Love is a return to the form that made Mr de Botton's name in the mid 1990s love is the subject best suited to his obsessive aphorizing and in this novel he again shows off his ability to pin our hopes methods and insecurities to the page This is a Romantic novel in the true sense one interested in exploring how love can survive and thrive in the long term The result is a sensory experience fictional philosophical psychological that urges us to identify deeply with these characters and to reflect on his and her own experiences in love Fresh visceral and utterly compelling The Course of Love is a provocative and life affirming novel for everyone who believes in love There's no writer alive like de Botton and his latest ambitious undertaking is as enlightening and humanizing as his previous works Chicago Tribune *Essays in Social Neuroscience* John T.

Cacioppo, Gary G. Berntson, 2004-07-16 Leaders in the field provide an introduction to the multidisciplinary collaborations of social neuroscience This collection of essays by a group of distinguished social neuroscientists provides the reader with an engaging overview of this emerging multidisciplinary and collaborative field In the twentieth century the arbitrary barrier between neuroscience and social psychology was reinforced by the specialized knowledge required by each field and an emphasis on scientific work in isolation from other disciplines the biological and social perspectives on mind and behavior developed for the most part independently of each other Neuroscientists often considered social factors irrelevant or minimally important while cognitive and social scientists tended to ignore biological constraints and mechanisms as leading to what they mistakenly thought of as reductionism By the end of the twentieth century however as those working in both fields were spurred by the common goal of understanding how the mind works systematic collaborations between neuroscientists and cognitive scientists had begun These collaborative efforts have already helped unravel aspects of perception imagery attention and memory These essays by leaders in the field reflect the range of disciplines engaged and questions addressed today in social neuroscience Topics include maternal effects and chromatin modeling Oxytocin and the prairie vole a love story pheromones social odors and the unconscious and memory *Love Become Incarnate: Essays in Honor of Bruce D.
