## Essays In Metaphysics:

Idealism Tyron Goldschmidt, Kenneth L. Pearce, 2017-12-01 Idealism is a family of metaphysical views each of which gives priority to the mental. The best known forms of idealism in Western philosophy are Berkeleyan idealism which gives ontological priority to the mental minds and ideas over the physical bodies and Kantian idealism which gives a kind of explanatory priority to the mental the structure of the understanding over the physical the structure of the empirical world. Although idealism was once a dominant view in Western philosophy it has suffered almost total neglect over the last several decades. This book rectifies this situation by bringing together seventeen essays by leading philosophers on the topic of metaphysical idealism. The various essays explain, attack or defend a variety of idealistic theories including not only Berkeleyan and Kantian idealisms but also those developed in traditions less familiar to analytic philosophers including Buddhism and Hassidic Judaism. Although a number of the articles draw on historical sources all will be of interest to philosophers working in contemporary metaphysics. This volume aims to spark a revival of serious philosophical interest in metaphysical idealism.

*An Essay on Metaphysics* Robin George Collingwood, 2001-05-24 *An Essay on Metaphysics* is one of the finest works of the great Oxford philosopher, historian and archaeologist R. G. Collingwood. First published in 1940, it is a broad-ranging work in which Collingwood considers the nature of philosophy, especially of metaphysics. He puts forward his well-known doctrine of absolute presuppositions, expounds a logic of question and answer, and gives an original and influential account of causation. The book has been widely read and much discussed ever since. In this new edition, the complete original text is accompanied by three previously unpublished essays by Collingwood which will be essential reading for any serious student of his thought. *The Nature of Metaphysical Study* 1934, *Function of Metaphysics in Civilization* 1938, and *Notes for an Essay on Logic* 1939. These fascinating writings illuminate and amplify the ideas of the *Essay* to which they are closely related. The distinguished philosopher and Collingwood scholar Rex Martin has established authoritative versions of these new texts, added a short set of notes on the *Essay*, and contributed a substantial introduction explaining the story of the composition of all these works, discussing their major themes and setting them in the context of Collingwood's philosophy as a whole.

**The Elements and Patterns of Being** Donald C. Williams, 2018 Donald C. Williams 1899-1983 was a key figure in the development of analytic philosophy. This book will be the definitive source for his highly original work which did much to bring metaphysics back into fashion. It presents six classic papers and six previously unpublished, revealing his full philosophical vision for the first time.

*Essays in Metaphysics*, 1924 *Categories of Being* Leila Haaparanta, Heikki J. Koskinen, 2012-07-18 This edited volume is a comprehensive presentation of views on the relations between metaphysics and logic from Aristotle through twentieth-century philosophers who contributed to the return of metaphysics in the analytic tradition. The collection combines interest in logic and its history with interest in analytical metaphysics and the history of metaphysical thought. By so doing, it adds both to the historical understanding of metaphysical problems and to contemporary

research in the field Throughout the volume essays focus on metaphysica generalis or the systematic study of the most general categories of being Beginning with Aristotle and his Categories the volume goes on to trace metaphysics and logic through the late ancient and Arabic traditions examining the views of Thomas Aquinas Duns Scotus and William Ockham Moving into the early modern period contributors engage with Leibniz's metaphysics Kant's critique of metaphysics the relation between logic and ontology in Hegel and Bolzano's views Subsequent chapters address Charles S Peirce's logic and metaphysics the relevance of set theory to metaphysics Meinong's theory of objects Husserl's formal ontology early analytic philosophy C I Lewis and his relation to Russell and the relations between Frege Carnap and Heidegger Surveying metaphysics through to the contemporary age essays explore W V Quine's attitude towards metaphysics Wilfrid Sellars's relation to antidescriptivism as it connects to Kripke's the views of Putnam and Kaplan Peter F Strawson's and David M Armstrong's metaphysics Trope theory and its relation to Popper's conception of three worlds The volume ends with a chapter on transcendental philosophy as ontology In each chapter contributors approach their topics not merely in an historical and exegetical fashion but also engage critically with the thought of the philosophers whose work they discuss offering synthesis and original philosophical thought in the volume in addition to very extensive and well informed analysis and interpretation of important philosophical texts The volume will serve as an essential reference for scholars of metaphysics and logic

Essays in Metaphysics, 1924 **Essays in Metaphysics** Desmond Connell, 1996 *Time, Identity and the Self: Essays on Metaphysics* Brian Garrett, 2022-02-21 This volume contains twenty four essays by the British Australian analytic metaphysician Brian Garrett These essays are followed by four short dialogues that emphasize and summarize some of the main points of the essays and discuss new perspectives that have emerged since their original publication The volume covers topics on the metaphysics of time the nature of identity and the nature and importance of persons and human beings The chapters constitute the fruits of almost four decades of philosophical research from Brian's two award winning essays published in *Analysis* in 1983 and *The Philosophical Quarterly* in 1992 to his latest ideas about Fatalism and the Grandfather Paradox This book will be of interest to students and professional philosophers in the field of analytic philosophy

**Essays in the Metaphysics of Mind** Jaegwon Kim, 2010-10-21 The first begins with a consideration of Davidson's argument for the claim that there are no strict laws about the mental the second builds on J J C Smart's observations on biology and its relation to physics and the third is based on my earlier work on multiple realization

