
Critical geopolitics: discourse, difference, and dissent

Abstract. In the 1980s international relations theory has been undergoing a major methodological and theoretical debate which has challenged much of the recent disciplinary orthodoxy. This has been inspired by the introduction of contemporary critical social theory and poststructuralist themes into international relations by a new generation of practitioners. Given the close intellectual proximity of international relations to political geography's concerns with geopolitics, these current debates are of great relevance to any attempt to retheorise global politics from the perspective of political geography. Although the recent revival of interest in political geography has led to a considerable interest in rethinking the historiography of the subdiscipline and to reevaluating its tainted past, the necessary accompanying theoretical rethinking has not progressed in a similar fashion. The theoretical issues discussed in the contemporary international relations literature have much to offer political geographers in pursuing this important task.

1 Geography and a world in crisis

As a recent edited collection of essays in geography has it, the world is in crisis (Johnston and Taylor, 1989). Hunger, environmental degradation, war, poverty, premature death, greenhouse effects, ... the tale of woe goes on. Simultaneously the world is astir politically as the cold war systems crumble, economic arrangements change ever more rapidly, new agendas for political action emerge, and the security discourses of the last four decades are increasingly challenged. In the fields of social and political theory too the old certainties are no longer so certain. Signposts (sic!) as to which intellectual direction to follow in these new times are not reliable; positivism and the models of the natural sciences are widely criticised. In this theoretical and political vortex geography in general, and political geography in particular, finds itself searching for direction, facing bigger challenges than ever to say something coherent about what is going on.

In this paper I explore some of the current theoretical controversies 'over the disciplinary fence' in the field of international relations. There, few answers will be easily found; but at least some very interesting questions are available for our perusal and the theoretical debates suggest some critical approaches that may be very useful. The multiplicity of theoretical perspectives and the diversity of methodological projects in international politics parallels some of geography's diverse approaches to contemporary political life. For this reason I explore contemporary discussions there to offer some insight into what geographers might say about the contemporary state of the world in a theoretically and politically informed manner. A secondary purpose in writing this paper is to link arguments made elsewhere (Dalby, 1988; 1990a; 1990b; 1991) about critical geopolitics more explicitly to literatures in geography and in international relations.

A comprehensive analysis of the state of either international relations or political geography is beyond the scope of this paper. In this paper, I do not deal with the material concerned with local and state politics. Neither can I exhaustively discuss all the relevant social theory arguments and literatures. Instead I explore one particular theme, that of the contemporary critical approaches to international studies,

Dissent in Dangerous Times Austin Sarat, 2010-02-22 Dissent in Dangerous Times presents essays by six distinguished scholars who provide their own unique views on the interplay of loyalty patriotism and dissent While dissent has played a central role in our national history and in the American cultural imagination it is usually dangerous to those who practice it and always unpalatable to its targets War does not encourage the tolerance of opposition at home any more than it does on the front if the War on Terror is to be a permanent war then the consequences for American political freedoms cannot be overestimated Dissent in Dangerous Times examines the nature of political repression in liberal societies and the political and legal implications of living in an environment of fear This profound incisive at times even moving volume calls upon readers to think about and beyond September 11 reminding us of both the fragility and enduring power of freedom Nadine Strossen President American Civil Liberties Union and Professor of Law New York Law School Contributors to this volume Lauren Berlant Wendy Brown David Cole Hugh Gusterson Nancy L Rosenblum Austin Sarat

Arestis, Malcolm C. Sawyer, 2001-01-01 Annotation **The Dissenting Voice** Martin S. Stabb, 2014-05-23 Political social and aesthetic change marked Latin American society in the years between 1960 and 1985 In this book Martin Stabb explores how these changes made their way into the essayistic writings of twenty six Spanish American intellectuals Stabb posits that dissent against ideology against simplistic notions of technological progress against urban values and even against the direct linear expository style of the essay itself characterizes the work of these contemporary essayists He draws his examples from major canonical figures including Paz Vargas Llosa Fuentes and Cort zar and from lesser known writers who merit a wider readership such as Monterroso Zaid Edwards and Ibarg engoitia This exploration overturns many conventional assumptions about Latin American intellectuals and also highlights some of the other achievements of authors famous primarily for novels or short stories **Dissenting Lives** Anne Collett, Tony Simoes de Silva, 2017-10-02 This collection brings together a series of essays that combine the public and private nature of dissent stories of dissent that encapsulate the mood of an historical or cultural period or of a society Dissent is most memorable when it is public explosive dramatically enacted Yet quiet dissent is no less effective as a methodical unstitching of social and political mores rules and regulations Success depends perhaps less on intensity than on determination on patience as much as courage Moreover although many persistent dissenters often gain an iconic status most live dissent in the fabric of their ordinary lives Some combine both Imprisoned at Robben Island for 27 years his image and voice erased from the print media or airwaves Nelson Mandela remained even in jail one of the most powerful agents of dissent in South African society until his freedom in 1990 Deep connections deep commitment profoundly personal convictions and courageous public dissent are some of the threads that bind together this diverse and exciting collection of essays Alone each essay explores dissent and consent in stimulating and distinct ways together they speak both of the effects of dissent and consent and of their affective energies and potential This book was originally published as a special issue of Life Writing *Seeds of Dissent* Khoo Ying Hooi, 2022-12-06 Selected Essays on Political Reforms and Social Change SEEDS OF DISSENT is a collection of 55 essays by Khoo Ying Hooi It engages a variety of political questions rooted within the contentious terrain of culture and power in Malaysia These essays critically speak to the multiple ways in which the dominant political power shapes and perpetuates widespread social injustice The central argument of these essays on Malaysian politics and society is the growing climate of repression Events in the past decade such as the 2008 and 2013 general elections and protest movements such as Bersih Hindraf and many others have changed the national conversation Spanning 2012 2014 this timely collection not only provides deeply unique and thought provoking political insights into understanding Malaysian politics and society but also guides the reader to rethinking the role of dissenting voices in shaping the future of the country The World of Rural Dissenters, 1520-1725 Margaret Spufford, 1995-03-16 There has been dispute amongst social historians about whether only the more prosperous in village society were involved in religious practice A group of historians working under Dr Spufford s direction have produced a factual solution to this dispute by

examining the taxation records of large groups of dissenters and churchwardens and have established that both late Lollard and post Restoration dissenting belief crossed the whole taxable spectrum We can no longer speak of religion as being the prerogative of either weavers and threshers or on the other hand of village elites The group also examined the idea that dissent descended in families and concluded that this was not only true but that such families were the least mobile population group so far examined in early modern England probably because they were closely knit and tolerated in their communities The cause of the apparent correlation of dissenting areas and areas of early by employment was also questioned The group concludes that travelling merchants and carriers on the road network carried with them radical ideas and dissenting print the content of which is examined as well as goods In her own substantial chapter Dr Spufford draws together the pieces of the huge mosaic constructed by her team of contributors adds radical ideas of her own and disagrees with much of the prevailing wisdom on the function of religion in the late seventeenth century Professor Patrick Collinson has contributed a critical conclusion to the volume This is a book which breaks new ground and which offers much original material for ecclesiastical cultural demographic and economic historians of the period
