Rethinking the Enlightenment Henry Martyn Lloyd, Geoff Boucher, 2017-12-29 One of the most persistent troubling and divisive of the ideological divisions within modernity is the struggle over the Enlightenment and its legacy Much of the difficulty is owed to a general failure among scholars to consider how history philosophy and politics work together Rethinking the Enlightenment bridges these disciplinary divides Recent work by historians has now called into question many of the clichés that still dominate scholarly understandings of the Enlightenment's literary philosophical and political culture Yet this work has so far had little impact on the reception of the Enlightenment its key players debates and ideas in the disciplines that most rely on its legacy namely philosophy and political science Edited by Geoff Boucher and Henry Martyn Lloyd Rethinking the Enlightenment makes the case for connecting new work in intellectual history with fresh understandings of Continental philosophy and political theory In doing so in this collection moves towards a critical self understanding of the present

An epitome of the history of Philosophy ... Translated from the French, with additions, and a continuation ... by C. S. H. Caleb Sprague HENRY, 1849 *Origins and the Enlightenment* Catherine Labio, 2018-07-05 What epistemic assumptions framed eighteenth century thinkers speculations regarding origins What if anything connected these speculations The best way to understand the Enlightenment's obsession with origins is to study it in conjunction with the contemporary conceptualization of originality as a criterion of aesthetic value Catherine Labio maintains Her expansive survey of the era's thought places special emphasis on epistemology and is genuinely interdisciplinary drawing on such fields as anthropology geometry historiography literary

criticism and political economy One of the most striking facets of Enlightenment thought according to Labio is the emergence of aesthetics as a master discourse that enabled its users to make sense of worlds ostensibly unrelated to the arts In particular once knowledge became defined as knowledge of things made by human beings originality became valued not only for its novelty but also as a guarantee of epistemological certainty Labio analyzes the views held by a variety of European thinkers including Baumgarten Condillac Descartes Kant Locke Rousseau Adam Smith Vico and Edward Young on the origins of ideas languages nations nature and wealth Throughout the author deals with a wide range of primary and secondary materials

A Conceptual History of Psychology John D. Greenwood, 2015-08-27 A penetrating analysis of the fundamental conceptual continuities and discontinuities that inform the history of psychology The Cambridge History of Eighteenth-century Philosophy Knud Haakonssen, 2006 This two volume set presents a comprehensive and up to date history of eighteenth century philosophy The subject is treated systematically by topic not by individual thinker school or movement thus enabling a much more historically nuanced picture of the period to be painted

Theory and Practice in the Eighteenth Century Alexander Dick, Christina Lupton, 2015-10-06 Brings together scholars who use literary interpretation and discourse analysis to read 18th century British philosophy in its historical context This work analyses how the philosophers of the Enlightenment viewed their writing and how their institutional positions as teachers and writers influenced their understanding of human consciousness

In Babel's Shadow Tuska Benes, 2008 A comprehensive cultural history of the language sciences in nineteenth century Germany In contrast to fields like anthropology the history of linguistics has received remarkably little attention outside of its own discipline despite the undeniable impact language study has had on the modern period In Babel's Shadow situates German language scholarship in relation to European nationalism nineteenth century notions of race and ethnicity the methodologies of humanistic inquiry and debates over the interpretation of scripture Author Tuska Benes investigates how the German nation came to be defined as a linguistic community and argues that the linguistic turn in today's social sciences and humanities can be traced to the late eighteenth century emerging within a German tradition of using language to critique the production of knowledge In this volume Benes suggests that nineteenth century philologists interpreted language as evidence of ethnic descent and created influential myths of cultural origin around the perceived starting points of their mother tongue She argues that the origin paradigm so prevalent in German linguistic thought reinforced the historical and ethnic focus of German nationhood with important implications for German theologians cultural critics philosophers and racial theorists In Babel's Shadow also contextualizes the importance of linguistics to modern cultural studies by arguing that the cultural significance attributed to language in twentieth century French philosophy dates to the late eighteenth century and has clear precedents in theology Benes links the German tradition of reflecting on the autonomous powers of language to the work of the fathers of structuralist and poststructuralist thought Ferdinand de Saussure and Friedrich Nietzsche In Babel's Shadow makes clear that comparative philology helped

make language an important model and informing metaphor for other modes of thinking in the modern human sciences Cultural and intellectual historians scholars of German language and literature and linguists will enjoy this illuminating volume An Essay on the Origin of Human Knowledge.
