Karl Rahner's Writings on Literature, Music and the Visual Arts ,2021-08-26 This book is made up of a collection of texts unavailable in one volume until now including six previously untranslated essays from a major theologian of the twentieth century Rahner s numerous writings focused on the revelation of God as mystery in the world and on the human being who has an essential openness towards the transcendent His articles reveal an empathy and a depth of insight into the relationship between theology faith and the arts which are remarkable and may take the reader by surprise More recently Rahner s contribution to the growing field of theology and the arts has been recognised by leading theologians on this subject He asserts that theology must integrate the verbal and non verbal arts as they are authentic

means of human self expression of religious experience and of God's self communication and therefore they are essential sources of theology Rahner argues that theology understood as a person's reflexive self expression about him or herself in the light of divine revelation cannot be regarded as complete until the arts become an intrinsic moment of theology itself

Values of Our Times Deshun Li, 2013-06-01 Philosophers have gradually accepted axiology as one branch of philosophy As a basic category belonging to axiology and philosophy value is the general abstraction of concrete value formation in various fields including utility ethics and appreciation of the beauty The problem of value is essentially a problem of historical activities of practice in human society The axiology based on the scientific practice view insists on the principle of unification between theory and practice truth and value In research of axiology the relation between subjectivity and objectivity of values is a problem that must be solved in the first place The modern conversation of value philosophy is the academic and practical demands of the value philosophy research in China Value evaluation is an important part of the axiology In order to deepen the research of value philosophy and to promote the development of current value philosophy we must have scientific mode of thinking suitable for the nature of value It is the base of value relation the origin of value needs the process of value creation and actualization and the fundamental way to proving one's value as a human being

Journey Toward Self-Realization Kenneth C. Brown, 2014-02-22. This book is about a deep and superficial exploration of the contents of consciousness, individual and collectively. Together we will discover the many impacts that mental and social accumulations have upon the human mind; we will explore the differences in memorization and intelligence, pleasure and happiness, duality. Together we will explore the possibility of freeing ourselves from our mental accumulations, freeing ourselves from all psychological authority. I'm not talking about the laws of the land. Freedom without intelligence is a lunatic looking for a place to happen. Together we will explore what is intrinsic to the mind and what is artificial. Together we will explore reality, which is equally true to us all. When we live from beliefs, we distort reality; that reality that's equally true to us all.

Essential Readings in Biosemiotics Donald Favareau, 2010-06-10. Synthesizing the findings from a wide range of disciplines from biology and anthropology to philosophy and linguistics, the emerging field of Biosemiotics explores the highly complex phenomenon of sign processing in living systems. Seeking to advance a naturalistic understanding of the evolution and development of sign-dependent life processes, contemporary biosemiotic theory offers important new conceptual tools for the scientific understanding of mind and meaning for the development of artificial intelligence and for the ongoing research into the rich diversity of non-verbal human, animal and biological communication processes. Donald Favareau's *Essential Readings in Biosemiotics* has been designed as a single source overview of the major works informing this new interdiscipline and provides scholarly historical and analytical commentary on each of the texts presented. The first of its kind, this book constitutes a valuable resource to both bioscientists and to semioticians interested in this emerging new discipline and can function as a primary textbook for students in biosemiotics as well. Moreover, because of its inherently interdisciplinary nature and its focus on the big questions of cognition, meaning and evolutionary biology, this volume should be of interest to anyone working in the fields of cognitive science, theoretical biology, philosophy of mind, evolutionary psychology, communication studies or the history and philosophy of science.

Deus Trinitas David Coffey, 1999-09-09. Recent years have seen a resurgence of interest in the doctrine of the Trinity following a long period in which it was considered irrelevant to the rest of theology and to the challenge of Christian

life In this book David Coffey claims that this resurgence is caused by a renewed appreciation of the fact that salvation itself has a Trinitarian structure He argues that we cannot understand salvation without a solid understanding of the Trinity Coffey considers the full range of issues surrounding this central doctrine of Christian faith Viewing the doctrine of the Trinity in its historical and ecumenical context he seeks to arrive at a balanced vision that incorporates the insights of both the Western and the Eastern Churches In particular he wants to keep in sight both the immanent Trinity the Godhead considered in itself and the economic Trinity that is its role within the economy of salvation In Coffeys own model of the Trinity the Holy Spirit is seen as the objectivization of the mutual love of the Father and the Son This idea is most closely associated with St Augustine and Richard of St Victor Coffey however takes it much further presenting it as an explanation of the origin of the Son and the Holy Spirit and of the manner of operation of the Trinity in the economy From this model he is also able to derive a suggestion for resolving the ecumenical problem of Filioquism vs Monopatristism concerning the procession of the Holy Spirit the issue that has divided East from West for nearly a millennium Presenting a new perspective on a topic of renewed theological interest this comprehensive study has important implications for ecumenical discussions of the Trinity
