relation between personality and extrasensory perception based on data gathered by a psychologist and statistical analysis
by a physicist **Extrasensory Perception** Gertrude Schmeidler,2017-07-12 If extrasensory perception is a common
human ability why can t we all score high on ESP tests This book answers the question by describing psychological
determinants of success and failure in extrasensory perception Some of the most signifi cant points raised in the editor s
enlightening introduction are developed in greater detail in the nine essays that follow all of them important statements
giving a clear picture of research into ESP and the debate that surrounds it Each essay is followed by a comment relating the
essay to the field as a whole In essays on the debate about ESP an attack by C E M Hansel is followed by a rebuttal by J B
Rhine and J G Pratt offering the reader insight into the peculiar tension surrounding the ESP controversy The book also
includes a balanced overview of problems in the field by J C Crumbaugh and six other essays on the psychological factors
that influence research on ESP Controversy over ESP is of special interest also because the questions critics raise relate
closely to problems within psychology itself In addition the essays reflect a quality common to much research the excitement
of uncovering results that advance our knowledge This book is intended for supplementary course use Because of the
fundamental problems it addresses it also offers richly rewarding reading for all teaching and practicing psychologists as
well as for the interested generalist A substantial number of research reports are cited throughout so that any reader seeking
further information will find the cited references invaluable **Parapsychology** Caroline Watt,2017-07-05 Many people
