dimension to Australian domestic politics as a result of Australia's merit based immigration system and its shift towards Asia. These policies have helped Australia sustain its growth without a recession for decades but have also slowly changed established patterns in the distribution of job opportunities, wealth and political influence in the country. These transformations have recently triggered a strong Sinophobic campaign in Australia, the most disturbing aspect of which is the denial of the successful integration of Chinese migrants into Australian society. Based on evidence gathered through a longitudinal study of Chinese migrants in Australia, this book examines the misconceptions troubling Australia's current China debate from six important but overlooked perspectives ranging from migration policy changes, economic factors, grassroots responses, the role of major political parties, community activism to knowledge issues.

How Power Changes Hands J. Uhr, 2011-01-27 How can we strengthen the capacity of governments and parties to manage arrivals and departures at the top? Democracy requires reliable processes for the transfer of power from one generation of leaders to the next. This book introduces new analytical frameworks and presents the latest empirical evidence from comparative political research.

Elite Girls' Schooling, Social Class and Sexualised Popular Culture Claire Charles, 2013-11-26 Young women's identities are an issue of public and academic interest across a number of western nations at the present time. This book explores how young women attending an elite school for girls understand and construct empowerment. It investigates the extent to which and the ways in which their constructions of empowerment and identity work to overturn or resist key regulations and normative expectations for girls in post-feminist, hyper-sexualised cultural contexts. The book provides a succinct overview of feminist theorisations of normative femininities in young women's lives in western cultural contexts. It includes familiar sexist discourses such as sexual double standards as well as more recent commentary about the regulation of young women's subjectivities in neoliberal, post-feminist, hyper-sexualised cultures. Drawing on ethnographic research in the context of an elite girls' secondary school, the author explores how empowerment for young women is constructed and understood across a range of textual practices. From visual representations of young women in school promotional material to students' constructions of popular celebrities, the question of how girls' resistance to normative femininities begins to develop is examined. This rich empirical work makes a unique contribution to the study of elite schooling within the sociology of education, drawing on important insights from the field of critical girlhood studies and posing a challenge to popular feminist notions about media literacy, young women and empowerment. It will be of interest to scholars and postgraduates in the areas of gender studies, sociology, education, youth studies and cultural studies.

Fringe Nations in World Soccer Kausik Bandyopadhyay, Sabyasachi Mallick, 2013-09-13 Soccer is the most popular mass spectator sport in the world, gaining huge media coverage and reaching all levels of society in countries all around the world. More than just entertainment, soccer has proved to be a reflection of national, cultural, community and ethnic identity as well as an indication of the development and international status of post-colonial nation states. For those nations still at the fringes of the modern global game, soccer

represents a vision of potential commercialisation capable of generating foreign reserves and bringing in considerable economic power This book explores aspects of the development of soccer in countries which have recently been marginalised in world soccer or have only erratic success on the international stage These fringe nations include a greater part of Africa the USA Australia Israel India Nepal Bhutan Burma Indonesia Thailand Maldives and Sri Lanka and while these countries are rarely noticed by the global football media they nonetheless have great potential to excel and many have a rich soccer heritage that still holds a place of central importance in the every day life of the people This book was previously published as a special issue of Soccer and Society
