Governing through Standards: the Faceless Masters of Higher Education Katja Brøgger, 2018-11-09 This book offers an empirical and theoretical account of the mode of governance that characterizes the Bologna Process In addition it shows how the reform materializes and is translated in everyday working life among professors and managers in higher education It examines the so called Open Method of Coordination as a powerful actor that uses soft governance to advance transnational standards in higher education The book shows how these standards no longer serve as tools for what were once human organizational national or international regulators Instead the standards have become regulators themselves the faceless masters of higher education By exploring this the book reveals the close connections between the Bologna Process and the EU regarding regulative and monitoring techniques such as standardizations and comparisons which are carried out through the Open Method of Coordination It suggests that the Bologna Process works as a subtle means to circumvent the EU's subsidiarity principle making it possible to accomplish a European governance of higher education despite the fact that education falls outside EU's legislative reach The book's research interest in translation processes agency and power

relations among policy actors positions it in studies on policy transfer policy borrowing and globalization However different from conventional approaches this study draws on additional interpretive frameworks such as new materialism

Governance examines the impact of recent market based reforms on the role of governors in the English state education system A focus of the book concerns how government and non government demands for strong governance have been translated to mean improved performance management of senior school leaders and greater monitoring and disciplining of governors This book addresses fundamental questions about the neoliberal logic underpinning these reforms and how

governors are being trained and responsabilised in new ways to enhance the integrity of these developments Drawing on large scale research conducted over three years the book examines the impact of these reforms on the day to day practices of governors and the diminished role of democracy in these contexts Wilkins also captures the economic and political rationalities shaping the conduct of governors at this time and traces these expressions to wider structural developments linked to depoliticisation decentralisation and disintermediation This book addresses timely and original issues concerning the role of corporate planning and expert handling to state education at a time of increased school autonomy shrinking local government support oversight and tight centralised accountability It will appeal to researchers and postgraduate students in disciplines of education sociology political science public policy and management It will also be of interest to researchers and policy makers from countries with similar or emerging quasi market education systems

Quality and Qualities: Tensions in Education Reforms Clementina Acedo,Don Adams,Simona Popa,2012-09-07 Quality and Qualities Tensions in Education Reforms is a provocative call for understanding and further exploring the elusive concept of quality in education Although education quality has acquired high priority in the past few decades the multiplicity of conceptualizations of quality also reflects the concerns and foci of multiple stakeholders Coming to an understanding of quality education involves careful analysis of the context from which any particular reform or program emerges and of the continuing struggle to define and achieve it Two main questions persist who benefits from particular policies focused on quality And what are the potential tradeoffs between a focus on quality equitable distribution of education and inclusion of various traditional expectations This book explores notions of quality as understood within various systems of national formal and nonformal education Also it considers the tensions that arise with the introduction of new standardized notions of quality in relation to international measures and educational reforms in developing countries In all cases specific national issues and concerns compete with global agendas Challenges to quality that are given particular attention in the book chapters include changing definitions of quality high expectations for education and issues with implementation and the introduction of English as a means to achieve quality in a globalizing world Special attention is also given to possible actions that support a more equitable education without ignoring the requisite of quality The final chapter suggests three models choices for seeking higher quality and guiding the educational future of nations

Intimate Accounts of Education Policy Research Camilla Addey,Nelli Piattoeva,2021-09-30 What do we actually do when we research education policy and governance Why do we tame the messy hinterland of research into smooth accounts and what do we lose in the process In this volume distinguished scholars in education policy and governance research discuss how the practice of methods is messy subjective and provisional They approach methodology as riddled with tensions doubts troubles and mundane decisions Scholarship in

