From Tool to Partner Jonathan Grudin,2022-05-31 This is the first comprehensive history of human computer interaction HCI Whether you are a user experience professional or an academic researcher whether you identify with computer science human factors information systems information science design or communication you can discover how your experiences fit into the expanding field of HCI You can determine where to look for relevant information in other fields and where you won t find it This book describes the different fields that have participated in improving our digital tools It is organized chronologically describing major developments across fields in each period Computer use has changed radically but many underlying forces are constant Technology has changed rapidly human nature very little An irresistible force meets an immovable object The exponential rate of technological change gives us little time to react before technology moves on Patterns and trajectories described in this book provide yourbest chance to anticipate what could come next We have reached a turning point Tools that we built for ourselves to use are increasingly influencing how we use them in ways that are planned and sometimes unplanned The book ends with issues worthy of consideration as we explore the new world that we and our digital partners are shaping

Proving Ground Kathy Kleiman,2022-08-11 As the Cold War began America s race for tech supremacy was taking off Experts rushed to complete the top secret computing research started during World War II among them six gifted mathematicians a patriotic Quaker a Jewish bookworm a Yugoslav genius a native Gaelic speaker a sophomore from the Bronx and a farmer s daughter from Missouri Their mission Programming the world s first and only supercomputer before any code or programming languages existed These pioneers triumphed against sexist attitudes

and huge technical challenges to invent computer programming yet their monumental contribution has never been recognised until now Over a decade Kathy Kleiman met with four of the original six ENIAC Programmers and recorded their stories Here with a light touch and a serious mind she exposes the deliberate erasure of their achievements and restores the women to their rightful place as revolutionaries bringing to life their camaraderie their determination and their rapidly changing world As big tech struggles with gender inequality and momentum builds in restoring women to history the time has come for this engrossing story to be uncovered and celebrated
