N.

Shankara Bhat,2004 On the basis of a cross linguistic study of over 250 languages this book brings to light several fascinating characteristics of pronouns It argues that these words do not form a single category but rather two different categories called personal pronouns and proforms It points out several differences between the two such as the occurrence of a dual structure among proforms but not among personal pronouns These differences are shown to derive from the distinct functions that the two categories have to perform in language The book also shows that the so called interrogative pronouns

Pavey,2010-08-19 Most of the time we communicate using language without considering the complex activity we are undertaking forming words and sentences in a split second This book introduces the analysis of language structure combining both description and theory within a single practical text It begins by examining words and parts of words and then looks at how words work together to form sentences that communicate meaning Sentence patterns across languages are also studied looking at the similarities and the differences we find in how languages communicate meaning The book also discusses how context can affect how we structure our sentences the context of a particular language and its structures the context of old and new information for us and our addressee s and the context of our culture *Amistad's Orphans* Benjamin Nicholas Lawrance,2015-01-28 The lives of six African children ages nine to sixteen were forever altered by the revolt aboard the Cuban schooner La Amistad in 1839 Like their adult companions all were captured in Africa and illegally sold as slaves In this fascinating revisionist history Benjamin N Lawrance reconstructs six entwined stories and brings them to the forefront of the Amistad conflict Through eyewitness testimonies court records and the children s own letters Lawrance recounts how their lives were inextricably interwoven by the historic drama and casts new light on illegal nineteenth century transatlantic slave smuggling **The Languages and Linguistics of Africa** Tom Güldemann,2018-09-10 This innovative handbook

takes a fresh look at the currently underestimated linguistic diversity of Africa the continent with the largest number of languages in the world It covers the major domains of linguistics offering both a representative picture of Africa s linguistic landscape as well as new and at times unconventional perspectives The focus is not so much on exhaustiveness as on the fruitful relationship between African and general linguistics and the contributions the two domains can make to each other This volume is thus intended for readers with a specific interest in African languages and also for students and scholars within the greater discipline of linguistics   The Grammar of Interactives Bernd Heine,2023-01-16 This book explores a domain of discourse processing referred to as interactive grammar based on an analysis of grammatical descriptions of over 100 languages spoken across the world While much previous work has treated interactive grammar as a fairly marginal part of language Bernd Heine describes it here as a distinct category that contrasts with sentence grammar both in its functions and its structural behavior He identifies ten types of interactives i e extra clausal expressions of linguistic discourse attention signals directives discourse markers evaluatives ideophones interjections response elicitors response signals social formulae and vocatives The analysis reveals that speakers make use of two contrasting modes for structuring their discourses both of which are needed for successful communication one is sentence grammar which has a propositional format and analytic organization the other is interactive grammar which has a holophrastic organization and a focus on social communication While the argument structure of sentence grammar is shaped by the propositional format of sentences that of interactive grammar is shaped by the indexical nature of the situation of discourse This distinction shows interesting correlations both with findings from neurolinguistic studies on differential activity in the two hemispheres of the human brain and with observations from social psychology on the differences between systems of reasoning and judgment