this book shifts from recording the methodological hinterland to putting it to productive use as resources for thinking about the researched world and about research itself This methodological openness helps to examine how research reproduces scholars metaphysics how research is a deeply embodied process encompassing all senses how scholars concerns interfere in the worlds they study but also how these equally interfere with researchers By challenging smooth methodological accounts which conceal the complex and provisional nature of research this book offers new approaches in education policy and governance research that are more generative insightful and sincere Offering new ways of thinking about research methodologies the book will be of great interest to researchers academics and post graduate students in the fields of education research and education theory as well as social scientists interested in research methodologies more broadly

structures and institutions was brought into sharp focus by the Asian Financial Crisis which adversely affected most East Asian societies. Since then they have begun to look for ways to restructure their public administration and political systems in order to develop new mechanisms and structures to promote good governance. This book focuses on how selected Asian states have responded to the growing impact of liberalizing and marketizing trends in public policy formulation and public management. To what extent is the state-guided regime in Asia still relevant to governing public policy/public management? What are the policy implications for a growing number of Asian states which are pursuing more pro-competition policy instruments? The book is a timely and important collection that offers critical analysis of the search for new governance in Asia and compares and contrasts experiences in selected Asian societies such as China, Japan, Hong Kong, Taiwan, South Korea, Singapore, and other parts of South East Asia. Chapters are written by leading scholars in the fields of comparative development policy and governance studies from Hong Kong, Macau, Taiwan, China, Singapore, Japan, and the United Kingdom.

Europe's Lifelong Learning Markets, Governance and Policy Marcella Milana, Gosia Klatt, Sandra Vatrella, 2020-07-20. This book explores European governance and policy coordination within lifelong learning markets. Using an instruments approach, the editors and contributors examine the ways in which governance mechanisms employed by the European Union influence policy to regulate lifelong learning and intervene in lifelong learning markets at both European and national levels. Filling an important gap in the current literature, this book examines how strengthened policy coordination at the EU level contributed to the blurring of boundaries between policy fields and the redefinition of the function of adult education after the 2008 recession. Divided into three parts, this book draws on a range of case studies from countries including Spain, Denmark, Bulgaria, and the UK. It will be of interest and value to students and scholars of education policy and governance, adult education, and lifelong learning.

COVID-19 and the (Broken) Promise of Education for Sustainable Development Javed Anwar, Sher Rahmat Khan, Mir Zaman Shah, Seth Brown, Peter Kelly, Scott Phillips, 2023-02-06. The book charts the emergence of the COVID-19 pandemic and the impact that it has had on the lives of young people and their communities, education systems, the teaching profession, and the responses by governments, NGOs, and donor organisations in Pakistan. Drawing on theories of postcolonialism, feminism, and neoliberal globalisation, the authors explore the development of Pakistan as a postcolonial nation-state and examine the legacies of colonialism in education systems and policies, teacher education, and development. The Pakistani authors bring extensive knowledge and experience to this case study of the broken promise of education for sustainable development. This mix of theoretical insight and practical experience promises to produce significant policy and development impact in post-COVID-19 Pakistan, South Asia more broadly, and in other postcolonial development contexts around the world, as it develops a critique of the UN SDGs as a global and more local framework for development.

Education Law Michael Imber, Tyll van Geel, J. C. Blokhuis, Jonathan Feldman, 2013-10-08. Education Law 5th Edition is organized around the belief that students need to read court cases to understand the subtlety and richness of the law, but for legal neophytes, cases without discussion and interpretation are often too difficult to comprehend. This textbook provides a comprehensive survey of the legal problems and issues that confront school administrators and policymakers today. Thus, the text balances an explanation of the important principles of education law with actual court decisions to illuminate these concepts. The court decisions are carefully edited to highlight issues most relevant to administrators, and each chapter explores implications for policy and practice. This new edition features additional content on bullying, student privacy, free speech, rights, teacher evaluation, collective bargaining, and issues relating to Internet and technology, as well as revised materials dealing with education policy and updating of references and case law throughout. A companion website with materials for students and instructors, including links to full cases, a glossary of key concepts, and discussion questions to help students further engage with the content.
