**IX INTRODUCTION** The study of case once primarily of interest to philologists has only recently begun to receive the attention it deserves from syntacticians

**The Syntax of Argument Structure** Leonard H. Babby, 2009-03-26 This book proposes an intriguing theory of argument structure Babby puts forward the theory that this set of arguments the verb's argument structure has a universal hierarchical composition which directly determines the sentence's case and grammatical relations

**Parameters of Slavic Morphosyntax** Steven Franks, 1995-05-11 Focusing on issues of case theory and comparative grammar this study treats selected problems in the syntax of the Slavic languages from the perspective of Government Binding theory Steven Franks seeks to develop parametric solutions to related constructions among the various Slavic languages A model of case based loosely on Jakobson's feature system is adapted to a variety of comparative problems in Slavic including across the board constructions quantification secondary predication null subject phenomena and voice Solutions considered make use of recent approaches to phrase structure including the VP internal subject hypothesis and the DP hypothesis The book will serve admirably as an introduction to GB theory for Slavic linguists as well as to the range of problems posed by Slavic for general syntacticians

**Adverbial Constructions in the Languages of Europe** Johan van der Auwera, 2011-05-09 The series is a platform for contributions of all kinds to this rapidly developing field General problems are studied from the perspective of individual languages language families language groups or language samples Conclusions are the result of a deepened study of empirical data Special emphasis is given to little known languages whose analysis may shed new light on long standing problems in general linguistics

**Control and Grammar** R.K. Larson, S. Iatridou, Utpal Lahiri, J. Higginbotham, 2013-03-09

The articles in this volume grew from papers presented at the workshop on control held at the Massachusetts Institute of Technology March 1989 The work of the various authors comes at a moment in linguistic theory that is notable for two developments First there has been increasing involvement of syntactic theory in semantics and of semantic theory in syntax with the result that the sorting of facts into syntactic and semantic has become a more complex and theory laden affair Second there has been an enormous growth both in the breadth and depth of studies in languages other than English Both of these develop ments have left their mark on the authors directly and indirectly They have also been responsible for the shifts that have given the key terminology its present range of application In this introduction we discuss the background to the issues that were particularly prominent both at the workshop and in the authors final drafts We also com ment on the spirit of inquiry that they represent Our goal is to provide some orientation to the specific contents of the essays and to supply material for reflection on a set of problems that will doubtless develop and deepen as rapidly in the foreseeable future as they have in the recent past

**Clause Linking and Clause Hierarchy** Isabelle Bril,2010 This collective volume explores clause linkage strategies in a cross linguistic perspective with greater emphasis on subordination Part I presents some theoretical reassessment of syntactic terminologies and distinctive criteria for subordination as well as typological methods based on sets of variables and statistics allowing cross linguistic comparability Part II deals with strategies relating to clause chaining conjunctive conjugations converbial constructions masdars Part III centers on the interaction between the syntax pragmatics and semantics of clause linking and subordination in relation to informa tional structure to referential hierarchy and correlative constructions Part IV presents insights in the clause linking and subordinating functions of some T A M markers verbal inflectional morphology and conjugation systems which may also interact with informa tional hierarchy via the backgrounding effects and lack of illocutionary force of some aspect and mood forms The volume is of particular interest to linguists and typologists working on clause linkage systems and on the interface between syntax pragmatics and semantics

**Diagnosing Syntax** Lisa Lai-Shen Cheng,Norbert Corver,2013-07-25 Drawing on the expertise of over 20 leading scholars and their empirically rich data this book presents current thoughts on and practical answers to the question What are the diagnostic signs techniques and procedures that can be used to analyse natural language syntax *A Grammar of Modern Breton* Ian J. Press,2011-05-12 The series builds an extensive collection of high quality descriptions of languages around the world Each volume offers a comprehensive grammatical description of a single language together with fully analyzed sample texts and if appropriate a word list and other relevant information which is available on the language in question There are no restrictions as to language family or area and although special attention is paid to hitherto undescribed languages new and valuable treatments of better known languages are also included No theoretical model is imposed on the authors the only criterion is a high standard of scientific quality *The Syntax and Semantics of Adverbs in Russian* Keith Eliot Goeringer,1998 Case and Aspect in Slavic Kylie R. Richardson,2007-06-28 The role of structural case

