Shapes of Imagination George Stiny, 2022-11-15 Visual calculating in shape grammars aligns with art and design bridging the gap between seeing Coleridge s imagination and combinatoric play Coleridge s fancy In *Shapes of Imagination* George Stiny runs visual calculating in shape grammars through art and design incorporating Samuel Taylor Coleridge s poetic imagination and Oscar Wilde s corollary to see things as they aren t Many assume that calculating limits art and design to suit computers but shape grammars rely on seeing to prove otherwise Rules that change what they see extend calculating to overtake what computers can do in logic and with data and learning Shape grammars bridge the divide between seeing Coleridge s imagination or esemplastic power and combinatoric play Coleridge s fancy Stiny shows that calculating without seeing excludes art and design Seeing is key for calculating to augment creative activity with aesthetic insight and value Shape grammars go by appearances in a full fledged aesthetic enterprise for the inconstant eye they answer the question of what calculating would be like if Turing and von Neumann were artists instead of logicians Art and design are calculating in all their splendid detail
