

CANADA ESSAY SAMPLE

Most children have the same nose shape or same eye color as with their parents. However, I have inherited more than physical features. I have inherited a passion to learn combined with an insatiable thirst for curiosity. This has served me well all throughout my career in the academe. My father is an electrical engineer, and he taught me the beauty to explore the world with my eyes of inquisition, consistently looking for things to learn from, and to understand even more. I can remember watching him for several hours in front of an elevator schematics in our home, curious as to the means of all those lines and symbols. I was deeply fascinated with technology, and I really wanted to know why and how things worked the way they actually did.

My playground was a space where there are a lot of spare electric wire, old circuit boards, and different broken appliances. I usually spend several hours in tinkering and disassembling with all of the amazing treasures I discover in our garage. My mother, on the other hand, is a teacher. She was the one who first observed my intellectual curiosity, even encouraging me to explore further. She prepared for me mind-opening books, which I devoured willingly. All of these books allowed me to further discover the seemingly irresistible appeal of different imaginative questions, alongside their fascinating answers.

This intellectual curiosity has become the result of a highly unique combination of childhood experiences and early influences which have further fueled my insatiable passion for learning, both inside and outside of our classroom. I hope to continue in applying this curiosity in all aspects of my personal life, exploring this world through the eyes of that child I used to be. By refusing to accept explanations that are obvious, and refusing to simply settle for a surface understanding, great innovators created new technologies and innovations. I will do my best to follow their footsteps. I believe that it is part of my being, driving me to become happy and successful.

Canadian Intellectuals, the Tory Tradition, and the Challenge of Modernity, 1939-1970 Philip Massolin, 2015-05-27 In this well researched book Philip Massolin takes a fascinating look at the forces of modernization that swept through English Canada beginning at the turn of the twentieth century Victorian values agrarian religious and the adherence to a rigid set of philosophical and moral codes were being replaced with those intrinsic to the modern age industrial secular scientific and anti intellectual This work analyses the development of a modern consciousness through the eyes of the most fervent critics of modernity adherents to the moral and value systems associated with Canada s tory tradition The work and thought of social and moral critics Harold Innis Donald Creighton Vincent Massey Hilda Neatby George P Grant W L Morton Northrop Frye and Marshall McLuhan are considered for their views of modernization and for their strong opinions on the nature and implications of the modern age These scholars shared concerns over the dire effects of modernity and the need to attune Canadians to the realities of the modern age Whereas most Canadians were oblivious to the effects of modernization these critics perceived something ominous far from being a sign of true progress modernization

was a blight on cultural development In spite of the efforts of these critics Canada emerged as a fully modern nation by the 1970s Because of the triumph of modernity the toryism that the critics advocated ceased to be a defining feature of the nation s life Modernization in short contributed to the passing of an intellectual tradition centuries in the making and rapidly led to the ideological underpinnings of today s modern Canada **United Empire** ,1914 **American Gothic Fiction**
