Liability Law for Failed Contract Negotiations Tom Hick, 2025-08-28 This book provides the European structure of liability for failed contract negotiations through a comparative lens with wider lessons for an international context The book demonstrates that all the analyzed legal systems in Belgium France Germany Italy and the Netherlands can be best understood through a binary structure in their approach to pre contractual liability or culpa in contrahendo This structure consists of two key elements first a general liability framework that allows for compensation of pure economic loss based on certain qualified conduct such as negligence and second an implicit obligation to contract which though not explicitly recognized is presumed in most systems The book argues that this dual framework provides valuable insights into ongoing scholarly debates and the challenges practitioners face in cases of failed contract negotiations Drawing on these insights it proposes a more effective approach to the obligation to contract one that encourages parties to collaborate in reaching an agreement voluntarily rather than imposing one upon them This book will be of interest to researchers in the field of comparative contract and tort law European private law and private law theory

increasing fragmentation and transaction costs and allows firms to benefit from resource complementarities favoring division of labour. The contributing authors primarily focusing on Europe and the US address important ways in which legal systems provide a framework for inter firm coordination. It is clear from the analysis that significant obstacles to collaboration still remain and the authors call for legal reforms at European and Member States level.
