*Introduction to Agroecology* C.D. Caldwell, Songliang Wang, 2021-01-19 This textbook applies basic concepts of ecology to address critical issues regarding food and agricultural systems The intended audience is first year undergraduate students it may also benefit higher level undergraduates with an interest in agriculture and ecology The level of science and general knowledge reflects this target group The text is divided into five sections with 22 chapters in all Each chapter has its own student learning objectives The first two sections Context

of Agroecology and Basics of Agroecosystems provide a sound basis for the further study of agriculture from an ecological standpoint. Section 3 Digging Deeper into Agroecosystems explores the related issues of hunger, wastes, climate change, and biodiversity. It is suggested that students study these three sections before proceeding to section 4 or 5. Section 4 Application of Agroecosystem Concepts introduces students to agricultural production and challenges them to use the concepts and ideas from the first three sections to critically evaluate such production systems. Section 5 Agroecosystem Management brings the coverage full circle by examining global solutions and opportunities from both a scientific and social economic standpoint. Particularly these last four chapters offer both food for thought and inspiration for further work. The book's goal is not to provide a comprehensive literature review; rather, it offers extensive data on and a stimulating analysis of the topic.

*Ecology*, 1960 Publishes essays and articles that report and interpret the results of original scientific research in basic and applied ecology **Advances in Microbial Ecology** J.G. Jones, 2013-11-11 Kevin Marshall is a hard act to follow. Volume 13 of *Advances in Microbial Ecology* has been produced by a new editorial board, and we, the members of that board, are delighted to have the opportunity to pay tribute to Kevin's achievements. In his time as Series Editor, the quality of the chapters submitted and the range of subject matter covered have ensured an expanding and more stimulated readership. This represents a considerable achievement given the growth in the number of review volumes and the increasing tendency for journals to publish review articles. The achievement was reached not only through meticulous attention to quality and detail but also by providing a forum for the expression of views, information, and results that would stimulate discussion. *Advances in Microbial Ecology* will continue to provide such a focus, although because of the frequency of publication it would not be practicable to introduce a reply or comment section. Although we do not deliberately aim to provide a forum for controversy, we encourage speculation based on sound scientific arguments. In addition, we would like to encourage authors to offer chapters for consideration. In the past, the volumes have largely comprised invited chapters. With the best will in the world, an editorial board of four cannot claim adequate coverage of such a vast and rapidly developing research area. We would therefore welcome submission of outline plans for chapters, which should be sent to the Editor.