Modal Matters Phillip Bricker, 2020-04-16 Drawing together his work from four decades Phillip Bricker provides a comprehensive account of modal reality the realm of possible worlds from a Humean perspective with excursions into neighboring topics in metaphysics Many of the chapters in this volume focus on aspects of David Lewis's metaphysics and his defence of modal realism sometimes further developing and defending Lewis's views sometimes deviating from them in substantial ways The volume is presented in four parts part one sketches an account of reality as a whole both the mathematical and the modal

defending a form of plenitudinous realism part two presents and defends a realist theory of concrete possible worlds with an absolute ontological distinction between the actual and the merely possible part three presents and defends a Humean account of modal plenitude formulating and endorsing principles that guarantee a plenitude of recombination of possible structures and of alien contents and part four applies the Humean account to truthmaking mereology spacetime and quantities An uncompromising Humean Bricker shows that holding fast to Humean strictures leads to views that differ in radical ways from those prevalent among contemporary metaphysicians *Aristotle and Beyond* Sarah Broadie,2007-10-18 Written over a period of thirty five years these essays explore the topics of causation time fate determinism natural teleology different conceptions of the human soul the idea of the highest good and the human significance of leisure While most of the essays take as their starting point some theme in Ancient Greek philosophy they are meant not as exegesis but as distinctive and independent contributions to live philosophizing Written with clarity precision without technicality and philosophical imagination they will engage a wide range of readers including scholars and students of Ancient Greek philosophy and others working on more contemporary analytical concerns The Importance of Subjectivity Timothy L. S. Sprigge,2011-01-13 Timothy Sprigge was one of the leading exponents of philosophical idealism in the last fifty years The idealist worldview long unfashionable has been coming back into favour and Sprigge s work has found a new readership These selected essays focus on the view of consciousness on which his unique system of metaphysics and ethics is based Form and Reason Edward Halper,1993-08-03 This book uses the study of philosophical texts to raise and explore metaphysical issues On one level each essay addresses a scholarly issue in a classical text often a text of Aristotle s On a deeper level the issues Halper considers are metaphysical However unlike thinkers who have brought linguistic analysis and contemporary metaphysical notions to these texts Halper approaches them to find their formulations of issues and their strategies of pursuit Halper is not concerned with the defense of metaphysical commitments but with finding and exploring paths of metaphysical inquiry The essays in this volume are exploratory and exegetical rather than decisive Their contribution to metaphysics lies in the issues they raise the methods they explore and their conception of metaphysics as a discipline rooted in philosophical problems

**Metaphysics and the Philosophy of Science** Matthew Slater,Zanja Yudell,2017-02-01 The question of the proper role of metaphysics in philosophy of science is both significant and contentious The last few decades have seen considerable engagement with philosophical projects aptly described as the metaphysics of science inquiries into natural laws and properties natural kinds causal relations and dispositions At the same time many metaphysicians have begun moving in the direction of more scientifically informed scientific or naturalistic metaphysics And yet many philosophers of science retain a deep suspicion about the significance of metaphysical investigations into science This volume of new essays explores a broadly methodological question what role should metaphysics play in our philosophizing about science These new essays written by leading philosophers of science address this question both through ground level investigations of particular issues

in the metaphysics of science and by more general methodological inquiry      Non-Being Sara Bernstein, Tyron Goldschmidt, 2021-03-18 Nonexistence is ubiquitous yet mysterious This volume explores some of the most puzzling questions about non being and nonexistence and offers answers from diverse philosophical perspectives The contributors draw on analytic continental Buddhist and Jewish philosophical traditions and the topics range from metaphysics to ethics from philosophy of science to philosophy of language and beyond      **Putting Metaphysics First** Michael Devitt, 2010 Michael Devitt presents a series of essays in which he argues for an uncompromisingly realist view of the external physical world He goes on to reject moral noncognitivism antirealist views of truth He argues against the a priori urges that we should approach epistemology semantics from a metaphysical perspective not vice versa      **Ontology, Identity, and Modality** Peter van Inwagen, 2001-03-22 This book gathers together thirteen of Peter van Inwagen's essays on metaphysics several of which have acquired the status of modern classics in their field They range widely across such topics as Quine's philosophy of quantification the ontology of fiction the part whole relation the theory of temporal parts and human knowledge of modal truths A specially written introduction completes the collection which will be an invaluable resource for anyone interested in metaphysics      *The Importance of Subjectivity* Timothy Lauro Squire Sprigge, 2011      **Having Thought** John Haugeland, 2000-09-15 The unifying theme of these thirteen essays is understanding Haugeland addresses mind and intelligence intelligibility analog and digital systems and supervenience presuppositions about the foundational notions of intentionality and representation and the essential character of understanding in relation to what is understood

**Discourse on Metaphysics and Other Essays** Gottfried Wilhelm Leibniz, 1991-11-15 Discourse on Metaphysics and Other Essays contains complete translations of the two essays that constitute the best introductions to Leibniz's complex thought Discourse on Metaphysics of 1686 and Monadology of 1714 These are supplemented with two essays of special interest to the student of modern philosophy On the Ultimate Origination of Things of 1697 and the Preface to his New Essays of 1703 1705 The translations are taken from Leibniz Philosophical Essays edited and translated by Roger Ariew and Daniel Garber Hackett 1989
