Canepa, 2022-11-29 A representative selection of tales from the Italian fairy tale tradition translated into English This comprehensive collection of Italian tales in English encourages a revisitation of the fairy tale canon in light of some of the most fascinating material that has often been excluded from it In the United States we tend to associate fairy tales with children and are most familiar with the tales of the Brothers Grimm Hans Christian Anderson and Disney But the first literary fairy tales appeared in Renaissance Italy and long before the Grimms there was already a rich and sophisticated tradition that included hundreds of tales including many of those today considered classic The authors featured in this volume have over the centuries explored and interrogated the intersections between elite and popular cultures and oral and literary narratives just as they have investigated the ways in which fairy tales have been and continue to be rewritten as expressions of both collective identities and individual sensibilities The fairy tale in its Italian incarnations provides a striking example of how this genre is a potent vehicle for expressing cultural aspirations and anxieties as well as for imagining different ways of narrating shared futures Light Pollution Handbook Kohei Narisada, Duco Schreuder, 2013-06-05 This book deals with light pollution and about the ways to reduce it Light pollution is one of the negative side effects of artificial outdoor lighting The term light pollution is an unhappy one but as no better alternative seems to exist it will be used throughout this book The function of all outdoor lighting is to enhance the visibility or the aesthetics in the nighttime environment The light should come where it is needed If not it is spilled causing economic and environmental losses as well as disturbance and discomfort The overall effects are termed light pollution a major form of light pollution is the glow extending over the night sky Sky glow is discussed in many astronomical textbooks and in many popular brochures The present book is primarily aimed at those responsible for outdoor lighting installations Thus an engineering approach has been chosen The level of the book is that of college or University level The book is organized in two parts The first seven chapters cover the areas of general interest and conclude with recommendations The second part deals with the scientific and engineering elaboration of the first part A number of examples are included that refer to specific outdoor lighting installations and projects that are directly related to the reduction of light pollution Finally some information is given about the authors *Grazia Deledda's Painterly Aesthetic* Angela Guiso, Virginia A. Picchiotti, 2025-03-15 Central to Grazia Deledda's narrative worlds are the relationships between her characters and the vast landscapes in which they move

and act The writer translates and represents her characters her characters emotions and her natural and urban landscapes with a vocabulary that is often related to the visual arts However although her descriptions contain the gradations of Modernist painting beginning with Impressionism no book length study and with diverse perspectives has thus far investigated Deledda s relationship with the visual arts and the resulting painterly aesthetic of her multicolored narratives In this sense Grazia Deledda s Painterly Aesthetic provides an articulated literary panorama of Deledda s novels and short stories through a discourse that is situated between literature and pictorial art Inspired by these two cardinal points the analyses are undertaken by contributors who have a profound awareness of an epochal change and work in different disciplines One year from the centenary of her receipt of the Nobel Prize the contributors investigate the connections consonances and differences between Grazia Deledda s oeuvre and other works inside this panorama to verify a possible unity of purpose At the same time they seek to ascertain whether these connections can corroborate and exalt the choices that the Sardinian writer made to free herself from the constraints of a hostile environment