in syntax is arguably one of the most controversial topics in syntactic theory with important implications for semantic theory This book focuses on some of the most puzzling case marking patterns in the Slavic languages and ties these patterns to different types of aspectual phenomena showing that there is after all a pattern in the seeming chaos of case in the Slavic languages Kylie Richardson addresses links between the case marking on objects and the event structure of a verb phrase in Belarusian Russian Ukrainian Czech Slovak Polish and Bosnian Croatian Serbian and also shows that the links between case and aspect in the Slavic languages belong to a much larger pattern found in language in general She also focuses on links between case and grammatical aspect in depictive predicative participle and copular constructions in the East Slavic languages The book will appeal to scholars and advanced students of aspect and to all Slavicists *Converbs in Cross-Linguistic Perspective* Martin Haspelmath, Ekkehard König, 2020-08-10 No detailed description available for *Converbs in Cross Linguistic Perspective* **Annual Workshop on Formal Approaches to Slavic Linguistics** Sergey Avrutin, Steven Franks, Ljiljana Progovac, 1994 [Annual Workshop on Formal Approaches to Slavic Linguistics](#) Richard Compton, Magdalena Goledzinowska, Ulyana Savchenko, 2007 [Rethinking the Coordinate-Subordinate Dichotomy](#) Jean-Christophe Verstraete, 2011-12-22 This study argues that the domain traditionally covered by coordination and subordination in English can be subdivided into four distinct construction types The constructions are defined on the basis of differences in their interpersonal structure i e the grammatical encoding of speaker attitude and speaker interlocutor interaction It is shown that the four types constitute syntactically semantically and pragmatically coherent categories with differences in interpersonal structure defining and motivating distinct syntactic behaviour distinct pragmatic functions and distinct semantic classes of clause linkage The validity of the analysis is demonstrated in three ways First it is shown that the analysis can make sense of the wide range of apparently conflicting criteria found in the literature on complex sentences which can now be explained as reflections of four different construction types rather than as alternative perspectives on one single contrast between coordination and subordination Second it is shown how the analysis can deal with two specific problems in the more general area of clause combining viz the syntactic basis of the distinction between content epistemic and speech act levels of clause linkage and the distinct discursive functions associated with initial and final position of adverbial clauses Finally it is also shown that the proposed analysis is useful beyond the analysis of English with parallels in a number of cross linguistically recurrent phenomena of clause linkage The book is mainly of interest to linguistics researchers in the areas of syntax semantics and pragmatics as well as to graduate students with a focus on these fields *Linguistic Reconstruction and Typology* Jacek Fisiak, 2011-07-20 *TRENDS IN LINGUISTICS* is a series of books that open new perspectives in our understanding of language The series publishes state of the art work on core areas of linguistics across theoretical frameworks as well as studies that provide new insights by building bridges to neighbouring fields such as neuroscience and cognitive science *TRENDS IN LINGUISTICS* considers itself a forum for cutting edge research based on

solid empirical data on language in its various manifestations including sign languages It regards linguistic variation in its synchronic and diachronic dimensions as well as in its social contexts as important sources of insight for a better understanding of the design of linguistic systems and the ecology and evolution of language TRENDS IN LINGUISTICS publishes monographs and outstanding dissertations as well as edited volumes which provide the opportunity to address controversial topics from different empirical and theoretical viewpoints High quality standards are ensured through anonymous reviewing

*The Parameter of Aspect* C.S. Smith, 2013-03-09 During the period I have been working on this project I have received institutional support of several kinds for which I am most grateful I thank the Institute for Advanced Study at Stanford University and the Spencer Foundation for a stimulating environment in which the basic idea of this book was developed The Max Planck Institute for Psycholinguistics at Nijmegen enabled me to spend several months working on the manuscript A National Science Foundation grant to develop Discourse Representation theory and a grant from The University Research Institute of the University of Texas allowed me time to pursue this project I also thank the Center for Cognitive Science at the University of Texas for research support I thank Helen Aristar Dry for reading early drafts of the manuscript sten Dahl for penetrating remarks on a preliminary version and my collaborator Gilbert Rappaport for relentless comments and questions throughout The individuals with whom I have worked on particular languages are mentioned in the relevant chapters I owe a particular debt of gratitude to the members of my graduate seminar on aspect in the spring of 1990 they raised many questions of importance which made a real difference to the working out of the theory I have benefitted from presenting parts of this material publicly including colloquia at the University of California at Berkeley the University of California at San Diego the University of Pennsylvania Rice University the University of Texas and the University of Tel Aviv
