The Rebel Den of Nung Trí Cao James A. Anderson, 2012-09-01 The Rebel Den of Nung Trí Cao examines the rebellion of the eleventh century Tai chieftain Nung Trí Cao ca 1025 1055 whose struggle for independence along Vietnam s mountainous northern frontier was a pivotal event in Sino Vietnamese relations Trí Cao s revolt occurred during Vietnam s earliest years of independence from China and would prove to be a vital test of the Vietnamese court s ability to confront local political challenges and maintain harmony with its powerful northern neighbor Trí Cao established his first kingdom in 1042 at the age of seventeen but was captured by Vietnamese troops After his release in 1048 he announced the founding of a second kingdom but an attack by Vietnamese forces drove him to flee into Chinese territory Trí Cao made his final attempt in 1052 proclaiming a new kingdom and leading thousands of his subjects in a revolt that swept across the South China coast But within a year Chinese imperial troops had forced him to flee to the nearest independent kingdom Official Chinese and Vietnamese accounts of the rebel leader s end vary according to the Chinese the ruler of the independent kingdom had Trí Cao executed but in popular accounts Trí Cao was granted safe passage into northern Thailand where his descendants are said to flourish today Scholar James Anderson places Trí Cao in context by exploring the Sino Vietnamese tributary relationship and the conflicts that engaged both the Song and Vietnamese courts The Rebel Den of Nung Trí Cao reconstructs the series of negotiations that took place between border communities and representatives of the imperial courts examining the ways in which Tai and other ethnic groups deftly navigated the unstable political situation that followed the demise of China s cosmopolitan Tang dynasty Though his rebellion was ill fated Trí Cao is almost a thousand years later still worshipped in temples along the Sino Vietnamese border and his memory provides a point of unity for people who have become separated by modern political boundaries

Ritual Barry Stephenson, 2015-01-28 Ritual is part of what it means to be human Like sports music and drama ritual defines and enriches culture putting those who practice it in touch with sources of value and meaning larger than themselves Ritual is unavoidable yet it holds a place in modern life that is decidedly ambiguous What is ritual What does it do Is it useful What are the various kinds of ritual Is ritual tradition bound and conservative or innovative and transformational Alongside description of a number of specific rites this Very Short Introduction explores ritual from both theoretical and historical perspectives Barry Stephenson focuses on the places where

ritual touches everyday life in politics and power moments of transformation in the life cycle as performance and embodiment He also discusses the boundaries of ritual and how and why certain behaviors have been studied as ritual while others have not Stephenson shows how ritual is an important vehicle for group and identity formation how it generates and transmits beliefs and values how it can be used to exploit and oppress and how it has served as a touchstone for thinking about cultural origins and historical change Encompassing the breadth and depth of modern ritual studies Barry Stephenson's *Very Short Introduction* also develops a narrative of ritual's place in social and cultural life ABOUT THE SERIES The *Very Short Introductions* series from Oxford University Press contains hundreds of titles in almost every subject area These pocket sized books are the perfect way to get ahead in a new subject quickly Our expert authors combine facts analysis perspective new ideas and enthusiasm to make interesting and challenging topics highly readable

Reconstructing Agency in Developmental and Educational Psychology Paul Downes, 2019-09-05 This book reconstructs the foundations of developmental and educational psychology and fills an important gap in the field by arguing for a specific spatial turn so that human growth experience and development focus not only on time but space This regards space not simply as place Highlighting concrete cross cultural relational spaces of concentric and diametric spatial systems the book argues that transition between these systems offers a new paradigm for understanding agency and inclusion in developmental and educational psychology and for relating experiential dimensions to causal explanations The chapters examine key themes for developing concentric spatial systemic responses in education including school climate bullying violence early school leaving prevention and students voices Moreover the book proposes an innovative framework of agency as movement between concentric and diametric spatial relations for a reconstruction of resilience This model addresses the vital neglected issue of resistance to sheer cultural conditioning and goes beyond the foundational ideas of Bronfenbrenner's ecological systems theory as well as Vygotsky Skinner Freud Massey Bruner Gestalt and postmodern psychology to reinterpret them in dynamic spatial systemic terms Written by an internationally renowned expert this book is a valuable resource for academics researchers and postgraduate students in the areas of educational and developmental psychology as well as related areas such as personality theory health psychology social work teacher education and anthropology

