century to the present It focuses on the United States but is also the first encyclopedic work on the subject that reflects a truly global perspective With contributions from the world s foremost authorities on the subject Immigration and Asylum offers nearly 200 entries organized around four themes immigration and asylum the major migrating groups around the world expulsions and other forced population movements and the politics of migration In addition to basic entries the work includes in depth essays on important trends events and current conditions There is no better resource for exploring just how profoundly the voluntary and forced movement of asylum seekers and refugees has transformed the world and what that transformation means to us today *Balkan Worlds: The First and Last Europe* Traian Stoianovich,2015-05-20

Encompassing the period from the Neolithic era to the troubled present this book studies the peoples societies and cultures of the area situated between the Adriatic Sea in the west and the Black Sea in the east between the Alpine region and Danube basin in the north and the Aegean Sea in the south This is not a conventional history of the Balkans Drawing upon archaeology anthropology economics psychology and linguistics as well as history the author has attempted a total history that integrates as many as possible of the avenues and categories of the Balkan experience *Border Heritage* Roberta Altin,2024-07-17 Border Heritage opens new insights in migration studies through analysis of the same emblematic eastern central European borderland in Trieste crossed by four refugee migrations over 70 years of history 1945 2022 Born from a dual personal and professional perspective the book s original structure starts from the Ukrainian displacement going back to the asylum seekers arriving via the Balkans then to refugees from the former Yugoslavia and the exodus from Istria after the Second World War the second part focuses on places objects and displaced memories Each chapter begins with a particularly significant account by a refugee which anchors the argument in everyday life and gives a human dimension to the following conceptual developments All but scattered the narrative plot offers a cohesive thread through the various chapters analyzing how the various migrations have stratified overlapped and contaminated each other Critically rethinking the heritage of a borderland means rethinking cognitive categories and being able to perceive the different nuances of those on the margins without necessarily wanting to merge them into a generic social inclusion and instead giving them the right to a different voice This book reverses the monochrome historical perspective to instead adopt the migrants perspective and make them the subject of study in a set of historical migrations **Public History for a Post-Truth Era** Liz

Sevcenko,2022-07-25 Public History for a Post Truth Era explores how to combat historical denial when faith in facts is at an all time low Moving beyond memorial museums or documentaries the book shares on the ground stories of participatory public memory movements that brought people together to grapple with the deep roots and current truths of human rights abuses It gives an inside look at Sites of Conscience around the world and the memory activists unearthing their hidden histories from the Soviet Gulag to the slave trade in Senegal It then follows hundreds of people joining forces across dozens of US cities to fight denial of Guant namo mass incarceration and climate change As reparations proposals proliferate in the

US the book is a resource for anyone seeking to confront historical injustices and redress their harms Written in accessible non academic language it will appeal to students educators or supportive citizens interested in public history museums or movement organizing
