Government by Committee K. C. Wheare, 1955 *Government by Committee* Kenneth Clinton Wheare, 1955 *Popular Government. Four Essays* Sir Henry Sumner Maine, 1909 **Essay on the Warehousing System and Government Credits of the United States**, 1828 **Government by Committee** Kenneth C. Wheare, 1968 *Essay on the Warehousing System and government credits of the United States* United States, 1828 *Practical Essays on American Government* Albert Bushnell Hart, 1893 **Essays on the History of Parliamentary Procedure** Paul Evans, 2017-12-28 8 February 2015 marked the 200th anniversary of the birth of Thomas Erskine May May is the most famous of the fifty holders of the office of Clerk of the House of Commons His continued renown arises from his Treatise upon the Law Privileges Proceedings and Usage of Parliament first published in 1844 and with its 25th edition currently in preparation It is known throughout those parts of the world that model their constitutional arrangements on Westminster as the Bible of Parliamentary Procedure This volume celebrates both the man and his book Bringing together current and former Clerks in the House of Commons and outside experts the contributors analyse May's profound contribution to the shaping of the modern House of Commons as it made the transition from the pre Reform Act House to the modern core of the UK's constitutional democracy in his lifetime This is perhaps best symbolised by its enforced transition between 1834 and 1851 from a mediaeval slum to the World Heritage Palace of Westminster which is the most iconic building in the UK The book also considers the wider context of parliamentary law and procedure both before and after May's time It constitutes the first sustained analysis of the development of parliamentary procedure in over half a century attempting to situate the reforms in the way the central institution of our democracy conducts itself in the political contexts which drove those changes **The Victorian Government Prize Essays, 1860**, 1861 *The Municipal Journal*, 1906 **Cyclopedia of American Government** Andrew Cunningham McLaughlin, Albert Bushnell Hart, 1914 *Liberalism and the Emergence of American Political Science* Robert Adcock, 2014 This book situates the origins of American political science in relation to the transatlantic history of liberalism In a corrective to earlier accounts it argues that as political science took shape in the nineteenth century American academy it did more than express a pre-existing American liberalism The pioneers of American political science participated in transatlantic networks of intellectual and political elites that connected them directly to the vicissitudes of liberalism in Europe The book shows how these figures adapted multiple contemporary European liberal arguments to speak to particular challenges of mass democratic politics and large scale industry as they developed in America Political science's pioneers in the American academy were thus active agents of the Americanization of liberalism When political science first secured a niche in the American academy during the antebellum era it advanced a democratized classical liberal political vision overlapping with the contemporary European liberalism of Tocqueville and John Stuart Mill As political science expanded during the dramatic growth of university ideals and institutions in the Gilded Age divergence

within its liberalism came to the fore in the area of political economy In the late nineteenth century this divergence was fleshed out into two alternative liberal political visions progressive liberal and disenchanted classical liberal with different analyses of democracy and the administrative state During the early twentieth century both visions found expression among early presidents of the new American Political Science Association and subsequently within contests over the meaning of liberalism as this term acquired salience in American political discourse In sum this book showcases how the history of American political science offers a venue in which we see how a distinct current of mid nineteenth century European liberalism was divergently transformed into alternative twentieth century American liberalisms