The Make-Believe Space Yael Navaro-Yashin, 2012-03-12 Looks at the Turkish territory of Northern Cyprus a self defined state which is actually imaginary because it is only recognized by Turkey This title examines the sense of haunted property and objects lost and gained in the partition along with people's relation to the fictive remapping of places and history by this new state

E.M. Forster and The Politics of Imperialism M. Shaheen, 2004-06-29 In *Howards End* Forster remarks that the Imperialist hopes to inherit the earth and with the strong temptation he has to acclaim it as a superego man who carries his country's virtue overseas He then adds But the Imperialist is not what he thinks or seems He is a destroyer He prepares the

way for cosmopolitanism and though his ambitions may be fulfilled the earth that he inherits will be grey This simple notion is masterly expressed in *A Passage to India* which provides a rich diversity of historical contexts and implies political imperatives urging us to rethink the complex relationship between East and West not as simple confrontation but rather as deeply rooted in cultural differences far beyond the realm of imperialist sensibility With the support of material by Forster published here for the first time this volume explores the realm of Forster's politics and imperialism

Living with the Gods Neil MacGregor, 2018-09-17 Following the award winning BBC Radio 4 series a panoramic exploration of peoples objects and beliefs from the celebrated author of *A History of the World in 100 Objects* and *Germany* Riveting extraordinary tells the sweeping story of religious belief in all its inventive variety The emphasis is not on our differences but on shared spiritual yearnings Rachel Campbell Johnston The Times Books of the Year One of the central facts of human existence is that every society shares a set of beliefs and assumptions a faith an ideology a religion that goes far beyond the life of the individual These beliefs are an essential part of a shared identity They have a unique power to define and to divide us and are a driving force in the politics of much of the world today Throughout history they have most often been in the widest sense religious Yet this book is not a history of religion nor an argument in favour of faith It is about the stories which give shape to our lives and the different ways in which societies imagine their place in the world Looking across history and around the globe it interrogates objects places and human activities to try to understand what shared beliefs can mean in the public life of a community or a nation how they shape the relationship between the individual and the state and how they help give us our sense of who we are For in deciding how we live with our gods we also decide how to live with each other The new blockbuster by the museums maestro Neil MacGregor The man who chronicles world history through objects is back examining a new set of objects to explore the theme of faith in society Sunday Times

Economy and Ritual Stephen Gudeman, Chris Hann, 2017-05 According to accepted wisdom rational practices and ritual action are opposed Rituals drain wealth from capital investment and draw on a mode of thought different from practical ideas The studies in this volume contest this view Comparative historical and contemporary the six ethnographies extend from Macedonia to Kyrgyzstan Each one illuminates the economic and ritual changes in an area as it emerged from socialism and re entered market society Cutting against the idea that economy only means markets and that market action exhausts the meaning of economy the studies show that much of what is critical for a people's economic life takes place outside markets and hinges on ritual understood as the negation of the everyday world of economising

Flowers That Kill Emiko Ohnuki-Tierney, 2015-08-12 Flowers are beautiful People often communicate their love sorrow and other feelings to each other by offering flowers like roses Flowers can also be symbols of collective identity as cherry blossoms are for the Japanese But are they also deceptive Do people become aware when their meaning changes perhaps as flowers are deployed by the state and dictators Did people recognize that the roses they offered to Stalin and Hitler became a propaganda tool Or were they like the Japanese who

including the soldiers did not realize when the state told them to fall like cherry blossoms it meant their deaths Flowers That Kill proposes an entirely new theoretical understanding of the role of quotidian symbols and their political significance to understand how they lead people if indirectly to wars violence and even self exclusion and self destruction precisely because symbolic communication is full of ambiguity and opacity Using a broad comparative approach Emiko Ohnuki Tierney illustrates how the aesthetic and multiple meanings of symbols and at times symbols without images become possible sources for creating opacity which prevents people from recognizing the shifting meaning of the symbols
