lack of regular health care exacerbates chronic illnesses and fosters poor health practices within this group. Homeless children lack immunizations, evidence developmental delays, and have increased school-related health problems. Nursing, along with other health care professions, is concerned about health care available for the homeless. Schools of nursing and individual nurses have joined with other health care providers in developing special programs to meet the needs of this population. These providers have now documented specific information about the composition of the homeless as a group and their health care needs. This book provides a national perspective of nurses' service delivery, research, and experiences in working with the homeless.
