

I would like to present to you, our world. Offering the landscapes of the lush green of the jungles, the dry grass of the reflected veld, the majestic mountain clays of the deserts, and the high-rise mortar of cities. The breath-taking sights of a natural beauty, is the description of "our world".

But is this really what we feel when we think of "our world". Is it really what we picture? My imagery of "our world", is beyond the description just made. My imagery is directed at all the bloodlines that were whipped and confined to fight for their rights, causing generations of fear and pain. The bloodshed that made our world, a world of "freedom". I see those who were pleased by pulling triggers on innocent lives. #BLACKLIVESMATTER. Do they really matter, if the little boy at home sits, and waits for his dad to return, not knowing he will never get to experience his presence again?

T-H-U-G, meaning the hate you give an infant comes back to bite you once he's grown, because he will still hold that grudge of how his father was killed. His father laid for charges he, himself cannot justify. [Click, click] "Lay on the floor, are you disobeying me?" the officer says [BOOM the gun shots]. But still "#BLACKLIVESMATTER".

It's not the hate you give, it's the hate we give, but we can break the cycle. We don't need a life to be taken before realizing that #BLACKLIVESMATTER. Our world still needs change and it will take us a milestone to reach all those landscapes, the reflected veld and majestic mountains. And "our world" can change if you step up and become the 'embokodo'.

Ek wil graag aan u, ons wêreld, voorhou. Met die landskappe van die welige groen van die oerwoude, die droë gras van die weerkaatste veld, die majestueuse bergklei van die woestynne en die hoë mortier van stede. Die asemrowende besienswaardighede van 'n natuurlike skoonheid, is die beskrywing van "ons wêreld".

Maar is dit regtig wat ons voel as ons aan "ons wêreld" dink. Is dit regtig wat ons voorstel? My beeldspraak van "ons wêreld", is buite die beskrywing wat pas gemaak is. My beelde is gerig op al die bloedlyne wat geslaan en beperk is om vir hul regte te veg, wat generasies van vrees en pyn veroorsaak. Die bloedvergiëting wat ons wêreld gemaak het, 'n wêreld van "vryheid". Ek sien diegene wat bly was deur snellers op onskuldige lewens te trek. #BLACKLIVESMATTER. Maak dit regtig saak, as die seuntjie by die huis sit en wag vir sy pa om terug te keer, sonder om te weet dat hy nooit weer sy teenwoordigheid sal ervaar nie?

T-H-U-G, wat beteken dat die haat wat jy 'n baba gee, terugkom om jou te byt sodra hy groot is, want hy sal steeds daandie wrok koester van hoe sy pa vermoor is. Sy pa het gelê vir aanklagte wat hy self nie kan regverdig nie. [Klik op klak] "Lê op die vloer, is jy ongehoorsaam aan my?" sê die beampte [BOOM die geweeskote]. Maar steeds "#BLACKLIVESMATTER".

Dit is nie die haat wat jy gee nie, dit is die haat wat ons gee, maar ons kan die siklus breek. Ons het nie nodig dat 'n lewe geneem word voordat ons dit #BLACKLIVESMATTER besef nie. Ons wêreld het nog

Essays on Actions and Events Donald Davidson, 2001-09-27 Donald Davidson has prepared a new edition of his classic 1980 collection of Essays on Actions and Events including two additional essays Essays on Northeastern North America, 17th & 18th Centuries John G. Reid, 2008-11-14 In examining the history of northeastern North America in the seventeenth and eighteenth centuries it is important to take into account diverse influences and experiences Not only was the relationship between native inhabitants and colonial settlers a defining characteristic of Acadia Nova Scotia and New England in this era but it was also a relationship shaped by wider continental and oceanic connections The essays in this volume deal with topics such as colonial habitation imperial exchange and aboriginal engagement all of which were pervasive phenomena of the time John G Reid argues that these were complicated processes that interacted freely with one another shaping the human experience at different times and places Northeastern North America was an arena of distinctive complexities in the early modern period and this collection uses it as an example of a manageable and logical basis for historical study Reid also explores the significance of anniversary observances and commemorations that have served as vehicles of reflection on the lasting implications of historical developments in the early modern period These and other insights amount to a fresh perspective on the region and offer a deeper understanding of North American history *Essays of Jean Rey, Doctor of Medicine, on an Enquiry Into the Cause Wherefore Tin and Lead Increase in Weight on Calcination (1630)*. either supports or undermines many significant debates within economic theory Despite the significance of uncertainty this book represents the first attempt to comprehensively trace the genealogy of uncertainty which is a procedure that Nietzsche used in relation to morality one of the subjects that become logically redundant in the absence of uncertainty On the one hand this logical redundancy is problematic when considered in isolation given the practical importance of morality On the other hand this logical redundancy becomes even more problematic given that at one time uncertainty was widely accepted as an important part of the philosophical system Here uncertainty played a pivotal role in terms of explaining practical decision making Such an appreciation of uncertainty has recently been set aside by modern philosophy which argues quantities of human labour provide virtually all economic value Such an explanation of economic value excludes uncertainty the many qualitative contributions of nature and morality even when one acknowledged the contribution to the understanding of uncertainty as proposed by Frank Knight in 1921 However in contrast to Knight who looked toward recent philosophy so as to support the existence of uncertainty this genealogy looks to support the significance of uncertainty by understanding the philosophy that supported the idea of uncertainty for thousands of years before the philosophy of John Locke Specifically Locke excludes uncertainty from the analysis of practical decision making in general and from economic decision making in particular Accordingly it can be anticipated that the enclosed genealogy will assist economists to more adequately develop the idea of uncertainty within economic theory *Historical Essays on the Worship of God* Thomas

Essays on Pollution Control in Economics and Management Science Fouad El Ouardighi,2025-04-25 The book features contributions that address both environmental economics and environmental management It presents a novel dynamic modeling framework for environmental economics in which environmental absorption efficiency is considered as a time dependent variable with its own dynamics It also introduces several extensions and applications of the model including the possibility of including self regenerating environmental absorption efficiency non cooperative transboundary issues with two superimposed free rider behaviors i e emissions reduction and restoration efforts and deforestation In the environmental management context it puts forward an entirely new dynamic modeling framework Unlike static approaches the model considers both flow and stock variables reflecting the accumulation of pollution over time In turn the book assesses sustainable configurations for supply chain competition providing mathematical insights and managerial recommendations

that integrate accumulated pollution aspects and associated negative externalities Overall the book calls for combining environmental economics and environmental management in order to arrive at more realistic empirically grounded models Given its focus the book offers a valuable resource for researchers and graduate students with an interest in addressing pollution control challenges in the fields of economics and management science Literary Studies (Miscellaneous Essays): Letters on the Coup d'etat of 1851.
