**Essays in Liberal Thought** William Thomas, Stewart S. Morgan, 1928      **Perspectives on Thinking, Learning, and Cognitive Styles** Robert J. Sternberg, Li-fang Zhang, 2014-04-08 This volume presents the most comprehensive balanced and up to date coverage of theory and research on cognitive thinking and learning styles in a way that represents diverse theoretical perspectives includes solid empirical evidence testing the validity of these perspectives and shows the application of these perspectives to school situations as well as situations involving other kinds of organizations International representation is emphasized with chapters from almost every major leader in the field of styles Each chapter author has contributed serious theory and or published empirical data work that is primarily commercial or that implements the theories of others The book s central premise is that cognitive learning and thinking styles are not abilities but rather preferences in the use of abilities Traditionally many psychologists and educators have believed that people s successes and failures are attributable mainly to individual differences in abilities However for the past few decades research on the roles of thinking learning and cognitive styles in performance within both academic and nonacademic settings has indicated that they account for individual differences in performance that go well beyond abilities New theories better differentiate styles from abilities and make more contact with other psychological literatures recent research in many cases is more careful and conclusive than are some of the older studies Cognitive learning and thinking styles are of interest to educators because they predict academic performance in ways that go beyond abilities and because taking styles into account can help teachers to improve both instruction and assessment and to show sensitivity to cultural and individual diversity among learners They are also of interest in business where instruments to assess styles are valuable in selecting and placing personnel The state of the art research and theory in this volume will be of particular interest to scholars and graduate students in cognitive and educational psychology managers and others concerned with intellectual styles as applied in educational industrial and corporate settings      Essays, Poems, Letters Bernard Pitt, 1917      **Thinking Styles** Robert J. Sternberg, 1997 Sternberg presents a theory of thinking styles that aims to explain why aptitude tests school grades and classroom performance often fail to identify real ability      The Current , 1887      **A.C. Pigou and the 'Marshallian' Thought Style** Karen Lovejoy Knight, 2018-12-29 This book provides a study of the forces underlying the development of economic thought at Cambridge University during the late nineteenth century and the first half of the twentieth century The primary lens it uses to do so is an examination of how Arthur Cecil Pigou s thinking heavily influenced by his predecessor Alfred Marshall evolved Aspects of Pigou s context biography and philosophical grounding are reconstructed and then situated within the framework of Ludwik Fleck s philosophy of scientific knowledge most notably by drawing on the notions of thought styles and thought collectives In this way Knight provides a novel contribution to the history of Pigou s economic thought      Essays and Speeches William Samuel Lilly, 1897      Essays as Easy as T 1, 2, 3! of aesthetics and ethics within the global fashion industry Characterized by an increasingly fast spinning production the industry is highly exploitative in terms of environment and labor force underpaid textile workers retailers working under brutal competition from the mass merchandise discounters young designers seamstresses and curators often working for free and a vast body of aspiring models In addition fashion related aesthetic ideals are becoming more influential than ever in directing consumers in their social and personal identification processes and bodily practices with sometimes fatal consequences Covering a wide range of subjects such as fashion s highly problematic production and consumption practices the possibility of producing and consuming fashion ethically fashion s intimate connection with nature and technology

Fashion Aesthetics and Ethics highlights the powerful aesthetical presence of fashion in relation to its ethical premises and often problematic outcomes **God, Sexuality, and the Self** Sarah Coakley, 2013-08-29 God Sexuality and the Self is a new venture in systematic theology Sarah Coakley invites the reader to re conceive the relation of sexual desire and the desire for God and through the lens of prayer practice to chart the intrinsic connection of this relation to a theology of the Trinity The goal is to integrate the demanding ascetical undertaking of prayer with the recovery of lost and neglected materials from the tradition and thus to reanimate doctrinal reflection both imaginatively and spiritually What emerges is a vision of human longing for the triune God which is both edgy and compelling Coakley s th ologie totale questions standard shibboleths on sexuality and gender and thereby suggests a way beyond current destructive impasses in the churches The book is clearly and accessibly written and will be of great interest to all scholars and students of theology **Prize Essays: Chiefly**
